Experience and document North Carolina¿s Mexican and Latin American history. This course combines field research, oral history, and service learning to understand the immigration and settlement of North Carolinians with Mexican and Latin American heritage. The course will address the ethical and practical aspects of the ethnographic method including the preparation, transaction and transcription of oral history interviews. Students will participate in the New Roots Nuevas Raíces initiative and spend spring break (March 8-13, 2020) in Ocracoke, North Carolina, where they will collaborate with a local school to facilitate family heritage workshops. Students will also complete an independent research project and public presentation.
The course is open to advanced undergraduates and graduate students. Required: 3 semesters of Spanish or ability to demonstrate Spanish language proficiency. Recommended: previous courses in Latin American or Latina/o/x studies, qualitative methods, or migration studies.

DESCRIPTION:
Students will examine evidence that human activity has caused global warming, investigate scientists¿ ability to predict climate change, and discuss the political and social dimensions of global climate change.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to all first-year students. A first-year student may enroll in up to two FYS during Open Enrollment.

FYS Enrollment Policy: Enrollment in FYS is limited to first-year students. Students can enroll in a maximum of two FYS in any one semester, and a maximum

DESCRIPTION:
Offered remotely Spring 2022
This seminar will introduce students to the nature of the Earth¿s oceans and atmosphere, and describe the processes that lead to our weather patterns and global climate. Emphasis is placed on understanding how the oceans and atmosphere affect human population, how oceanic and atmospheric changes are linked to increasing human activity, and how these changes can affect you. Basic principles and modern theories of changing climate, severe weather events, oceanic hazards, and interactions between the oceans and the atmosphere will be studied. Examples of presently active research being conducted at UNC and at other institutions will be used to highlight how the above topics are investigated scientifically. Readings will be taken from introductory textbooks on meteorology, oceanography and environmental sciences; and modern articles in periodicals such as Scientific American, Nature, American Scientist, National Geographic, Bulletin of the American Meteorological Society, and Weatherwise. Various websites, including those within the UNC Department of Marine Sciences, will be used.

DESCRIPTION:
What explains the `pull of the Poles¿? What motivated early explorers to undergo great hardships to investigate the Arctic and Antarctic, and what did they discover about these regions? What have we discovered in the intervening decades, and what do we still not understand about polar regions? Why do the Arctic and Antarctic play such a critical role in global climate? This seminar will combine scientific and historical perspectives to investigate the `ends of the earth¿, the Arctic and Antarctica. We will begin by surveying the geography and oceanography of these regions, and then step back into the past and follow in the footsteps of some of the early polar explorers through their own accounts of their explorations. Modern accounts will help us compare and contrast these early explorations. The seminar will also include readings and discussions about current questions and problems of the polar regions, in particular human impacts and potential effects of global warming. A `Makerspace¿ component is an important feature of the class ¿ students will be supplied with materials to work on a design/build challenge, testing, revising, discussing, and consulting with one another to improve their efforts through the course of the semester. This `making¿ experience is highly relevant to the experiences of early polar explorers as well as modern oceanographers, who often have to

MASC 057H.001 | Waves: From "The Sound of Music" to "The Perfect Storm"
TR, 9:30 am - 10:45 am. Instructor(s): Alberto Scotti. Enrollment = 24.
We are constantly surrounded by phenomena that are wave-like in nature. We communicate over short distances with sound waves, while we use electromagnetic waves over long distances. We see waves when we stand at beach, and the weather we experience is controlled very often by wave-like features of the jet stream. In this seminar, we will develop the conceptual framework necessary to understand waves, starting from laboratory observations. The main goal is to expose the common traits of waves, and how they can be used to enhance our understanding and predict the outcome of a broad range of important physical phenomena.

FIRST YEAR STUDENTS ONLY.

