DESCRIPTION:
This seminar is designed to investigate how the concept of race has been represented in cinema historically, with a particular focus on representations of race when blackness is masqueraded. Its intent is to launch an investigative inquiry into how African Americans are represented on screen in various time periods, how we as spectators are manipulated by these cinematic constructions of race, and how race is marked or coded other than through visual representation. Students will view films that deal with ¿passing¿ from the various historical periods and will utilize theoretical concepts introduced in class to read these visual representations. Films selected for viewing include the pre-World War II Era, the Civil Rights Era, and the ¿Post-Racial¿ era. Students will be required to write three papers that reflect their ability to apply theoretical concepts to reading racialized representations on screen in these three historical periods to demonstrate their understanding of how racial masquerades have evolved over time and continue to persist in contemporary culture.

DESCRIPTION:
Boundary making, migration, and population displacement have been significant dimensions of the contemporary African experience. How has boundary making, broadly defined (inclusive of national borders, rural-urban distinctions, and ethnic and racial groupings, for example), shaped contemporary Africa? What types of and through what processes were boundaries were created? How did the African people respond to these processes? What population displacements unfolded in the context of this boundary making? And how did the people of Africa make sense of and understand boundary making, migration, and displacement? These are some of the questions we will be examining in this interactive and discussion oriented class. We will build our examination of these issues around six novels written by African authors. These novels will provide insight into the ways by which boundaries, migration, and displacement impacted the everyday lives of the African people.

TITLE: Health and Inequality in Africa and the African Diaspora

GEN EDS: SS, GL

DESCRIPTION:
This seminar examines the ways that healthcare access and health itself are shaped by social, racial, and economic inequalities in our society and others. The geographic focus of this course is Africa and the United States, but case studies from the Caribbean and other African diasporic communities will be included. Drawing on research in medical anthropology, sociology, public health, and history we will gain an understanding of the political, economic, and social factors that create health inequalities. Topics include gender inequality and HIV/AIDS in Africa; race and chronic disease in the U.S.; inequality in the practice of global health; and how racial difference has historically been used to justify and explain health disparities. Students will gain experience

This is a 3 credit hour course.

African American Marriage and Family in U.S. History and Culture
This course examines the history of the marriage and family from slavery to freedom. It is designed with the idea that there is no one singular representative experience, but rather a multitude of voices and perspectives that comprise this history. Readings will consider the historical processes and constraints shaping Black family life in the U.S. alongside themes of resistance, adaptability, and resilience. Over the course of the semester, we will explore historians¿ responses to contemporary narratives about the pathology of the Black family in slavery and freedom.

TITLE: North Carolina Black Feminisms

GEN EDS: US, EE-Performing Arts

DESCRIPTION:
The goal of this First-Year Seminar is to help students develop their own sense of Black feminist thought and practice through exploring the lives and works of several key Black feminist figures with ties to North Carolina. The figures are Harriet Jacobs, Anna Julia Cooper, Pauli Murray, Ella Baker, Nina Simone, Jaki Shelton Green, and Alexis Pauline Gumbs. Students will engage materials that put these figures in context of Black feminist thought and will do hands on activities that reflect Black feminist practices.

This course traces the development of Cherokee philosophy and thought, beginning with an exploration of the Southeastern Ceremonial Complex and its stories. From the time of European contact, we progress through modern literary texts and lectures about how Cherokee people have conceived of the world. We will explore the bases of Cherokee thought and apply that understanding to analyzing texts by Cherokee authors. Students will gain a deeper understanding

of Cherokee culture and society by exploring the stories and beliefs that have been important over time.

AMST 277H.001 | Globalization and National Identity
TR, 3:30 pm - 4:45 pm. Instructor(s): Rachel Willis. Enrollment = 24.
This honors seminar will explore what national identity means in a global world. Intended for students that are planning or have recently completed study abroad programs and/or intend to work internationally, the seminar will explore a wide range of issues that revolve around the relationship between national identity and globalization with a particular focus on the perspective of an American citizen. Our readings and discussions each week will be organized around a theme, case study, or topic and include guest lectures, documentaries, and assignments designed to synthesize internal and foreign views. Small groups of students will investigate particular regions of the world for an in-class presentation early in the term and then each student will be responsible for developing a background paper on a particular geographical region or specific global issue.

NO FIRST YEAR STUDENTS.

Visualizing War in Contemporary American Culture:

War enters our visual field in numerous ways, through films, photographs, and a variety of documentary forms. But do these texts help us understand the social and political consequences of war? In this course, we will consider how war is mediated in contemporary American culture. We will watch films, look at photographs, and consider the representation of war in digital archives like Wikipedia to determine what knowledge about war is produced through these cultural texts. In the end, we may find that representations of war reveal more about our militarized culture than war itself.

This new course explores crucial challenges to privacy by recent technological, governmental, and corporate practices of surveillance. Which aspects of our selves are publicized, through what means, and to what ends? What actions are possible to protect our autonomy? You will understand better the historical backgrounds, ethical dimensions, and critical analyses surrounding these emerging practices of the digital age.

The course explores the role public art, visual culture and media are used as nodal points through which we understand historical economic, political, and social forces that have shaped African American communities in the United States. Using case studies as an investigative process, the emphasis will be on the American South. Students will also engage these media as forms of creative expression that build community space in the face of the pressing issues of today, including protests against police brutality and the COVID-19 pandemic. As a final project for this course, students will create their own work of artistic or documentary media that engages issues of race and space in response to the current moment.

ANTH 060H.001 | Crisis & Resilience: Past & Future of Human Societies
TR, 9:30 am - 10:45 am. Instructor(s): Patricia McAnany. Enrollment = 24.
In this FYS, we take a long view of human societies by examining responses to crises engendered by political, economic, and environmental factors over the longue durée. Perspectives on societal change¿both apocalyptic and transformational¿are critically examined in light of a suite of case studies that span the Pleistocene to current times. Particular attention is paid to the idea of the Anthropocene¿that humans have entered an epoch in which climate change is driven by humanly produced atmospheric conditions. We also examine critically the concepts of resilience and sustainability in terms of the future of human society. Students gain familiarity with evaluating archaeological, historical, and environmental information that is pertinent to understanding change. The aim of the seminar is to foster critical thinking and the ability to evaluate narratives (in both scholarly and popular media) about societal crises and human resilience.

TITLE: Breakfast Club

GEN EDS: SS, GL

DESCRIPTION:
From donuts to dim sum, what starts your day off right? Grabbing those simple meal bars on the way to class? A hearty bowl of oatmeal? Skipping breakfast altogether? Your answer to this question it is not only determined by your individual preferences, but also shaped by culture, economics, gender, environment, and marketing. In this course, we will explore breakfast around the world from hot fishcakes to cornflakes applying an anthropological lens to understand the human experience of producing, selling, preparing, and eating breakfast foods and drinks. This discussion-based seminar will read research

and popular publications of nonfiction and fiction, one ethnographic book, view films and documentaries, and observe people breakfasting in everyday life.

Class Equivalents: ANTH 290/290H

When the world went into lockdown in spring 2020 and Americans were just beginning to grapple with the sacrifices and losses still ahead in the global fight to ¿flatten the curve,¿ the Covid-19 pandemic was dubbed ¿the great equalizer¿ by politicians and the media alike. This disease would transcend age, nationality, race, wealth, and fame¿we were told¿as every human on the planet was equally vulnerable. However, as the days stretched into weeks and then months wore on, we learned that not everyone faced the same risk of infection, hospitalization, or death. Instead, we witnessed how longstanding social and economic inequalities set the stage for dramatically different pandemic experiences and outcomes. Centering cultural anthropology¿s fundamental analytical frames of globalization, power, and inequality, over this semester we will explore how race, class, gender, sexuality, and nationality have dramatically shaped communities¿ lived realities in relation to the coronavirus.

ANTH 294 002 11346 ANTH PERSP ON SOC & CULTURE Lecture 3 A
(In Person On Campus Learners)

This course offers an opportunity for students to learn about the methodologies of ethnographic research and put these into practice through a semester-long field research project in the Triangle. Though this project, we explore the theoretical, ethical, and practical promises and challenges of ethnography, from problem definition, research design, and entering the field to data analysis, validity, and ¿writing up.¿ Along the way we will focus on the collection and analysis of ethnographic data using participant observation, fieldnotes, interviewing, life histories, visual methods, focus groups, archival and ethnographic survey research, and various strategies for organizing and coding data.

Concern over the relationship between population and environment abounds, but the most salient research and discussion in environmental studies has focused on one aspect of the relationship --human impact on the environment. In this seminar, we will be concerned with the other side of the relationship as well -- how environmental characteristics (certainly the physical and biotic environments, but also the social/economic/political environments as they interact with the above) affect population characteristics and dynamics. These two "directional arrows" (population ¿ environment, and environment ¿ population) are of course ultimately inseparable. We will examine not only how environmental characteristics affect human population dynamics (reproduction, family formation, movement, survival), but also with how responses to those environmental characteristics -- through mitigation or coping -- in turn affect the environment (biodiversity, land use and degradation, changes in infectious diseases, and more). That is, we will whenever possible take a systems view. A special emphasis will be on the biological and behavioral consequences of environmental fluctuations and unpredictability.

Design thinking is a popular buzz term in this age of Kickstarter, instant turnaround, and short time-to-market. But what is design thinking really all about? In many ways, it is a process that most of us were quite familiar with in our preschool years. Observe an opportunity. Take an action. Assess the results. Laugh at the failures. Repeat. Design is not just for artists and engineers - we are all designers!

But how do we get back to that pure form of design thought? In this class we will explore design through active making, discussion, presentation, and self-evaluation. Starting with the most basic of materials, we will exercise our latent creativity muscles and exorcise the constrained thinking and other obstacles engrained in us by "traditional" education. In this class, "failure" is an important concept that will be embraced and even celebrated. Science, entrepreneurship, and life itself is a process of try and try again. We must accept and learn from failure in order for "try" to become "do" and for "do" to

Attributes: E4- Field Work

Do you have an entrepreneurial idea and you would like to make a prototype to turn your idea into reality? Or do you want to experience the design and

making process? In this class, you will go through this process for a semester-long project. The final outcome will be a prototype that meets an entrepreneurial need.

The pre-requisite is APPL110 or permission from the instructor for those who have significant experience in the BeAM Makerspace of something equivalent. Orientation in the BeAM Makerspace is required. Students from any major are welcome to take this class.

You do not need to have an entrepreneurial idea before taking this class. You will work in groups to identify entrepreneurial ideas, which could emerge from discussions with people in the UNC community, local community, or around the country. From these ideas, you will choose a topic for your semester project, and then start working with your group on different designs, getting feedback throughout the process. By the end of the semester, you will fabricate a

This course introduces the principles of nanophotonics - an emerging frontier at the nexus of nanotechnology and photonics that deals with light-matter interactions at the nanometer scale. The course will cover the theoretical foundations of nanoscale optical interactions, fabrication and characterization of optical nanomaterials, plasmonics, optical trapping and manipulation, electrodynamic simulations, and applications of nanophotonics.

Topic: Technology, Art, Politics

This seminar-style course will critically examine the relationships between technology and art in modern culture, with particular emphasis on the implicit and explicit politics of such relationships. We will explore histories of art, aesthetics, scientific thinking, and mechanical production as ongoing struggles over notions of social progress and emancipation, alienation and domination. We will think through the realities and myths of technological devices as tools by which people extend themselves out into the world, connecting, (re)producing, and engaging with sensual, intellectual, and material apparatuses. This course will focus on the aesthetic politics of technology¿the possibilities and limits of critically engaging in the making and distribution of images and objects, information and knowledge, and the challenges posed by and to artistic production.

ARTH 957 Spring 2022
Moving Objects: Art and Agency Across Cultures

This seminar will explore the art historical fortunes of objects that move across the borders of cultures in contexts of colonial conquest, as well as the postcolonial reckonings some of these objects have inspired. We will investigate these objects¿ functions in colonial histories and in the aftermaths of these histories. Using case studies that span the nineteenth century to the present, set both in colonies and in metropoles, we will focus on how designation as art¿a category these objects have alternately been assigned to and excluded from¿has both reflected and shaped these colonial and postcolonial histories. This course will investigate the use of objects from colonized cultures to legitimize colonial expansion, standing in as simulacra used to invent cultures rather than to represent them. It will also address instances of objects and images as tools for resistance to this expansion.