18-NOV-2021 RC CLAS UG FFYS STDTS 0 18

DESCRIPTION:
What properties should a fair election have and are these properties achievable in theory and in practice? How can mathematics and statistics be used to expose election fraud and gerrymandering? What might voting systems look like if they were designed by mathematicians? Students will address these questions as they compare different election systems, evaluate their strengths, weaknesses, and abuses, and design improvements to current structures. Topics will include ranked voting, approval voting, exit polls, election fraud, and gerrymandering. The course will include some data analysis, but no prior experience is needed.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to

DESCRIPTION:
Have you ever wanted to be able to hold infinity in the palm of your hand? This course engages students in an exploration of the interplay between mathematics, origami, and fractal symmetry. Learning objectives will include mastering basic origami folding techniques, identifying and applying fundamental symmetry operations, recognizing and analyzing fractal symmetry, and creating geometric tessellations. Students will use image editing software (Illustrator and Photoshop), mathematical imaging software (Geometer¿s Sketchpad and Ultra Fractal), and the laser cutter in UNC¿s BeAM space, to design and create modular origami and fractal tessellation artwork. Students will be expected to participate in class discussions and small group work, as well as submit short written assignments on course topics.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These

TITLE: Networks: The Science of the Connected World

GEN EDS: QI

DESCRIPTION:
We live in a connected world, where the confluence of the different connections¿social, political, financial, informational, technological, biological, behavioral, epidemiological¿affects virtually every aspect of our lives. The study of networks provides a language for describing these connections and for attempting to describe the resulting impacts. Most people are familiar with the concept of a network in terms of hyperlinked Web pages or online social networks; but networks are also useful for studying a wider variety of applications, with ¿nodes¿ representing actors of interest and connecting ¿edges¿ representing relationships. We will explore the roles of networks in public health, political activity, economic markets, workplace interactions, and

MATH 233H.001 | Calculus of Functions of Several Variables
MWF, 10:10 am - 11:00 am; Recitation: R, 9:30 am - 10:20 am. Instructor(s): Mark Williams. Enrollment = 32.
Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

MATH 381H.001 | Discrete Math
TR, 11:00 am - 12:15 pm. Instructor(s): Emily Burkhead. Enrollment = 35.
This course serves as a transition from computational to more theoretical mathematics, designed to provide you with the fundamental skills necessary for success in situations that require you to read, write, and reason precisely when working with mathematics. Special emphasis is given to improving your fluency in the use of mathematical vocabulary and notation when writing and critiquing mathematical proofs. Topics are from the foundations of mathematics: logic and proof techniques, set theory, relations and functions, counting methods, and basic number theory. In many ways, this will be the first ¿abstract¿ math course in your academic career. Although we will explore specific, concrete examples whenever possible, this course requires you to hone your ability to analyze and articulate the logical essence of the problems being studied. In other words, you will be expected to learn how to communicate coherently and persuasively using the language and the grammar of mathematics. PREREQUISITE: MATH 232 OR 283.

MATH 383H.001 | First Course Differential Equations
MWF, 1:25 pm - 2:15 pm. Instructor(s): Jian Wang. Enrollment = 35.
The scientific method is arguably the single most important achievement of the modern era. Together with its technological implications, in the last four centuries it has shaped the world both physically and culturally, and continues to do so, like no other element in the history of mankind. The overall aim of the course is to learn the basic elements of the method through a combination of rigorous mathematical training, simple physical experiments, and elementary mathematical modeling. The focus will be on ordinary differential equations, which can arguably be considered the ``birthplace" of the method. In class laboratory experiments will be presented about once per week. Students will be expected to collect data from the experiments, and apply differential equation models to attempt to predict the observed phenomena. Results will be reported in the Final Lab Report. Course material (including videos from experiments will either be posted at our {\bf sakai site, MATH383H.001.SP20}, or on a dropbox site if the files are too large for the sakai site.

This topics course will focus on convex and non-convex optimization, motivated by applied problems in machine learning, data analysis and image processing. The first part of the course will provide an introduction to convex optimization, including convex sets and functions, modeling, conic problems, optimality conditions and algorithms. Then, we will consider non-convex problems, focusing on contemporary optimization challenges in machine learning and practical approaches for large-scale optimization. Our discussions will balance between theoretical aspects, numerical methods and practical implementation (via simple coding examples and assignments).
Applications we will discuss include: using convexity for establishing direct visibility in point-clouds; optimal mass transportation via linear programming; support vector machines with quadratic programming; conic optimization for sparse recovery and total variation image denoising; the Iterative Shrinkage Thresholding algorithm for linear inverse problems; multidimensional scaling via majorization; the Expectation-Maximization algorithm for maximum-likelihood estimation; and efficient optimization strategies for deep learning.