Spring 2022 Seminar Topic: German and Netherlandish Renaissance Art (c. 1475-c. 1550)

This class introduces to one of the crucial periods of German and Netherlandish art respectively shortly before and after the Reformation: During the opening decades of the sixteenth century, northern Europe experienced an artistic florescence. In Germany this period is often dubbed the Age of Dürer, an appellation that obscures the remarkable inventiveness and productivity of his peers. Artists such as Albrecht Altdorfer, Hans Baldung Grien, Hans Burgkmair, Lucas Cranach the Elder, Peter Flötner, Matthias Grünewald, Hans Holbein the Younger, Tilman Riemenschneider, Veit Stoss and the Vischer family among a host of others, comprised one of the deepest pools of talent of any era. At the same time, a new generation of Netherlandisch artist, active especially in Antwerp, Brussels, Haarlem, Leiden and Utrecht, brought renewed vigour to an artistic tradition still steeped in the heritage of Van Eyck and Van der Weyden. Buoyed by eager patrons and a rapidly expanding marketplace, at least into the late 1520s, artists proved increasingly self-conscious and stylistically aware.

This course investigates mural painting and state patronage in post-Revolutionary Mexico, from about 1921 to about 1945, a period during which artists engaged politics in monumental public works. The course will focus on the murals of José Clemente Orozco, Diego Rivera, and David Alfaro Siqueiros, known in Mexico as ¿los tres grandes,¿ ¿the three great ones,¿ as well as, more broadly, on the relationship between art and politics.

ARTS 105H.001 | Basic Photography
TR, 2:00 pm - 4:45 pm. Instructor(s): Joy Drury Cox. Enrollment = 15.
In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of

image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium¿s rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

DESCRIPTION:
¿You are what you eat,¿ but equally important is how you eat it and how you write about food and eating. The rich tradition of Chinese food and the even richer tradition of writing about food offer great food for thought. This course explores the major themes and topics related to food and the food culture of China as well as Chinese food in North America. Readings include two non-fiction books by Chinese American authors, namely, The Fortune Cookie Chronicles: Adventures in the World of Chinese Food by Jennifer Lee and Serve the People: A Stir-Fried Journey Through China by Jen Lin-Liu, as well as select fictional works by such Chinese authors as Wang Meng and Mo Yan. This course is reading-intensive. It is not a cooking class.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to

DESCRIPTION:
In this course, we will explore the various ways that wars and conflicts, particularly Iran-Iraq, U.S.-Iraq, and U.S.-Afghanistan wars, have been portrayed in literature, film, and photography. We will attempt to deepen and enrich our understanding of war experienced by both veterans and civilians of each country. We will examine the impact of war on the human psyche in regards to violence. We will read books by American war veterans and Middle East authors contemplating the wars and their consequences. We will look at each writer¿s perspective on war and their interpretation of it comparatively. All readings will be in English. The class will be conducted in the form of a combination of lectures, discussion, and experimentations.

This course is designed for Equity in Teaching. During this course we will be implementing an innovative and interactive learning method¿Collaborative Online International Learning, or COIL. During this course we will engage in class discussions and lectures and a final presentation assignment with Dr. Amir Hossein Vafa and students from the Shiraz University in Iran for approximately five class session (asynchronous and synchronous options available).

DESCRIPTION:
What does Asia represent to Iberian Christian writers of Jewish descent in the sixteenth and seventeenth centuries? How do Iberian conversos represent their identities through their writings on Asia? How do the depictions of different Asian people come into play in these authors¿ notion of personal identities and nationhood? This course examines how early modern Iberian authors of Jewish heritage imagined and represented Asia in their writings, how their representation of the non-European world dialogues with contemporary events in the Iberian Peninsular, and the significance of their notions of Asians. Upon the successful completion of the course, students will full fill Gen Ed requirements (WB and LA) and gain a better understanding of Iberian converso culture in a transoceanic and multicultural frame, in addition to acquiring a good knowledge of early modern European notions of Asia.

Students may also register for this course under ROML 71.001.

DESCRIPTION:
This First Year Seminar introduces students to popular culture in the Arab world. It aims to move away from the mass-mediated view of the Arab world as the land of terrorists, oppressed women, or oil billionaires to highlight the region¿s dynamism, creativity, and complexity. We will investigate the production and consumption of popular culture in the region as an entry point for understanding aspects of the histories, cultures, and societies that form the Arab world. We will ask what can film, television, or music tell us about state power, inequality, national identities, gender, or political and social struggles? How is Arab popular culture integrated in global circuits of meaning and representations? And how can it be mobilized in times of revolutionary upheaval? The class will rely on anthropological readings alongside direct engagements with examples of popular culture from the Middle East.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These

DESCRIPTION:
A good life depends on access to adequate food and medical care. Advances in biotechnology have made possible both agriculture and medicine, and further advances may allow us to feed and keep healthy a burgeoning population in both developed and undeveloped countries. This seminar will examine the science behind a number of striking recent advances in biology, including animal cloning, genetic engineering of crop plants, development of new therapeutic drugs, development of embryonic stem cells, and deciphering of the complete human genome sequence. Students will debate how specific technological advances force us to confront new social and ethical choices, such as whether you want your own genome to be sequenced. We will also consider how new technologies are actually implemented, especially in regard to recent public health challenges such as Zika and SARS-CoV-2 viruses. The seminar should bring together the humanistic and technical impulses in students, and is open to students planning careers in scientific or humanities fields.

REGISTRATION PROCEDURES:

Reserve Capacity: 01-SEP-2021 RC CLAS UGRD FIRST YR STDTS **Reserve Enrl Cap:** 18 **Reserve Enrl Tot:** 13

This research-based lab introduces students to the process of science through collaboration on a research project, learning relevant techniques and scientific skills.
Topics include identification of soil bacteria and isolation of natural products they produce.
This lab can be taken in place of BIOL 101L and when taken with BIOL 101, counts as Communication Intensive credit. Counts as EE.

First Year Students ONLY.

(In Person On Campus Learners)

Bldg: Genome Sciences Bui **Room:** G200 **Days:** MWF **Time:** 10:10 - 11:00

INST 50 **Instructor:** Evans,Mara

INST 50 **Instructor:** VISION,TODD J

Class Enrl Cap: 200 **Class Enrl Tot:** 210 **Class Wait Cap:** 20 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR1

Attributes: PL- Physical and Life Science, QI- Quantitative Intensive
Class Equivalents: BIOL 201/201H

If you are not able to register on your own (for whatever reason = no pre-reqs, etc), plan to attend the first lecture in the spring. Add your name to the class signup sheet for students not registered that will be available in class the first day. We enroll as many students as possible that day, giving priority to transfer students and students that are approaching graduation.
Dr Evans and Dr Vision
This course requires a recitation in the 600-699 range.

BIOL 205H.001 | Cellular and Developmental Biology
TR, 11:00 am - 12:15 pm. Instructor(s): Bob Goldstein / Celia Shiau. Enrollment = 24.
BIOL 205H Cellular and Developmental Biology is an Honors course that covers the fundamentals of cell structure and activity in relation to special functions, metabolism, reproduction, embryogenesis, and post-embryonic development, with an introduction to the experimental analysis of cell physiology and development. The material that we present will mirror what is presented in non-honors sections, plus we will use some class periods for hands-on enrichment activities and discussions. These activities are designed to give you experiences related to the course topics, and to give you time to interact informally with the instructors and with each other.

PREREQUISITE: GRADE OF C- OR BETTER IN BIOL 202.

College of Arts & Sciences - Biology - Subject: BIOLOGY

Subject	Catalog Nbr	Section	Class Nbr	Course Title	Component	Units	Topics
BIOL	214H	001	13034	MATH OF EVOLUTION	Lecture (In Person On Campus Learners)	3	A

BIOL 214H.001 | Mathematics of Evolutionary Biology
TR, 9:30 am - 10:45 am. Instructor(s): Maria Servedio. Enrollment = 24.
This course teaches students how scientists use mathematics to approach questions in evolutionary biology and ecology. Students learn both biological and mathematical concepts, taught using an array of pedagogical approaches. There are two group projects over the course of the semester, one involving the development of an original mathematical model.

PREREQUISITES: BIOL 101 & MATH 231. PERMISSION OF INSTRUCTOR REQUIRED FOR STUDENTS LACKING THE PREREQUISITES.

Dr. Servedio's research centers on determining the evolutionary mechanisms that produce and maintain biodiversity. She is currently concentrating on the evolution of species-specific mate choice in animals, on the evolutionary effects of learning, and on the evolution of male mate choice. Dr. Servedio

BIOL 252H.001 | Fundamentals of Human Anatomy and Physiology
TR, 9:30 am - 10:45 am. Instructor(s): Corey Johnson. Enrollment = 30.
BIOL 252H. Fundamentals of Human Anatomy and Physiology
One biology course over 200 recommended. An introductory but comprehensive course emphasizing the relationship between form and function of the body's

organ systems.

NO FIRST YEAR STUDENTS.Requisites: Prerequisites, BIOL 101; corequisite, BIOL 252L.

Corey Johnson is a Teaching Professor and currently serves as Associate Chair of Biology, and is the academic advisor for a number of pre-health student

BIOL 255H.001 | Evolution of Extraordinary Adaptations
MW, 10:10 am - 11:00 am. Instructor(s): Christopher Willett. Enrollment = 24.
Of course you know that the Venus flytrap catches and digests insects, did you also know that it is native almost entirely to North Carolina? Extraordinary adaptations can be found in numerous other organisms as well. In class we will also look at the exceptional environmental stress tolerance of a tidepool copepod that Dr. Willett¿s lab has worked on in his laboratory. This copepod can survive freezing, high salinities, low pH, and anoxic conditions and shows different patterns of adaptation to these stressors across populations.

This class will conduct publishable research in evolution and ecology by doing actual science on the Venus flytrap and tidepool copepod. We will attempt to answer unknown questions about adaptations in these systems by using techniques such as high-speed video analysis, environmental manipulation, and potentially genetic analysis. Through this course students will be totally immersed in how research is done. Students will be taught how to generate

Cellular Agriculture takes nature's most elemental building blocks - cells - and cultivates them to become true animal products without the need to raise and slaughter animals. Join UNC's first student-developed, cellular agriculture focused course to learn the foundational biological and chemical processes used to produce cultivated meat. Lectures will cover state-of-the-art techniques for cultivated meat production and will allow you to think critically about the future of food. Weekly guest speakers will expose students to innovative startups and academic researchers establishing a new paradigm for manufacturing sustainable commodity meat products.

BIOL 395 001 2553 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 395 003 4883 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 395 092 2914 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 395H 001 2559 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward fulfillment of major requirements; six credit hours may be counted as one lecture course with laboratory toward fulfillment of major requirements.
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

BIOL 426H 001 11276 BIOL BLOOD DISEASES Lecture 3 A
(In Person On Campus Learners)

BIOL 426H.001 | Biology of Blood Diseases
TR, 9:30 am - 10: 45 am. Instructor(s): Frank Church. Enrollment = 18.
This course is based in human biology and focused on the molecular mechanisms associated with normal host defense processes and diseases of blood, bone marrow, and lymphoreticular tissue. We will discuss and involve ourselves in diseases such as cancer (e.g., leukemia and lymphoma), anemia (e.g., sickle cell disease and thalassemia), blood coagulation disorders (e.g., hemophilia and thrombosis), and the pathophysiology of HIV Disease/AIDS. Hopefully, during the semester you will learn something new about science, about life, about life in science, and about science in life.

Besides the traditional lecture format, engaged-learning will be used in a small-group format: ¿Flipped-lecture¿ videos; Basic-science Workshops; Clinical Case Studies; Role Play and H & P (History and Physical) Report; Medical Jeopardy; Ethical dilemmas; and Student-generated `thought-notecards¿. The course grade will be obtained by in-class exams, clinical exercises, thought-filled responses, contribution to a blog, and individual- and small group- grades will

BIOL	436H	001	10660	PLANT GENE DEV AND BIOTECH	Lecture (In Person On Campus Learners)	3		A

BIOL 436H.001 | Plant Genetics, Development, and Biotechnology
TR, 11:00 am - 12:15 pm . Instructor(s): Jason Reed. Enrollment = 35.
Recent advances in plant molecular biology, genetics, development, and biotechnology, and their potential relevance to agriculture. The course will include lectures, reading and discussions of papers from the primary literature, and student presentations.
Prerequisites: Biology 271 or Biology 202 or permission of the instructor.