Nonlinear Wave Equations

We will discuss long-time existence of quasilinear wave equations with small initial data. Classes of quasilinear wave equations are ubiquitous in nature. Roughly they have geometry that depends on the solution, but the solution in term depends on the geometry. During the semester, we will learn about energy inequalities, the method of invariant vector fields and variants of the Klainerman-Sobolev inequalities, Morawetz estimates and integrated local energy estimates, r^p-weighted local energy estimates, and ghost weights. We will discuss generic quasilinear equations with nonlinearities that vanish to second order, those satisfying the null condition, and some that satisfy a weak null condition.

The Seminar in Materials Science and Engineering is a required 1-credit course for all Materials Science students in fall and spring semesters of years 2-5 of their doctoral program. The course tracks attendance at the required APS departmental seminars. Attending departmental seminars is an important component of training for MTSC doctoral students. Engaging in the seminars will help students gain a working knowledge of a variety of research areas important to their doctoral research and to their future career.

TITLE: Hip Hop Diplomacy: Opportunities and Challenges

GEN EDS: VP, GL

DESCRIPTION:
For 75 years the U.S. Department of State has been sending American musicians abroad as cultural diplomats. In 2001 it sent its first hip hop musician on an official tour, and 2013 it established Next Level, a program that sends American hip hop artists abroad to teach and perform with youth in underserved communities. Hundreds of hip hop diplomats have now toured and taught in scores of countries around the world. Katz created the Next Level program and, as its director, oversaw residencies in twelve countries on five continents. This class draws both on the history of American musical diplomacy and Katz¿s own experiences to explore hip hop diplomacy in the context of American foreign policy and consider its goals, potential, and challenges. Next Level artists

TITLE: Music in the Movies

GEN EDS: VP, CI

DESCRIPTION:
This course will examine the concepts and techniques of film music, covering many influential film scores dating from the 1930¿s to the current day. We will analyze and discuss the various conceptual issues relating to film music, such as theme, narrative, character development, synchronization, etc., and compare the different approaches that film composers have taken with respect to these issues. Students will research and analyze film scores from a variety of perspectives (sonic/musical, dramatic, historical, etc.) in the form of class presentations and research papers. In addition, students will learn to use digital sound technology to incorporate concepts explored in the class in the creation of original sound design elements for pre-existing film footage. No

With territories around the globe from the Americas to the Philippines to portions of Western Europe, the Spanish colonial empire was, at its height, one of the largest and most expansive in history. This course explores the myriad ways in which Spanish colonial powers influenced, interacted with, and reacted to the musical cultures of the colonized and how indigenous and/or colonized peoples nonetheless persisted in asserting their musical voices over the course of several centuries.

An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1860. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class will involve a performance component.

MUSC 390H.001 | Music and Politics
TR, 3:30 pm - 4:45 pm. Instructor(s): Stefan Litwin. Enrollment = 24.
The principle of "l'art pour l'art" (art for art's sake) has dominated much of the way we hear and understand music. Since its emancipation from the church and courts, western music has been viewed mostly as an aesthetic island immune to the influences of political reality. This seminar will examine the interrelatedness between music and society, focusing mainly though not exclusively on composers who sought to address political issues through their music. Some of Ludwig van Beethoven's most popular works, for example, among them the 5th symphony, were inspired by the French Revolution; Franz Liszt championed an early form of Christian socialism; and composers throughout the 20th century reacted to political turmoil, war and revolution by inventing a variety of new musical styles and compositional methods. During the course of the semester, through readings and research projects, we will trace these developments and examine how politics helped define music. No prior musical knowledge or abilities are required.