The course will focus on several themes that will illustrate methodological approaches and intellectual questions in plant biology. These themes may differ in different years. Each theme will be covered over several class periods (2-3 weeks). We will intersperse lectures and more focused class discussions centered on papers from the primary scientific literature reporting research findings. Students will:
i) learn about current methodologies and questions of scientific interest in plant molecular biology;

(In Person On Campus Learners)

Reproduction, or passing on one's genes, is both the most ancient feature of life on earth and the continued focus of cutting-edge medical technology. This course examines our biological imperative and cultural quest to make babies. The syllabus leverages Biology's interdisciplinary scope, integrating bioethics, reproductive law and medicine, medical history, genetic engineering, disability studies, and philosophy as we examine the biological particulars of creating life. A mixture of teaching methods will be employed, including traditional lectures, in-class discussions, group work, peer-to-peer teaching, and flipped-classroom online learning.

Bldg: Genome Sciences Bui **Room:** 1378 **Days:** TuTh **Time:** 09:30 - 10:45 Good Genes

BIOL 495 079 5448 UNDERGRAD BIOLOGY RESEARCH Lecture (In Person On Campus Learners) 1 - 3 A

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Pre req = BIOL 202 or 202H
We are currently in the midst of a revolution in biology and medicine that centers on the ability to alter and probe transcriptomes and genomes at will using new molecular genome editing techniques. Editing of genomes has been a major goal of science and several technologies have been developed to approach this. This field was revolutionized by the demonstration that the bacterial enzyme Cas9 could be used to modify genomes. Since then there has been a flood of variations and new applications using CRISPR/Cas9 to probe fundamental biological processes. This revolution has spread across all model systems and has even has begun to change the definition of what a model system is. In addition, these technologies are changing the way we treat disease, alter agriculturally important species, influence populations of organisms in our environment, and even, possibly, ourselves. This goal of this course is to familiarize students with the theory, origins, and practice of genome engineering technologies and their diverse applications in medicine and industry. In addition, we will consider the challenges and impacts to society and the ethical choices these technologies create.

CHEM 073H.001 | From Atomic Bombs to Cancer Treatments: The Broad Scope of Nuclear Chemistry
MW, 1:25 pm - 2:40 pm. Instructor(s): Todd Austell. Enrollment = 24.
Nuclear chemistry is a broad field which we all are affected by almost daily in some way, shape or form. In this course we¿ll explore many aspects of nuclear chemistry in an attempt to better understand the historical development, the present technology and the future of the field. A general chemistry background in atomic history and theory will first be provided, followed by a survey of the applications and research topics of nuclear chemistry today. Many topics discussed in the course are surrounded by controversy. In each of these cases, student will research and discuss the various sides of each argument to better understand the topics.

NOTE: STUDENTS IN THIS COURSE MUST NOT HAVE ANY OTHER CLASSES SCHEDULED BETWEEN 2:40 PM AND 5:00 PM ON MONDAYS & WEDNESDAYS.

CHEM 241H.001 | Modern Analytical Methods for Separation and Characterization
TR, 12:30 pm - 1:45 pm. Instructor(s): Matthew Lockett. Enrollment = 20.
Analytical separations, chromatographic methods, spectrophotometry, acid-base equilibria and titrations, bioanalysis, immunoassays.

Qualitative and quantitative chemical measurements are essential to understand the chemical and physical changes happening around us. This course will focus on the fundamental of modern analytical methods as applied to medical diagnostics and point-of-use immunoassays. In particular, we will discuss the importance of (1) sample preparation, analytical separations, and chromatography prior to analyses, (2) the use of spectrophotometry and electrochemistry to quantify the component interest in a mixture, and (3) the experimental design considerations to determine the ability to quantify that component of interest correctly.

GR1

CHEM 241H.002 | Modern Analytical Methods for Separation and Characterization
TR, 3:30 pm - 4:45 pm. Instructor(s): Matthew Lockett. Enrollment = 24.
My laboratory focuses on generating analytical model systems to study the complex phenomena happening (1) at the interfaces essential for solar cells and photocatalysts and (2) at the biochemical or pathway level when tissues are exposed to extreme microenvironments or drugs. Model systems provide exquisite experimental control, allowing us to tease apart the effects of individual variables (e.g., how does the distance between a catalyst and a solid surface change its activity or how does a lack of oxygen in breast tumors promote drug resistance). We utilize several quantitative chemical measurements to assess the effects of these individual variables and develop new methods and tools to make these measurements. These techniques include electrochemistry, fluorescence microscopy, spectrophotometry, surface analysis techniques, molecular biology readouts such as Western blots, qPCR, and flow cytometry.

CHEM 261H.001 | Honors Organic Chemistry I
TR, 2:00 pm - 3:15 pm. Instructor(s): Todd Austell. Enrollment = 20.
Molecular structure of organic compounds, and the correlation between structure and reactivity including the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion, problem-solving, and the investigation of organic chemistry research at UNC.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.
PERMISSION OF INSTRUCTOR REQUIRED. EMAIL chemus@unc.edu.

NOTE: Honors Carolina students register online when their registration appointment begins. Wait listing begins December 14. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist. Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between December 14 and January 13.

CHEM 430H.001 | Introduction to Biological Chemistry
TR, 11:00 am - 12:15 pm. Instructor(s): Brian Hogan. Enrollment = 30.
Dynamic examination of the principles of biochemistry, from macromolecules through enzyme function and catalysis, and into the primary metabolic pathways that generate cellular energy. This course will be an interactive combination of lecture, group based guided inquiry along with presentations from students and deeper dives into topics of mutual interest to course participants. The goal of the course is to provide a detailed foundation in biochemistry and to teach critical thinking skills focused on understanding and challenging primary biochemical data. Students who enroll in this course are typically heading to graduate or professional school in this area of study, or will use the principles employed to enhance their problem-solving abilities.
Chemistry 430H is designed for chemistry majors and is not cross-listed with biol 430. Hence, Chemistry majors in the honors program will have priority.
Seats will open as follows: Chemistry majors in honors with senior status,
Chemistry majors in honors with junior status, Chemistry majors BS-Biochem, Chemistry majors BA. Any additional seats (and there usually are very limited

TR, 9:30 am - 10:45 am. Instructor(s): Simon Meek. Enrollment = 5.
Concurrent to CHEM 460 with increased emphasis on primary literature.

PREREQUISITE: CHEM 262 OR 262H.
TO REGISTER FOR CHEM 460H, YOU MUST BE REGISTERED FOR CHEM 460 FIRST. ONCE YOU ARE REGISTERED FOR CHEM 460, PLEASE EMAIL chemus@unc.edu REGARDING YOUR INTEREST IN REGISTERING FOR CHEM 460H.

Simon Meek is Associate Professor of Chemistry. Researchers in Dr. Meek's group are involved with the discovery, design, and development of new chiral catalysts and catalytic methods for chemical synthesis. They focus on developing practical and effective catalysts that enable the use of simple and

Attributes: VP- Visual or Performing Arts, BN- Beyond the North Atlantic, WB- The World Before 1750
Class Equivalents: CLAR 50/50H

DESCRIPTION:
The course is a comparative study of the archaeology of Ancient Egypt and the Bronze Age Aegean, ca. 3000-1100 B.C., exploring the public art produced by two Mediterranean state-level societies: the Aegean Bronze Age palace centers of Crete and Mainland Greece (Minoans and Mycenaeans); the territorial state and empire of ancient Egypt. These interrelated cultures produced very different forms of public art and architecture reflecting unique cultural developments, and forms of urbanization. We examine the form, style, context, and media of production, consumption and display of art in the public sphere, exploring the definition of art; art as material culture; and art as an expression of social values and projection of dominant sociopolitical ideologies. While these ancient civilizations on opposite sides of the Mediterranean were in contact with each other, borrowing or sharing certain cultural traits, they ultimately produced very different forms of complex society. The goal of the course is to compare and contrast the method, media, and subject matter of public art toward a contextual and archaeological understanding of these differences and similarities, and ultimately the cultures that formed them.

CLAS 051H.001 | Greek Drama on Page & Stage
MW, 4:40 pm - 5:55 pm. Instructor(s): Alexander Duncan. Enrollment = 24.

Taking a participatory approach to ancient Greek drama, this course pairs readings from three Athenian playwrights (Aeschylus, Euripides, and Aristophanes) with performance-oriented activities and scholarship.

At its most traditional, this course surveys the historical and cultural context of the so-called ¿classical¿ Athens of the fifth-century BCE, emphasizing the political, religious, and aesthetic forces that gave rise to humankind¿s first recorded theater. More innovatively, this course probes the dual nature of theater, its distinct but intertwined existences as codified script and socially-embedded performance, through sustained investigations of some of its most influential texts and their modern reception in a global context with case studies focused on post-Apartheid South African and 21st-century Chicanx

CLAS 241H.001 | Women in Ancient Rome
TR, 12:30 pm - 1:45 pm; Recitation: W, 3:35 pm - 4:25 pm. Instructor(s): Sharon James. Enrollment = 12.
In this class, we will learn about the life of women in ancient Rome, beginning with this question: what do we mean when we say women in ancient Rome? We will focus on the treatment, both legal and social, of Roman women, by examining the visual depictions of women and women's lives as well as the literary evidence. We will cover about 800 years of history in this course.

CROSSLISTED WTIH WGST 241H

Professor James specializes in Roman comedy, Latin poetry, and women in ancient Greece and Rome. She has published many articles on these subjects, as well as a book on Roman love elegy (published in 2003); she is currently preparing a large-scale book on women in Greek and Roman New Comedy (the plays of

CLAS 263H.001 | Athletics in the Greek and Roman World
MWF, 2:30 pm - 3:20 pm; Recitation: F, 12:20 pm - 1:20 pm. Instructor(s): Alexander Duncan. Enrollment = 24.
To talk about sport is to talk about society, both today and in antiquity. This course will inspect the cultures of ancient Greece and Rome, from the age of Homer to the end of the (Western) Roman Empire, through the lens of athletics. We will scrutinize the mechanics and logistics of ancient athletic events and take up larger questions of interpretation, considering sport within its religious, cultural, and political contexts. Adopting and adapting an extensive battery of theoretical approaches¿economic, anthropological, poetic, political, sociological, etc.¿we will address such questions as the following: How do the ideals embodied in Greek and Roman sport relate to the myths and cultural practices of these societies? How were competitors, whether amateur or professional, rewarded and regarded by their societies? What ethical dilemmas did athletes face? Why were animals, slaves, and religious minorities subjected to blood-sport in Roman amphitheaters? Why did others volunteer to face the same fate? What legacies and lessons have ancient athletics left for the modern world?

TITLE: Communication, Culture, and Social Justice

GEN EDS: CI, US

DESCRIPTION:
This course introduces students to several primary areas of focus for social justice-oriented scholarship and activism. These areas include racial justice, labor and economic justice, gender and sexual justice, and environmental justice. The course will also introduce students to ways that these issues are studied in the Department of Communication at UNC, by paying particular attention to popular culture and public engagement as sites of struggles for social justice.

COMM 120H.001 | Introduction to Interpersonal and Organizational Communication
TR, 2:00 pm - 3:15 pm. Instructor(s): Katie Striley. Enrollment = 22.
Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.

Course Topic: Screenwriting The Re-Write

This course is designed to take the completed feature screenplay written in COMM 537 and prepare the re-written final draft for production companies and agencies. It will begin with a complete structural review, character analysis, and dialog polish. A logline, synopsis and one sheet shall be developed. Critical analysis will be given, received, and addressed, resulting in a final screenplay package that is prepared to be submitted to professionals.

Detailed course description (at least 1-2 paragraphs, 1 page max):
A coverage sheet was provided to you for your final at the conclusion of COMM 537. You will make use these notes and prepare a substantive plan on how to address the notes and integrate them into your screenplay using re-writing techniques. At the beginning of the semester students will be required to write a logline and synopsis. Students will also be asked to create a one-sheet.

WRITING THE FULL LENGTH PLAY
Course Topic: Writing the Full Length Play

This course expands upon the students basic knowledge of character, plot, dialogue, and structure. The importance of editing and revision are explored in great detail. Students will write a full length, polished script and receive instruction on submitting work to theaters. The prerequisites for this course are COMM 131, DRAM 231, or ENG 130 or 132. Students who do not have these requirements can contact the instructor for approval to take the course.

Howard Craft is creator of the first dramatic African American Super Hero Podcast and The Jade City Chronicles which is currently in development with a release date set for the spring of 2017. Craft is also the creator of audio drama, The Jade City Pharaoh and is the Department of Communication Piller Visiting Professor of Practice.

The course is designed as an interactive examination and discussion of the techniques, processes and phenomena by which electronic news delivery in the United States began with early radio transmissions and developed into our current infinitely broad landscape of personal and professional storytelling. Students will share in the process of reading books and articles, viewing and hearing tape artifacts, cataloguing and interpreting the dynamics of this evolution, all under the guiding stimulus of an instructor with forty five years of experience in high profile roles in network television sports, news and entertainment.

There will be reading assignments which translate into oral presentations, and two examinations in short essay form, a mid term and a final. But most critically there will be energetic and cooperative discussion and interchange in an atmosphere informed both by more than a hundred years of history and by the rapid ongoing day to day curve of media changes. A critical part of the curriculum will proceed from the reaction of students to what is happening in real time via the electronic devices they all hold in their hands and watch at home. Every class session will be partially aimed at placing today¿s events

Environmental Advocacy
This seminar introduces students to the foundations of environmental communication and environmental advocacy from both a theoretical and practical

perspective. We¿ll learn about the history of environmental thinking and activism, explore the social construction of nature through discourse and the media, as well as gain an understanding of the role of environmental sciences in public discourse, law, and politics.

Careers In The Arts: Performance, Programming, Curation taught by Amanda Graham, Associate Director, Carolina Performing Arts.

***This course is being offered in Spring 2022 as an APPLES Service-Learning course. ***

A career in the Arts.
This phrase is intimidating for students and parents alike. Many considering working in this sector worry about fiscal stability and institutional sustainability. These concerns notwithstanding, the arts are an enriching and viable path with a variety of options for graduates . This course will introduce students through the stories of local and national arts leaders, performers, programmers and curators among others who make them tick. The class will feature guests (virtually) and show films.

This course is for COMM majors only. Permission of the instructor required for non-COMM majors.

Detailed course description:
The purpose of Hate Speech is to expose students to the nature of hate in American life. As we attempt to understand the essential qualities of hate we will learn that hate is made possible through communication (sometimes in the form of hate speech) and human perception (sometimes in the forms of stereotypes and bias). We will learn that hatred is sustained through the imposition of racist, sexist, and heterosexist ideologies that privilege Whiteness, maleness, and heterosexuality. Sometimes these ideologies are explicitly understood by the people who use them. Sometimes these ideologies and the assumptions underlying them are only implicitly understood and we may be relatively unaware of their influence.

We will also learn that hate may also be resisted through communication. Students will learn how communication may serve to teach respect and tolerance,

Class meetings may also be held in the following alternative locations: Swain Hall 106A and Swain Hall 200A.

Detailed course description:
This course is designed to provide a structured environment, instructor and peer feedback, along with production & postproduction resources in which to complete an advanced near-to-graduation media project. The project can be in narrative, documentary, experimental, or interactive, with a running time for videos of no longer than 20 minutes. The course assumes the student has already taken a fair number of the post-COMM 230 production courses offered in the department.
Seniors only.
This course has classification (class year) restrictions.
Permission of instructor for nonmajors.
A capstone course for seniors who are on the COMM Media Production track, and who have completed significant preparatory coursework. COMM 230 and at least one 500-600 level production course are required. Interested students must apply in the Fall with a project to be considered for enrollment. Students in the course will complete an advanced media project in narrative, documentary, experimental, multi-media or audio.

This course is for Seniors only.

GR3

This course focuses on the practice¿the doing of¿scholarly criticism. Although it is labeled a rhetoric course, it should be valuable for anyone doing critical research and scholarship. Critical research and writing compose an extraordinarily complex academic genre that brings together three or more modes of research and writing. At the very least, criticism incorporates theory, socio-politico-historical contexts, and critical ¿targets¿ (e.g., discourses, objects, practices, events). The arguments that compose criticism are typically "thick" with evidence as well as with theoretical and historiographical warrants. The ¿right¿ balance of those elements is partly a matter of critical norms that change over time, but it is even more heavily dependent upon the particular project and the questions posed by it. In the course, you will analyze the constructions of critical arguments, work through your own critical target by bringing it into contact with various mid-range and larger-scale theoretical concepts, and bring a final critical project to fruition. The latter should be of a quality that would make at least a good conference submission,

rse Description:
CROSS-LISTED GEO 804 WITH DANIELLE PURIFOY

* This course is a core course for the Graduate Certificate in Participatory Research.

* This class seeks to explore the fundamental connection between critical social theory and qualitative

research through readings, discussion, and workshop techniques. The class is divided into three

sections:

COMM 850 001 12668 SEM IN MEDIA STUDY Lecture 3 A

Course topic: Buff and Polish

The objective of this seminar/practicum is to provide students with an orientation to the process of finding employment in an academic setting, and to provide students with opportunities to develop the materials necessary to assist in that effort. While the focus is primarily on entry-level academic positions, such as Assistant Professor, materials developed as part of the course are applicable to applying for post-doctoral fellowships, "ABD" positions, and work in other settings (eg. governmental) requiring a Ph.D.

COMP 283H.001 | Discrete Structures
TR, 2:00 pm - 3:15 pm. Instructor(s): Jack Snoeyink. Enrollment = 24.
Underlying the many applications of computers in our daily life are discrete structures like Boolean logics, relations, finite state machines, graphs, and networks that have mathematical specifications. You can tell your parents that the primary purpose of this class is to introduce these discrete structures and the formal proof techniques that support the production, verification, and maintenance of correct software. In fact, many of these are familiar from puzzles and games: already in 1990 Super Mario World expects kids to immediately understand a finite state machine diagram¿
This is a language class: you will learn vocabulary and idioms of a language that is more precise and less ambiguous than the languages that we usually speak or write. With any new language, you may at first struggle to make yourself understood, but by frequent immersion and fearless practice you can become comfortable thinking and expressing yourself creatively in the language. Students pick up languages at different rates, so work to teach each other. All can gain fluency with effort and a willingness to make mistakes. And fluency will help all your computer science endeavors ¿ precise and unambiguous

COMP 380H.001 | Introduction to Digital Culture
TR, 2:00 pm - 3:15 pm. Instructor(s): Tessa Joseph-Nicholas. Enrollment = 24.
This course examines the nature, function, and effects of the Internet and Internet use in the context of an extended study of its history, considering key technologies, concepts, ideas, innovators, and historical and sociocultural influences. Significant reading, writing, research, and beginner-friendly, code-light web development and data science components. No previous programming or technical experience is required. This course is suitable for both CS majors and nonmajors.

Tessa Joseph-Nicholas, MFA/PhD, is a Teaching Associate Professor in the Department of Computer Science. Her teaching and research explore the intersection of computing technologies and human culture with a blend of approaches and methods from the computational to the creative. Specific interests include Internet histories, cultures, and communities; digital literatures, arts, and poetics; inclusive, accessible web design and development; net neutrality and

18-NOV-2021 RC CLAS UG FFYS STDTS 0 19

DESCRIPTION:
This seminar will explore the artists, art and technology involved in creating the world of the play. It is intended as an overview for students who want to learn about theatrical design. Students will create their own designs in the areas of scenery, costumes, and lighting for three plays throughout the semester. The plays will be placed outside of their traditional setting while still maintaining the story and themes. Students have placed Shakespeare¿s A Midsummer Night¿s Dream in a trailer park and a daycare center for example. Careful historical research, close reading and analysis, text and source material, and collaboration will be the focus of the student projects.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to

Program: Honors Semester in London
Title: Contemporary London Theatre and its Origins
Dates: January 22 - April 30, 2022

These classes will demystify the theatre and allow it to be fun and accessible. We will consider theatre as a craft rather than an art form. We will look at the practicalities of putting on a show: the choice of play, the venue, the director, the stage design, lighting, sound, the cast and marketing etc. Let us explore all the choices and decision making that goes into theatre production. We will apply these practicalities to aspects of our course work.

Let¿s discover, for ourselves, why certain plays and playwrights endure. For example: Why are Shakespeare, Brecht and Pinter held in such high esteem? We will take classic, legendary and seminal plays off their historic pedestal, discover them for ourselves, deconstruct them and make them our own. Let us also

In this Voice and Acting Class, the students will take a journey on getting to know, enjoy, and relish in their authentic voice. Through awareness and practice of the continuous breath, the student will development new habits of experiencing their breath, voice, body and how they live in this world. After the ground work has been laid, the students will integrate their voice into acting. The class will consist of work on poetry, contemporary acting scenes, Shakespeare monologues and Shakespeare scenes.

Attributes: Collaborative Online International Learning - COIL, E8 - Connections - Experiential Education, COIL
Class Equivalents: DRAM 284/284H

We will explore how theatre-makers can adapt to, interrogate and overcome the limitations caused by the COVID19 pandemic. We will explore theatrical

performances from Galway, Belfast and North Carolina, hearing from professional artists who are making work in new ways, and thinking creatively about how theatre can recover and thrive in a post-pandemic world. We will also discuss relevant case studies from theatre history, showing how creative artists have responded in the past when faced with similar environmental and/or public health-related crises. And we will work together collaboratively to create new performances, using online tools to do so. One of the course's key features is its emphasis on international learning: we will seek to share our different experiences, to learn from each other, and to form exciting new links that will point ways forward for us, allowing us to think together about a post-pandemic theatre industry that is resilient, inclusive, and sustainable.

Please contact Adam Versényi at anversen@email.unc.edu for details.

Non-Honors students will be eligible to enroll beginning November 19 during open enrollment.
CMPL 489H.001 | Empire and Diplomacy
TR, 2:00 pm - 3:15 pm. Instructor(s): Ted Leinbaugh. Enrollment = 10.
This course surveys foundational texts of Western literature and focuses on the theme of imperium. The course attempts to define the concept of imperium in epic literature (see, for example, Philip Hardie, Virgil's Aeneid: Cosmos and Imperium and David Quint, Epic and Empire) by exploring themes and topics broadly related to power and empire, including war and peace, imperialism, heroism, colonialism, irredentism, nationalism, and the negotiation of power through rhetoric and diplomacy. The course seeks to understand how ancient texts impact, shape, and define our world today.
Distinguished scholars will join us during the semester to help introduce and explain texts that may be unfamiliar, and internationally recognized diplomats and global leaders will share their thoughts on the play of power on the world stage today. No course prerequisites are needed to enroll.

ENGL 071H.001 | Healers and Patients
MWF, 10:10 am - 11:00 am. Instructor(s): Kym Weed. Enrollment = 24.
When medical anthropologist Arthur Kleinman writes that ¿illness has meaning,¿ he reminds us that the human experience of being sick involves more than bodily symptoms. Moreover, the effects of illness and disability are rarely confined to one person. In this course, we will analyze a diverse collection of writers who have taken as their topic the human struggle to make sense of suffering and debility through a range of genres including fiction, non-fiction, graphic memoir, podcasts, and oral histories.
Divided into five units, the course will allow us to explore not just the medical, but also the personal, ethical, cultural, and political facets of illness from the perspectives of patients, healers, and families. Central texts will include /Ask Me About My Uterus/ by Abby Norman, /Black Man in a White Coat/ by Damon Tweedy, /Mom¿s Cancer/ by Brian Fies and /The Farewell/ directed by Lulu Wang. Additionally, students will utilize the growing archive of oral histories from the Stories to Save Lives project to learn more about the experiences of patients, healers, and families from across North Carolina.

TITLE: Catholic Literature: Scriptures, Saints, and Skeptics

GEN EDS: LA

DESCRIPTION:
In this FYS, you are invited to engage with a fascinating collection of ancient, medieval, and modern Catholic literature. We will consider several questions including: What is the ¿Catholic way¿ of reading the Bible as literature? Are there any tensions between literary production and Catholic belief? How does a ¿Catholic imagination¿ shape the way authors, in medieval and modern times, struggle with questions of meaning, purpose, and suffering? How can close textual readings develop our skills for literary analysis and critical thinking in classroom, personal, written, and inner discourse? This class is

not a religious seminar or inducement to any particular belief, Catholic or otherwise; rather, we will work together to critically understand the often

TITLE: Human Rights and Literature

GEN EDS: LA, GL

DESCRIPTION:
In this class we will investigate the history of human rights from the perspective of literature. We will explore how rights are represented and narrated in novels such as Mary Shelley¿s Frankenstein and how founding declarations¿famously, the Declaration of Independence (1776), the Declaration of the Rights of Man and Citizen (1789), and the Universal Declaration of Human Rights (1948)¿rely on fictional structures. While attending to some of the more politically contentious issues involved with human rights, such as the claim that universal rights lack political and legal enforcement, we will also consider the following questions: how does fiction help articulate and represent claims to human rights? Why might a political philosopher or legal scholar turn to a

TITLE: Apocalypse When?

GEN EDS: LA, NA

DESCRIPTION:
Plenty of us feel like we¿re living in the end times¿but why do some of us feel like they happened long ago, or that they¿re just around the corner? This course considers the representation of the apocalypse in Western literature and culture from two angles: first, as the product of a religious fascination with the end of time, and second, as a phenomenon whose significance depends upon whether it has occurred, will occur, or is occurring at this very moment. Students will read a selection of texts drawn both from the Bible and from parallel religious traditions (for instance, medieval visions of the apocalypse, or the Babylonian Epic of Gilgamesh) alongside novels and essays by writers attempting to think through the significance of the apocalypse as both a

.ENGL 089H.001 | American Poetry in Motion
TR, 11:00 am - 12:15 pm. Instructor(s): Eliza Richards. Enrollment = 24.
This course focuses on fascinating questions about poetry as a creative practice: what do poets say about the poems they write? What kinds of contributions do poems make to the world we live in? Are poems ¿useful¿? If so, what kinds of uses do they have? We will read poems, of course, but also poetic manifestoes and other writings by poets who want to share ideas about what poetry is and why writing poetry is important, meaningful, and relevant to everyday life. We will concentrate on specific case studies: the manuscripts and letter-poems of the reclusive writer Emily Dickinson; the notebooks, letters, and poems of Walt Whitman that he wrote while tending the wounded in the Civil War hospitals; the poems, manuscripts, and letters of George Moses Horton, who taught himself to read and write and published two books of poetry while enslaved in North Carolina; and the drafts, revisions, and animal drawings of twentieth-century modernist Marianne Moore. The course seeks to develop close reading skills that are crucial for interpreting poetry; to explore how social and cultural conditions both limit and enable poetic expression; and the ways poems have influenced and impacted social and political

This unique section of English 105 will explore composition and rhetoric in video games. We will explore forms of technical writing, cultural criticism, and sociological analysis across different types of games and mediums. Along the way, the class will generate questions of gamification, gameplay, and user design while contemplating our own writing and research practices.
Questions or concerns: email grantg@ad.unc.edu

Non-Honors students will be eligible to enroll beginning November 19 during open enrollment.
.ENGL 132H.001 | Honors: Intro to Fiction Writing
TR, 12:30 pm - 1:45 pm. Instructor(s): Karen Tucker. Enrollment = 15.
Writing and reading intensive. Early assignments focus on craft elements of short fiction, including structure, time, characterization, dialogue, setting, and point-of-view. Students will then write two 8-12 page stories to be workshopped in class. Thorough revision of both stories takes the place of a final exam. The course is informal but rigorous, and active participation is expected. No textbook required; assigned stories and craft essays will be supplied. This course (or ENGL 130) serves as a prerequisite for other courses in the fiction sequence of the creative writing program (ENGL 206, 406, 693H).

Non-Honors students will be eligible to enroll beginning November 19 during open enrollment.
.ENGL 133H.001 | Honors: Intro to Poetry Writing
TR, 12:30 pm - 1:45 pm. Instructor(s): Michael McFee. Enrollment = 15.
This course will explore the many pleasures and challenges of writing good poetry. Our focus will be the regular writing and revising of your original poems, and the in-class workshopping of some of these poems, but we will also spend much time reading and discussing exemplary poems from the past and present, learning poetic terms and forms and techniques, listening to poems read aloud, and doing whatever else might help you become a better poet. Among the course requirements: several textbooks, to be read and discussed thoroughly; a midterm exam and a final "term poem"; other written exercises; a memorization and recitation assignment; and (most important of all) your writing of up to ten original poems, and your ongoing revisions of those poems. This is a fun and informative class that will help you think and write more clearly, more exactly, and more imaginatively.

INTENDED FOR FIRST-YEAR HONORS CAROLINA STUDENTS, BUT OPEN TO OTHERS, BY PERMISSION OF THE INSTRUCTOR.

ENGL 190: Crossings, Experiments, Futures: Asian American Literature and Culture
This course approaches Asian American culture and literature through three themes. First, we will examine the intersections and crossings that form Asian America, analyzing inter-racial coalitions and conflicts, refugee, Indigenous. and queer Asianness. This forms the ground for our investigation into Asian American experimentalism. Race itself is an experiment, and avant-garde practices have shaped racialized communities that were ¿never meant to survive,¿ in Audre Lorde¿s words. Living under racist and heteronormative structures of domination, racialized artists have sought radical and experimental ways of being

and creating that deviate productively from Western norms. Finally, we will consider Asian American and Pacific Islander futures, through speculative fiction and science fiction film. Works considered may include Ocean Voung¿s poetry Night Sky with Exit Wounds, Ling Ma¿s novel Severance, Justin Chon¿s film Gook, Haunani-Kay Trask¿s Night Is a Sharkskin Drum, and Trinh T. Minh-ha¿s film Surname Viet, Given Name Nam.

21st Century Essay

Creative Nonfiction as a genre has exploded over the past decade because a variety of writers took risks with form, style, content, intent, and found new ways to communicate about modern life that differs greatly from fiction and poetry. The 21st Century Essay is unrestrained, mysterious, and explosive. Writers have challenged the traditional modes of nonfiction by working against the limitations of argumentative or strictly analytical structure with an eye toward our modern, discursive, fragmented, and elusive globalized world. Writers of the genre are of the most diverse and intersectional backgrounds in publishing. With a fearlessness that is revolutionary, they wrestle with culture, the self and memory, doubt, myth, history, technology, sex and identity. In this class we will read widely within essay as a genre¿a genre that is ingenious, strange, playful, timeless, and performed¿as well as write and consider our own work every week. The course will culminate in 2 large group workshops of long-form essays.

ENGL 268H.001 | Medicine, Literature, and Culture
TR, 2:00 pm - 3:15 pm; Recitation: F, 9:05 am - 9:55 am OR F, 10:10 am - 11:00 am. Instructor(s): Matthew Taylor. Enrollment = 40.
"How is solving a crime like diagnosing an illness? Why do descriptions of diseases follow narrative patterns? What¿s behind the rhetoric of ¿battling¿ disease, and why are social problems often characterized as ¿ills,¿ ¿plagues,¿ and ¿cancers¿? How have notions of ¿health¿ and ¿normality¿ resulted in such things as forced sterilization and genocide? What are the cultural meanings associated with ¿life¿ and ¿death¿? What do the stories we create¿about disability and disease, about who (and what) has the power to heal, about the fear of death and desire for transcendence¿tell us about our culture, our history, and the experience of being human?

This course will provide an introduction to Health Humanities, a new area of study that combines methods and topics from literary studies, medicine, cultural studies, and anthropology. We¿ll read novels, screen films and television episodes, learn about illnesses and treatments, and hear expert speakers

ENGL 283H.001 | Life Writing
TR, 5:00 pm - 6:15 pm. Instructor(s): Michael Gutierrez. Enrollment = 20.
In this course, we will begin by studying the genres and characteristics of life writing and its sibling creative nonfiction such as travel, nature, and ekphrastic writing. We will then narrow our focus to the basic components of nonfiction essays and memoirs before you begin researching for your auto-ethnographic essay. In the last unit, we will evaluate one piece by each student for your portfolio. Your essays should aim to entertain through emotional and intellectual engagement. You can also be funny, if you like.

Michael Keenan Gutierrez is the author of The Trench Angel (Leapfrog) and earned degrees from UCLA, the University of Massachusetts, and the University of New Hampshire. His work has been published in The Guardian, The Delmarva Review, The Collagist, Scarab, The Pisgah Review, Untoward, The Boiler, Pacifica, and Crossborder. His screenplay, The Granite State, was a finalist at the Austin Film Festival and he has received fellowships from The University of

Title: Life Writing
Dates: January 22 - April 30, 2022

There is currently a boom in non-fiction writing, as the lines between `real events¿ and the imagination are increasingly being questioned. The best writers are embracing and experimenting with the `essay¿ form, where fictional techniques such as narrative, pacing,

and dramatization combine with traditional non-fiction subjects such as memoir, philosophy, and journalistic reportage. In this course, you will study the works of a diverse range of writers, analysing the craft of non-fiction through careful close readings. The class will include regular professor-led workshops, in which you will present your own experiments with the technical elements from the reading seminars. Guest speakers will come from the UK¿s strongest non-fiction voices, and we will use London sites as inspiration for your work. Learn how to combine the personal with the political in your

ENGL 337H.001 | The Romantic Revolution in the Arts
T, 3:30 pm - 6:00 pm. Instructor(s): Joseph Viscomi. Enrollment = .
This interdisciplinary course examines the technical and aesthetic revolutions in the fine arts of the English Romantic Period. It will discuss productions, experiments, and aesthetic theories of William Wordsworth, S. T. Coleridge, J. M. W. Turner, and William Blake, focusing on the developments of lyrical poetry, landscape painting, and original printmaking. We will pay special attention to the period's new ideas about nature, the sublime, picturesque travel, genius, originality, and social role of the artist. There will be a studio workshop in drawing landscapes in pen and ink according to 18th-century techniques and formulae and a workshop in printing facsimile plates from Blake¿s Songs of Innocence and of Experience. Knowledge of printmaking and painting is not required.

Joseph Viscomi, the James G. Kenan Distinguished Professor of English Literature at the University of North Carolina at Chapel Hill, is a co-editor with

Program: Honors Semester in London
Title: Studies in the Modern British Novel
Dates: January 22 - April 30, 2022

We will read representative novels by British writers of the twentieth and twenty-first centuries, tracing the evolution of the form in the era of the waning of the British Empire and the emergence of post-imperial England. We¿ll investigate the enormous shifts in national identity which the slow decentralizing of England on the global stage has necessitated, and consider the country¿s cultural and political changes from just after World War I to the era of Brexit. The course begins with novels by Virginia Woolf and Joseph Conrad ¿ which focus upon London as a dominant hub and describe the contours of British modernity in the early twentieth century. We¿ll move on to novels by Angela Carter, Kazuo Ishiguro, and Ian McEwan, all of which reveal the highly complex, cosmopolitan society which the loosening of imperial bonds has brought about in the late twentieth and twenty-first centuries. We¿ll conclude with

TITLE: Social Equity and Entrepreneurship

GEN EDS: SS, US

DESCRIPTION:
Social Equity and Entrepreneurship will explore how topics like racial equity, economic inequality, and gender disparities influence themes in social entrepreneurship. The course will also encourage students to engage with their peers and with guest lecturers- entrepreneurs, investors, and executives- in order to craft a thoughtful approach to pursuing equity in their own academic and entrepreneurial journeys.

REGISTRATION PROCEDURES:

ECON	101	006	2121	ECON: INTRO	Lecture (In Person On Campus Learners)	4	A

ECON 101H.001 | Introduction to Economics
MWF, 12:20 pm - 1:10 pm. Instructor(s): . Enrollment = 24.

The objectives of the course are to introduce you to:
1) The way economists think about the world;
2) Some basic economic models to use to investigate the world;
3) How economists analyze whether policy will have its intended ¿ or an unintended ¿ outcome in the context of our basic models.

As an Honors class, we'll have the benefit of a smaller class size, so we¿ll do more discussion over the semester, and we¿ll be able to modify our schedule to include special topics as we go. Additionally, we¿ll think more deeply about many of these topics, and in particular, I¿ll ask you to not just learn the

ECON 325H.001 | Entrepreneurship: Principles and Practice
TR, 2:00pm to 3:15pm. Instructor(s): Chris Mumford. Enrollment = 325.
The course is designed to help students turn an idea into an enterprise. We will execute a design sprint to reinforce the understanding of the ideation and validation process. Students develop high resolution ideation and marketing skills. We delve into classic strategy principles by applying them given new market and technology trends. Finally, we develop a street smart version of finance through cash flow forecasting and core fund raising techniques. By the end of class, students will be able to discover ideate, validate and accelerate ventures.
Grading will largely be determined by student effort. The class is taught mostly in a flipped classroom, group experiential learning environment. Class participation and being a solid group contributor are essential for grading success. The class will use tutorials, examples and templates extensively. Low stakes quizzes will be used as a recall tool. The primary communication tool is Slack.

ECON 511H.001 | Advanced Game Theory
TR, 3:30 pm - 4:45 pm. Instructor(s): Sergio Parreiras. Enrollment = 24.
The goal of this class is to provide tools for strategic thinking. The main part of the course deals with non-cooperative strategic models and their applications to industrial organization (e.g., oligopoly), political science (e.g., agenda setting), corporate finance (e.g., takeovers), biology (e.g., evolutionary equilibrium), behavioral economics (e.g., social preferences), etc... However, we will also study constrained optimization tools as well as many cooperative game theory applications (e.g., matching of hospitals and interns, kidney exchanges, etc...). Currently, ECON 411 (Game Theory) is not a pre-requisite. No advanced mathematics is used but some mathematical maturity (willingness to read mathematical proofs) is strongly recommended.

The Economics of Health Care Markets and Policy:
Prerequisites: ECON 400, 410, and at least one of 445 and 450, with a grade of C or better

Course synopsis: The market for health care is perhaps the single most important sector of the US economy. In this course we will examine how the strategic choices of supply-side actors in this market (e.g. insurance companies, heath care providers, pharmaceutical firms) affects the welfare of patients, and discuss the role government regulation can play in shaping market outcomes.

Health Economics: Markets and Supply-Side Actors

This course explores the economics of health care markets with a focus on supply-side actors, such as insurers, hospitals and physicians, and drug manufacturers. We will present an assortment of topics in health economics and analyze them using tools from applied microeconomics and industrial organization. The course is co-taught by Drs. Qing Gong (qinggong@email.unc.edu) and Luca Maini (lmaini@email.unc.edu)

ENEC 201H.001 | Introduction to Environment and Society
MWF, 10:10 am - 11:00 am; Recitation: M, 11:15 am - 12:05 pm OR M, 2:30 pm - 3:20 pm. Instructor(s): Greg Gangi. Enrollment = 24.
This course will explore changing human-environmental relations from a variety of social, geographical, and historical settings. While some lectures do include material from the natural sciences this is a social science class. The class cuts across a large number of disciplines in a manner that is integrative rather than segregating lessons from different academic disciplines into separate lectures. The focus of this course is in the first half of the class to give students familiarity with how humans and human organizations deal with issues of sustainability. The second half of the semester will explore some critical issues like population, food security, climate change, urban planning and transitioning to a low carbon economy. This part of the course will not only give student information important background information about the problems but also highlight possible solutions.

In addition, to weekly class lectures, students will attend a one-hour recitation session to enjoy small-group discussion and to explore related topics of

ENEC 325H.001 | Water Resource Management and Human Rights
MWF, 11:15 am - 12:05 pm. Instructor(s): Amy Cooke. Enrollment = 24.
Water supply is a critical component of food and energy production, good health and sanitation. Yet globally, access to clean water is still not assured,

even within developed nations like the United States. Following the leadership of the UN Declaration of Human Rights, an increasing number of countries are adopting the position that access to water is a human right. What barriers to nations and individuals have to guaranteeing water access? Given the critical nature of water to good health and nearly all of human economic activity, what constraints do people have to negotiate globally to maintain sufficient stocks of this crucial resource for the earth¿s population?

This course examines these questions. To do this we will use a variety of mediums: film, books, scientific research, lectures and discussions. We will endeavor to not only outline the constraints to and conflict over this increasingly limited resource, but also suggest some paths towards sustainable water
NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

Class Equivalents: ENEC 490/490H

Register for 3 hours. The goal of the course is to empower non-business majors with the skills and vocabulary required to advance pro-environmental goals within businesses and organizations. The course focuses on quantitative skills used in corporate and project finance as well as the business functions of

marketing, operations, and accounting and their overlap with environmental and social sustainability concerns.

Any enrollment restrictions? Instructor/department consent? Prior or concurrent enrollment ENEC 201, ENEC 202, or ENEC 203 is a requirement unless instructor consent is granted.

EURO 270H.001 | Religion in Western Europe
TR, 11:00 am - 12:15 pm. Instructor(s): Evyatar Marienberg. Enrollment = 4.
In this honors course, we will explore various topics related to the past and present status of religion in general, and of certain religions in particular, in Western Europe, with, at times, an emphasis on three countries: the United Kingdom (UK), France (FR), and Germany (Deutschland, DE). After investigating key historical moments in the history of religion in Western Europe (and in the areas where these three countries in particular are today), we will explore the present situation. Some parts of the course will be devoted to one country, while others will compare a certain topic in a larger area. By the end of this course, students will have a good grasp of religion¿s place in, and impact on, Western Europe, in the past and the present. Being an honors course, students will be responsible for significant part of research and presentation of various topics.

CROSSLISTED W RELI 270H.
NOTE: WAIT LISTING FOR SPRING 2021 HONORS COURSES HAS BEEN SUSPENDED. BEGINNING TUESDAY, JANUARY 19, YOU MUST OBTAIN WRITTEN INSTRUCTOR PERMISSION FOR ANY HONORS COURSE YOU WISH TO JOIN. YOU ARE REQUIRED TO DELIVER A COPY OF THE PERMISSION NOTE VIA EMAIL AT jenn.marshburn@unc.edu

TITLE: Sport Engineering and Human Performance: Where is the Limit?

DESCRIPTION:
This first year seminar designed to discuss the limits of human performance and equipment that is engineered to enhance performance. How fast is it possible to run or swim? Will Olympic records continue to be broken? When do we reach our full athletic potential? This course is designed to challenge your thinking about performance using the science that governs biomechanics and human physiology as well as exploring the data that drives equipment development.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to

	18-NOV-2021	RC CLAS UG FFYS	STDTS	0	19

DESCRIPTION:
This course examines the ecology of infectious diseases including environmental and anthropogenic drivers of those diseases. During the semester we will focus on several case studies of diseases including COVID-19, malaria, cholera, and HIV/AIDS. The biophysical and evolutionary drivers of diseases will be examined as well as the political, economic, social, and environmental systems that shape health and disease across spatial and temporal scales. A political ecological framework is used to examine such topics as how political forces and economic interests helped shape the HIV/AIDS and malaria pandemics in Africa and beyond. We will also examine how emerging infectious diseases such as COVID-19 diffuse through populations and how public health efforts and geographical and epidemiological modelling and analyses can be used to predict and limit their spread.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These

	18-NOV-2021	RC CLAS UG FFYS	STDTS	0	16

DESCRIPTION:
It is hard to define ¿technology¿, but we know it when we see it: cell phones; global positioning systems; genetically-modified organisms; the internet; microchips; steam engines; railroad cars, automobiles, passenger jets; x-rays; nuclear bombs; satellites; magnetic resonance imaging. Technological systems and artifacts, as these examples suggest, have shaped our world in critical ways, from our means of dealing with nature to our modes of dealing with each other, and from economic production to political debates to the very dimensions of space and time around which social life is organized. And yet, though technology is arguably among the most human of social processes, its profound effects on social relations, everyday life, and the human environment are too often left unexamined. This seminar uses the lens of culture to explore codes of meaning and values, and relations of social power, that are invested in technologies. Focusing on representations of technology in film, literature, and new media, on one hand, and on the values that go into the making of actual technologies, on the other, the seminar encourages critical thinking and writing about our place in a technological world, and technology¿s place in ours.

GEOG 065H.001 | Climate Change and the Media
TR, 12:30 pm - 1:45 pm. Instructor(s): Erika Wise. Enrollment = 28.
Climate change has been called both the "greatest hoax" ever perpetuated and the "most urgent threat" facing the world. While scientists produce volume after volume of consensus documents on climate change, the popular debate rages on, fueled by print and TV news, social media, movies, and fiction. Experts, pseudo-experts, and casual observers debate causes, consequences, and remedies in every form of media. In this class, we will explore how the established science of climate change is presented, distorted, and debated in the public sphere by alarmists, denialists, and everyone in between. Through reading and writing exercises, class viewings, discussions, and presentations, students will encounter many points of view, explore a variety of media sources, and develop informed perspectives on one of the defining issues of our time. Beyond climate change, the topics discussed in this class will have relevance to other current events where science, politics, and personal beliefs intersect.

Course meets in Mitchell 110. Mountain building ¿ perhaps the most obvious manifestation of plate interactions ¿ reflects the consequences of a range of tectonic and surface processes. This course will focus on the rates, temporal continuity, and duration of these processes and how they conspire to drive the evolution of orogenic systems. The course will explore mountain belt evolution through quantitative assessment of rates and durations of tectonic drivers from several case-study mountain belts, including eastern Tibet, Taiwan, and the Southern Alps of New Zealand. Students will gain practical

experience in the interpretation of various types of data that bear on these questions, including thermochronology, petrogenetic P-T-t paths, fault displacement rates, and surface processes.

The class is aimed at graduate students and upper-division majors with an interest in mountain building and tectonics. This is a collaborative research course that will be offered simultaneously at UNC and Penn State. Meetings will be in person at both institutions and will be video linked to allow for cross-collaboration among students. Permission of instructor required.

GLBL 481H.001 | NGO Politics
TR, 2:00 pm - 3:15 pm. Instructor(s): Erica Johnson. Enrollment = 24.
GLBL 481H.001: NGO Politics is an interdisciplinary exploration of what NGOs do, how do they do it, and how can societies and policymakers evaluate their activities. No prerequisites are required.

Dr. Erica Johnson is a Teaching Associate Professor and Director of Graduate Studies in the Curriculum in Global Studies. Her research and teaching interests are in comparative politics and political economy, with particular focus on post-Soviet state-society relations. Her research explores how authoritarian governments in post-Soviet Central Asia manipulate health care provision in order to gain legitimacy and regime survival. In addition, she has

Globalized and Deglobalized Russia

Instructor: Dr. Elena Trubina (Professor, Ural Federal University)

Course Description: The period from the collapse of the USSR to the Great Recession of 2007 will be remembered as an era of globalization in which contacts and interactions between people and events in different parts of the world grew dramatically. In recent years, however, it seems that governments and citizens around the world are stepping back from globalization in significant ways. In few places has this process of globalization and deglobalization been more evident than in Russia. In this course, we use Russian and western theories to look at current trends in Russian politics, economics and culture to shed light on the impact of governments and their policies on globalization, on the effects of globalization on urban and social development and on regional

Approaches to Conflict Transformation

Course must be taken for 3 credit hrs.

This course will focus on several mechanisms and strategies for resolving or transforming conflict on an interpersonal level but with an emphasis on how these can be scaled up for use at community, state, and international levels as well. The pedagogy of this course will be both theoretical and practical. We will focus in particular on restorative justice, negotiation, and facilitating dialogue. Through course readings and assignments, students will gain a solid theoretical understanding of these approaches, and students will practice these techniques with guidance from experienced practitioners.

Class Enrl Cap: 24 **Class Enrl Tot:** 24 **Class Wait Cap:** 0 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR1

Attributes: LA- Literary Arts, NA- North Atlantic World

DESCRIPTION:
This seminar explores ecological crises and their depiction in German literature and film. We will focus on the central themes of nature and death. The texts and films we will discuss will range from early Romantic fairy tales to present-day documentaries and climate-change literature (cli-fi). We will encounter (human) animals in crisis. Together, we will face nuclear catastrophes, flooding, landslides, mass extinction, and climate change.

As a First-Year Seminar, this course goes beyond the traditional lecture and discussion format. It invites students to explore new and old ideas, engage with complex issues, and become active learners through inquiry, analysis, discovery, and action. Students will research a current ecological issue of their choice and give a presentation on it. They will also engage with the texts and films through critical analysis in writing and address an environmental issue creatively in their final project.

	24-OCT-2021	RC CLAS UG FFYS	STDTS	24	12
	18-NOV-2021	RC CLAS UG FFYS	STDTS	0	12

DESCRIPTION:
This seminar deals in the broadest possible context with two critical issues that dominated the 20th century: the rise of fascism out of the carnage of World War I and the Bolshevik revolution to which the war and Czarist Russia¿s involvement in it helped contribute. As the semester unfolds, drawing on a variety of historical and documentary films, and literature (memoirs, novels), we will take a comparative look at singular personalities like Lenin, Stalin, and Hitler and examine the role played by such key figures in historical events of this magnitude. Towards the end of the semester, we will glance briefly at the situation created in Western and Eastern Europe by the defeat of fascism and contemplate the origins and evolution of the cold war. We will conclude the seminar with a consideration of the dissolution and democratization of Eastern European countries, the collapse of the Soviet Union, and, against the tragic background of the past, the general prognosis for democracy in the future.

DESCRIPTION:
Students explore the international history, filmic techniques and cultural meanings of non-narrative cinema of the 20th century. Students also transform in-class discussions and individual essays into video projects.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to all first-year students. A first-year student may enroll in up to two FYS during Open Enrollment.

FYS Enrollment Policy: Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum

Non-Honors students will be eligible to enroll beginning November 19 during open enrollment.
GSLL 068H.001 | Intensity, Vitality, Ecstasy: Affects in Literature, Film, and Philosophy
TR, 11:00 am - 12:15 pm. Instructor(s): Gabriel Trop. Enrollment = 24.
Intensity, Vitality, Ecstasy in Philosophy and Literature
What cultural and intellectual resources do we have to increase the intensity of our inner lives, to feel more vitally plugged into the world, and to be attracted to extraordinary modes of perception? We will read texts by famous philosophers, mystics, and poets in order to help us answer these questions. Assignments will explore creative and alternative forms of writing (rather than the standard academic essay): dialogues, narratives, letters, and free writing, among others. Authors include: Plato, Sappho, Marcus Aurelius, Hildegard von Bingen, Mechthild von Magdeburg, Meister Eckhart, Descartes, Pascal, Goethe, Kafka, Musil, Deleuze, and Rilke, among others. (Course taught in English. No prerequisites.)

FIRST YEAR STUDENTS ONLY

GSLL 80 001 11252 ANIMALS IN RUSSIAN LITERATURE Lecture 3 A
(In Person On Campus Learners)

18-NOV-2021 RC CLAS UG FFYS STDTS 0 21

DESCRIPTION:
This seminar explores the "question of the animal" in the works of major Russian writers (Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov) and introduces students to the main theoretical texts on the animal/human relationship (Nietzsche, Levinas, Derrida, Irigaray). Among the topics to be discussed are the animal as the other, animal and human natures, dominance and submission, ethics of the human/animal relations, and the theme of "talking' animals.
The course's main goals are:

¿ To follow the representation of the animal in Russian literature of the nineteenth and twentieth centuries;
¿ To examine the worlds of major Russian writers;
¿ To learn the methods of analyzing literature;
¿ To learn the methods of critical writing.

DESCRIPTION:
This seminar examines two key themes in modern cultural and intellectual history: the importance of travel in the lives and cultural identities of American writers and the important role of European cities in the evolution of modern American cultural identities. We shall focus on a historical era in which American writers were especially drawn to Europe as an alternative to the social and cultural life in the United States; and we¿ll discuss how the encounter with Europe influenced these writers as they defined their national identities as well as their views of politics, social relations, gender identities, literature, art and European cultural traditions. The seminar explores how travel has become one of the most influential personal experiences in modern times; and we¿ll conclude the course with discussions of how travel remained important for American writers at the end of the twentieth century. Our overall goal is to analyze the connection between travel, writing, and personal identities. This is a class for people who like to read about personal experiences and are intrigued by foreign travel. The assigned texts include works by women and men such as Margaret Fuller, David Dorr, Mark Twain, Henry James, Gertrude Stein, Ernest Hemingway, Henry Miller James Baldwin, Elizabeth Spencer, and David Sedaris; and we¿ll focus on works that convey how writers have

DESCRIPTION:
¿Class¿ has been the subject of more mystification, misunderstanding, and ill-informed political disagreement than perhaps any other social category. Especially in the American South, the notion of fundamental class differences may seem antithetical to the aspirations, or even claims, for a class-less society. Yet differences in occupation, income, wealth, the habits of everyday life, and definitions of the ¿good life¿ clearly remain. This course examines how class experiences and debates over the meaning of work have shaped the postbellum Southern United States. Technological innovation, the emergence of a consumer economy, and the evolution of popular culture all have made and remade class identities and influenced ideas about the South as a region as well as the racial, gender, and sexual identities of its people. Students in this course will develop new perspectives on the South in American history. They will also cultivate skills (oral and written), using history as a way of learning to analyze the past and inform the present.

TITLE: Global Food History

GEN EDS: HS, BN

DESCRIPTION:
What does it mean to study food history, and how do we approach it from a global perspective? The world of food (and the food of the world) is a huge subject, and the focus in this class will be on historical texts and topics (as opposed to contemporary food issues), and on global examples (with an emphasis on non-Western regions, including Asia, Latin America, Africa, the Middle East). Class topics will center on three major themes: Food as Identity (Nation, Gender, Memory, Diaspora), Food as Value (Taste, Commodity, Feasting, Famine); Food in its Modern Forms (Industrialization, Consumption, Globalization). The course emphasis will be on giving students the opportunity to practice fundamental skills of historical methodology (written primary and

TITLE: Witchcraft and Magic in the Early Modern World

GEN EDS: HS, WB

DESCRIPTION:
Witches, witchcraft, and magic have inspired folk legends, literary works, films, and artistic creations for centuries. Ideas and beliefs about these topics have also fueled deadly persecutions of groups and individuals. Witchcraft and magic raise questions about gendered norms and expectations, about human beliefs, fear, and responses to that fear. This First Year Seminar explores early modern witchcraft and magic to introduce students to the ways in which historians think about questions of gender, power, and belief in historical perspective. The seminar will focus on how historians pose problems, collect evidence, and evaluate knowledge about how witchcraft and magic reveal broader tensions in the early modern world. The seminar also draws connections to the

HIST 302H.001 | Movies Make History: Films as Primary Sources of American and European Histories, 1908-1991
TR, 2:00 pm - 3:15 pm. Instructor(s): Louise McReynolds. Enrollment = 24.
History teachers often assign novels that capture the essence of the era. When they show movies, however, they tend to prefer filmic recreations on an historical event. These movies illustrate the age in which they were produced better than they do the event in question, so class discussion centers around ¿accuracy¿ and ¿objectivity.¿ This course takes a different approach, and treats films as primacy sources for studying the historical context in which they were made. Beginning with the development of narrative film in 1908, it will trace change by looking sequentially at those nationally specific genres that had repercussions beyond national borders. The primary historical themes will be the repercussions of two world wars in the United States and its European allies and enemies. Both wars played a pivotal role in the rise of communism as an alternative to the liberal democracies that consistently proved unable to fulfill their utopian aspirations. But nor could communism meet its ideological expectations, and this course ends in 1991, when Frances Fukuyama¿s ballyhooed ¿end of history!¿ with the collapse of the Union of Soviet Socialist Republics.

HIST 340H.001 | Fair Trade? Ethics and Business in Africa
TR, 9:30 am - 10:45 am. Instructor(s): Lauren Jarvis. Enrollment = 24.
Explores sub-Saharan Africa both as a historical site of exploitative, extractive labor practices and initiatives to make business more ethical. Starting in the precolonial period, it considers topics such as ending the slave trades, the foundations of colonial economies, development projects post-independence, and the use of conflict minerals.

Lauren Jarvis is an Assistant Professor of History. She grew up in NC and earned her BA in History at that school down the road that shall not be named (rhymes with "fluke"). She then received her PhD in History at Stanford. Jarvis' research focuses on the history of religion in 20th-century South Africa. As evidenced by courses like this one, however, her teaching interests are wide and often reflect a commitment to using history to better understand pressing issues in the present.

HIST 360H.001 | Modern American Intellectual History
TR, 12:30 pm - 1:45 pm. Instructor(s): Molly Worthen. Enrollment = 24.
This course explores questions and problems that have preoccupied idea-makers and shaped intellectual culture in late 19th and 20th-century America. Central themes include: the problem of defining American identity and mission in the world; the clash between faith and reason; solutions to social injustice; the tension between equality and freedom; the meaning of ¿modernity;¿ conceptions of human nature, truth, and even reality itself.

Molly Worthen is an associate professor in the Department of History. Her research focuses on North American religious and intellectual history, particularly the ideas and culture of conservative Christianity in the twentieth century. Her most recent book is Apostles of Reason: The Crisis of Authority in American Evangelicalism. She is also a contributing opinion writer for the New York Times.

HIST 384H.001 | America in the Sixties
TR, 11:00 am - 12:15 pm. Instructor(s): William Sturkey. Enrollment = 25.
The Sixties are mythologized in American memory. From civil rights and anti-war protests to the emergence of hippie counter-culture and second-wave feminism, the Sixties are often remembered and portrayed as a decade of unfettered hope, idealism, chaos, and revolution. The Sixties were indeed an era of dramatic conflict and change, but the experiences of Americans who lived during the Sixties were also wide-ranging, diverse, and at times remarkably complex. Through a variety of themes¿especially gender, race, foreign policy, and popular consumption¿this class will both embrace and challenge standard narratives of the Sixties to offer a multi-faceted examination of one of America¿s most turbulent decades and explore how the Sixties altered the course of American history and shaped life in the contemporary United States.

The Instructor highly recommends that students who enroll in this course have taken either History 128 or History 140 or have a strong background in Modern

History 398-001: U.S. Civil War

What was it like to live through (or die in) the Civil War? What difference did it make if one was a Federal or a Confederate, soldier or civilian, white or black, free or slave, male or female? How did the war fit into contemporary political and social beliefs? How do we get at the subjective experiences of the war?

HIST 398-003: Women, Nazi Germany, and the Holocaust: Experiences and Memories

This undergraduate research seminar focuses on the history of Nazi Germany, World War II and the Holocaust from the perspective of women¿s and gender history. We will study how the major changes in politics, economy, society and culture, warfare, political and racial persecution and mass murder during this period between 1933 and 1945 affected women's lives in Nazi Germany and occupied territories in Europe, how different groups of women responded to these developments, and how individual women remembered them. The overarching theme is the variety of women's role(s), experiences and memories as perpetrators, victims and opponents of Nazi policy in Germany and beyond. You will explore this broad theme in your own research for your research paper through the lens of women¿s autobiographies and other autobiographical primary documents like diaries, letters and oral history interviews that are available online. The main aim of the seminar is to introduce you to the methods of historical research and help you to learn how to write a historical research paper based on your own research.

History 398-004: Leisure Time in Modern America

Leisure-time blossomed with the rise of an industrial economy and later became a source of profit as consumption expanded over the course of the twentieth century. We will use the array of activities and entertainments Americans pursued beyond the workplace to gain insight about these developments. The growth of leisure as commercial activity did generate reliable, even lucrative, employment for some. With these issues in mind, we will consider how leisure-time fostered modern outlooks and habits. Our inquiry will focus roughly on the period between 1880 and 1945.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-005: Crusades

This Undergraduate Research Seminar in History is one of the ¿capstone¿ courses for the major. Students will carry out research with primary sources and secondary literature to produce a work of original historical scholarship relating the subject religious violence. The class will introduce students to the crusades¿and medieval concepts of ¿holy war¿ more broadly¿in their historical context. The crusading movement, which entailed acts of Christian violence against various ¿enemies of the faith,¿ will be considered within the matrix of European society, economics, culture, and political life. This overview of the crusades will frame the students¿ evidence-based research projects, which might explore aspects of the crusading movement, modern memories of the crusades, or questions of religious violence more widely.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

HIST 398-006: Sin and Evil in Modern America

This seminar traces ideas of sin, evil, and the Devil from the 19th century to present-day America. We¿ll read history, theology, social commentary, anthropology, and literature to examine American attitudes toward evil throughout this era of world war, genocide, and other ¿unexplainable evils,¿ when new learning undermined the religious claims that had helped humans account for tragedy and cruelty for so long. Some Americans embraced new scientific explanations for wrongdoing and suffering, or even wondered whether modern humans might eliminate evil altogether¿but others believed that supernatural forces were livelier than ever. This course culminates in a research paper where you can practice thinking and writing like a historian, on any topic related to sin and evil in American history. Students in past years have done original historical research on fascinating topics ranging from Christian politics to eugenics, from the civil rights movement in Chapel Hill to accusations of witchcraft in 1990s California. It turns out you can find evil anywhere you look.

HIST 511H.001 | 9/11 in World History
TR, 2:00 pm - 3:15 pm. Instructor(s): Eren Tasar. Enrollment = 30.
This course examines the historical and contemporary context behind the violent brand of Islamism that culminated in the formation of Al-Qaeda and its execution of the 9/11 terrorist attacks. It discusses the emergence of the umbrella of ideologies and political movements associated with "Islamism" through the lens of two interrelated historical developments: Muslim resistance against colonialism, and the clash of nationalism and communism in the postcolonial Muslim world. Topics include the rise of Islamism in the 1960s as a source of competition to communist youth movements, the Islamic Revolution in Iran, the Afghan War, the 9/11 attacks, the U.S.-led "War on Terror" and consequent rise of ISIS. Students should note that this is not a class on American politics, terrorism, or Islamophobia; nor does it focus primarily on the events of 9/11/2001.

HNRS 089.001 | Medicine and Narrative: Writing COVID / Writing Us
M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 20.
A workshop in autobiographical and creative short story, focusing on the complex connections between story-telling, interpretive skill, and the practice of medicine. Students will write and distribute autobiographical and and creative short stories about illness and medical care; the seminar will meet weekly to discuss these stories, attempting to identify and articulate the key issues each story expresses about what it means to be sick, what it might mean to take care of others in their illness. The writing and (especially) interpretive skills acquired in this workshop are directly valuable to anyone contemplating a career in medicine, but are equally valuable to anyone who might at some point encounter (in themselves or in someone they care for) the trauma of illness. In addition to the weekly workshop, participants will have one-on-one conferences with the instructor (himself an MD with an international reputation as a writer). The capstone project will be a public reading (via webinar, allowing participants to invite an audience from anywhere on the globe) of participants' work, which may (at student option) be in the form of written work, an audio composition, or a film illustrating images and themes from the

HNRS 353.001 | The British empire and political culture: dissent, colonialism, and independence
TR, 9:30 am - 10: 45 am. Instructor(s): Susan Pennybacker. Enrollment = 24.
New historical approaches to the history of British imperialism provide a `transnational¿ vantage point on imperial ventures. Historians consider the movement of people, ideas, commodities, and cultural forms in global patterns that integrate modern domestic British history into varied, comparative studies of the histories of Asia, the Caribbean, Africa, and parts of the British Isles. We will read a series of representative works in this new literature. Anti-colonialism, cultural expression, slavery¿s aftermath, colonial labor policy, the creation of new urban infrastructures, warfare, and the expressions of racial, gender and religious difference, are central themes. The course emphasizes the discussion of new works of history, short written responses, essay-writing, and work with historical documents and visual media

SPCL 400.301 | The Science and Art of Cooking for Health: Food As Medicine
T, 5:00 pm - 7:00 pm. Instructor(s): Alice Ammerman. Enrollment = 15.
Student Instructor: Serenity Bennett

Course Description: Food is highly connected to overall health and wellbeing. As a result, inequitable access to healthy and nutritious foods are directly linked to health disparities. Therefore, all healthcare workers should be well versed in nutrition and practical cooking so they can advise their patients and the communities they are serving. The main goal of this course is to provide future healthcare and public health workers with the tools needed to address health disparities through culinary medicine (although those not interested in healthcare are also welcome to attend).

This course will take a nuanced and multi-disciplinary approach to understanding the role of food in maintaining and restoring health. By integrating the

SPCL 400.302 | Exploring Themes of Childhood and Adolescence in Literature
T, 5:00 pm - 7:00 pm. Instructor(s): Jennifer Larson. Enrollment = 15.
Student Instructors: Emily Clemente

Course Description: From Harper Lee¿s To Kill A Mockingbird to J.D. Salinger¿s Catcher in the Rye, child and adolescent narratives have long existed as prominent agents in literature by demonstrating how young individuals interact with and perceive the world. By moving beyond this literary canon and exploring more contemporary works of fiction and memoir, this course will engage in critical examination of the ways that youth is portrayed in literary texts. Rather than focusing on narratives that are specifically written for an audience of child readers, this course will identify and closely engage with adult literature that focuses on stories of child and adolescent narrators and characters.

SPCL 400.303 | The Representation and Medicalization of Disease Pathologies in Modern Film
R, 5:00 pm - 7:00 pm. Instructor(s): Bradley Hammer. Enrollment = 15.
Student Instructors: Chelsea Deitelzweig

Course Description: Does modern film accurately portray the healthcare conditions our society currently faces? Can movies impact the way we view illness?

This course will aim to explore how certain diseases and health conditions are medicalized and represented in modern films, including but not limited to mental illness, alcoholism, obesity, aging, abortion, AIDS, and cancer. Over the course of this class, we will synthesize the study of film narratives, cultural understanding, and medical nomenclature for a nuanced and holistic analysis of the movie media we consume and how it compares to real-world experiences of illness. Examples of films included in our course of study will include Me and Earl and the Dying Girl, Rent, and Silver Linings Playbook. By

SPCL 400.304 | The Intersection of Public Health and Neuroscience Research: Alcohol Use Disorders
M, 5:30 pm - 7:30 pm. Instructor(s): Todd Thiele. Enrollment = 15.
Student Instructors: David Gonzalez

Course Description: In a dual perspective, the course is designed to examine alcohol use disorders within a public health sector and its motivation for neuroscience research. In order to understand the origins of neuroscience research in alcohol use disorders, one must understand the growing concerns involved with its influence on public health. Specifically, why is there a need to invest in neuroscience research specific to alcohol use disorders? The questions examined in the first portion of the course will involve addressing the extent of biological and sociological pre-dispositions to alcohol use disorders. Specifically, what pre-dispositions increase an individual¿s risk of developing an alcohol use disorder, and how is our current understanding of these pre-dispositions used to combat the current alcohol use disorder epidemic? Additionally, we will examine the micro and macro-level implications of

SPCL 400.305 | Food, Family, and Forehead Kisses: The Study of the Poetry of Community
W, 5:00 pm - 7:00 pm. Instructor(s): Michael McFee. Enrollment = 15.
Student Instructors: Maggie Helmke & Jo Snow

Course Description: Irish Poet Brendan Kennelly once stated: ¿Poetry is, above all, a singing art of natural and magical connection because, though it is born out of one's person's solitude, it has the ability to reach out and touch in a humane and warmly illuminating way the solitude, even the loneliness, of others.¿ Since March 2020, humanity has operated in either a quarantined or pseudo-isolated fashion, compromising relationships, family connections, and human life. Yet despite all of these challenges, humanity, and therefore community persists; using poetry as a lens, this course will examine the mechanisms behind the persistence of interpersonal relationships and understandings of community following moments of loss.

SPCL 400.306 | The Mathematics of Probability Games
T, 4:00 pm - 6:00 pm. Instructor(s): Mario Giacomazzo. Enrollment = 15.
Student Instructors: Harrison Lewis & Nisarg Shah

Course Description: Have you ever wondered if the topics you have been learning in math class beginning from elementary school all the way through calculus and statistics can be applied to something more practical and fun?

Mathematical foundations (such as statistics, discrete probability, and mathematical logic) can in fact be used to have tangible implications for the decision-making behind real-world games. Ranging from simple probability games such as heads or tails to more complex sports analytics, mathematics is often used to create more analytical approaches to the games we have come to love over time.

SPCL 400.307 | Gender Relations in South Korea
M, 5:00 pm - 7:00 pm. Instructor(s): Ji-Yeon Jo. Enrollment = 15.
Student Instructors: Eleanor Murray

Course Description: In a survey conducted by the South Korean Ministry of Gender Equality and Family in 2020, 74.6% of female respondents felt that ¿South [Korean] society was unfair to women, while only 18.6% of male respondents felt the same¿ (KWDI, 2021). Out of all the Organization for Economic Co-operation and Development (OECD) nations, South Korea remains the one with the widest gender pay gap. During our class, we will explore gender relations within South Korea and the effects of inequality. We will examine women¿s relationship with the military, the positioning of single mothers, the monolith of ¿ajummas,¿ and women in the Kpop industry.

SPCL 400.308 | Psychology in Television and Film
M, 3:00 pm - 5:00 pm. Instructor(s): Desiree Griffin. Enrollment = 15.
Student Instructors: Luke Nguyen

Course Description: For many of those unaccustomed to mental illness or psychology, their perceptions of these topics are influenced by the tropes they see on TV or movies. The depiction of mental illness across these media is often sacrificed authenticity for the sake of entertainment. Even the depictions that attempt their best to maintain accuracy still don¿t present the full experience of individuals suffering from mental illnesses. The inaccuracies in these depictions contribute to the stigma surrounding mental illness. This course will attempt to de-stigmatize mental illness through analysis of mental health depictions in media. Throughout the course, we will take examples of characters in TV shows and movies who exhibit traits of or are directly diagnosed with mental illnesses and compare these depictions with the reality behind the mental illness.

SPCL 400.309 | First on Scene
M, 5:00 pm - 7:00 pm. Instructor(s): Sarah Boyd. Enrollment = 15.
Student Instructors: Kirti Patel

Course Description: Have you ever watched a medical drama where they perform a crazy yet lifesaving procedure on someone having a medical emergency outside of the hospital? Have you then wondered if that would actually work in the real world? Can you relieve pressure in the brain with a drill from your garage? How about performing a cricothyrotomy with a knife and pen? What about making a chest tube from any old piece of tubing? In this class, we will be addressing questions like these, and more importantly, whether someone with adequate training should even attempt them or if it¿s all dramatized to make entertaining television.

SPCL 400.310 | The Science Behind Human Emotion
M, 1:20 pm - 3:20 pm. Instructor(s): Monica Gaudier-Diaz. Enrollment = 15.
Student Instructors: Sandhya Sundar Rajan

Course Description: What are our emotions? What purpose do they serve? How do emotions relate to our thoughts, memories, and behaviors towards others? What happens when our emotional responses go awry?

Although these questions date back to early philosophical texts, only recently have experimental psychologists begun to explore this vast and exciting domain of study. The course will begin by discussing the evolutionary origins of distinct emotions such as love, anger, fear, and disgust. We will ask how emotions might color our cognitive processes such as thinking and memory, the relationship between emotions and the brain, development of emotions in

SPCL 400.311 | Queer Anti-Capitalism in Literature and Visual Media
R, 6:00 pm - 8:00 pm. Instructor(s): Geovani Ramirez. Enrollment = 15.
Student Instructors: X. Ramos-Lara

Course Description: Intersectionality takes into account a person¿s modes of being oppressed and how oppressive systems can lead to the formation of sociocultural privileges¿such as white privilege, ¿passing,¿ and straight assimilation. And within intersectional academic and activist approaches to anti-capitalism, queerness is an area that lacks emphasis and support - this will be critiqued and analyzed throughout the semester. In this course we will explore the sources of oppression of minoritized groups of people, especially queer and trans Black, Indigenous, and People of Color (BIPOC), and offer modes of theoretical and practical liberation for those groups. Students of this course will read texts and watch films that detail the sociocultural production queer people stand to proudly offer in the face of their blatant oppression. 'Workers and oppressed peoples of all countries, unite!' - Vladimir

SPCL 400.312 | The Culture, Science, and Breadth of Integrative Medicine
W, 5:00 pm - 7:00 pm. Instructor(s): Jessica Barnhill. Enrollment = 15.
Student Instructors: Malik Tiedt

Course Description: In simple terms, integrative medicine incorporates complementary and traditional healthcare modalities into the biomedical realm of individualized, patient-centered healthcare. Whether it be taking herbal medicines or consulting with a chiropractor, various populations increasingly rely on complementary and traditional modalities to both maintain wellness and prevent disease. It is therefore imperative for future healthcare practitioners to recognize the complexities of medical pluralism and integrative medicine.

This multidisciplinary, seminar-based course draws from the fields of public health, medical anthropology, philosophy, ethics, social medicine,

W, 4:45 pm - 6:45 pm. Instructor(s): Robert Allen. Enrollment = 15.
Student Instructors: Abby Wooten

Course Description: From 1856 to 2012, Dorothea Dix Hospital in Raleigh was the state¿s principal insane asylum. Today, the site of the hospital is being reimagined as a ¿destination¿ park. The archival records of the hospital, preserved by the State Archives of North Carolina, represent a unique resource for understanding North Carolina history and the emergence of modern psychiatry in America. Since 2017, UNC¿s Community Histories Workshop has excavated these records to recover the lives of thousands of individuals who were treated there. Over the past two years, CHW staff and UNC students have used these records to research and write historical case studies that humanize the plight of individuals treated at the asylum between 1856 and 1918. These case studies, the records upon which they are based, the burgeoning scholarly literature on the history of psychiatry, and the expertise of UNC researchers and clinicians

SPCL 400.315 | Gayme Studies: How Queer are Video Games?
T, 5:00 pm - 7:00 pm. Instructor(s): Courtney Rivard. Enrollment = 15.
Student Instructors: Li-Anne Wright

Course Description: What does it mean to be queer? And what does it mean for a video game to be queer? In this class, we will merge queer studies and game studies to analyze games from a humanities perspective. Students will leave the class with landmark queer theory and game studies concepts under their belt, a new perspective on games, and the ability to critically discuss them.

Like all fiction and cultural/commercial products, games hold possibilities for social commentary, moral arguments, and themes about the human experience. Additionally, video games and their mainstream communities reveal harmful narratives that we form around gender and sexuality. However, games have also long

TITLE: How Reading Works: Language, Cognition, and Literacy

GEN EDS: SS

DESCRIPTION:
In many societies today, we live our lives surrounded by the written word. But did you ever stop to wonder how reading works? How do we go from looking at symbols on a page, sign, or screen to understanding the writer¿s message? How do children learn to read, and what ways of teaching reading would best promote success for all students? We will explore these questions through hands-on analysis of language and writing-system structure, as well as discussion of the primary research literature. Your final course project will address a real-world question about reading, literacy, or reading education from the perspective of language and cognition.