DESCRIPTION:
What is the point of learning about ethics? An ethics course should teach you how to recognize a moral issue when it stares you in the face. You should learn to appreciate its intricacies, to reason your way through it, and to discuss it with your peers. This will raise your skills of critical reflection and your moral sensitivities. And if you can translate what you gained into action, dare I say it, then it will make you into a better person as well. Short stories¿much more so than the classics or contemporary journals of professional philosophy¿are a great tool for this purpose. In this course, we will explore contemporary social, political and moral issues through short stories in world literature connect these stories with research papers in the social sciences and the humanities, blogs, and newspaper articles.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These

TITLE: Philosophical Issues in Humor

GEN EDS: PH

DESCRIPTION:
This is a course on various philosophical issues related to laughter and humor. The course is roughly divided into three sections, though part of the aim of the course is to explore connections between these sections: 1) Historical and contemporary philosophical theories of humor; 2) Connections between more traditional issues in philosophical aesthetics and the philosophy of humor; and 3) Moral questions about humor, including the question of what makes some jokes racist/sexist/heterosexist/etc and the question of how humor and morality interact. We will focus on how scholars from different fields pose and answer questions about humor, comparing and contrasting their methodologies, assumptions, and goals. The seminar is heavily discussion-oriented and will

PHIL 155H.001 | Truth and Proof: Introduction to Mathematical Logic
TR, 3:30 pm - 4:45 pm. Instructor(s): Sarah Stroud. Enrollment = 24.
Deductive logic, our subject, is the study of one type or species of good argument. We will use formal tools to more precisely characterize and investigate that species, in which the conclusion of an argument follows from certain premises simply in virtue of the form of the various statements involved. We will

progressively uncover and study several distinct aspects of form that are relevant to such patterns, starting with what is called truth-functional logic and moving on to quantificational logic. One concern throughout the course will be whether and how we can rigorously prove that a conclusion follows (or doesn¿t follow) from a group of premises.

Assessment will be via frequent problem sets, which we will prepare for by using significant class time to work together on sample problems. The required textbook is Deductive Logic by Warren Goldfarb (Hackett Publishing).

PHIL 185H.001 | Aesthetics and the Philosophy of Art
TR, 11:00 am - 12:15 pm . Instructor(s): Susan Wolf. Enrollment = 24.
The course focuses on philosophical issues about art and beauty. Most readings will be 20th -21st century. Central questions include: What is art? How is art related to pleasure and beauty? Is there an objective standard of taste? What is the significance of the artist and the artist¿s intentions in understanding art? Other topics include emotional responses to fictional event and characters, the relation of aesthetic value to moral value, the aesthetics of nature, the status of forgeries.

Susan Wolf's research interests range broadly over topics in ethics and other issues about values and valuing. She teaches courses in moral philosophy and

PHIL 360H.001 | History of Ethics
TR, 2:00 pm - 3:15 pm. Instructor(s): Douglas MacLean. Enrollment = 24.
This course examines classic works in the history of Western moral philosophy, beginning with the ancient Greeks. Readings will include selections from Plato, Aristotle, Thomas Hobbes, David Hume, Immanuel Kant, John Stuart Mill, and some contemporary philosophers. We will discuss their views on such matters as the nature of moral virtue, the requirements of justice, and the demands of moral obligation. We will also be asking how the very idea and goals of morality have changed through history and how they bring into focus some fundamental questions about morality, such as: Are moral claims objective? And should morality always aim at producing the best outcomes?
This course is intended for advanced students who have had one or more of the lower division philosophy courses, preferably an introductory course in ethics or political philosophy.

Permission required for enrollment.
A number of seats in this class are being reserved for each new student orientation registration period in July. A class that looks closed may have a number of seats released during each new student orientation registration period that will be available for new students. All seats remaining will be available when Connect Carolina opens for all Undergraduate students in August.
This course is for graduating senior PPE minors who have taken the 384 Gateway course and have taken (or are taking) all other courses necessary to complete the PPE minor.

The seat request form for this course can be found on the PPE website: ppe.unc.edu. For enrollment assistance, please contact our PPE Administrators at ppeprogram@unc.edu.

DESCRIPTION:
The nanoworld is a strange and captivating place. It is a world of molecules vibrating trillions of times a second, quantum dots emitting rainbow colors, DNA encoding information in molecular bonds, and protein motors driving the complex machinery of the cell. At this scale, nature has unique rules and behaviors, some of which are amazing and unexpected. We are still uncovering these rules, and are only beginning to apply this new knowledge to technology. Can we build molecular machines that cure disease or clean up the environment? Can we make computers using single molecule transistors? How do viruses and other bio systems ¿assemble¿ themselves? In this seminar, we dive into the basic physics, chemistry and biology that describe the nanometer scale world. We will also try to distinguish the true promise of nanoscience from the hype. Students will engage in class discussions informed by their weekly reading of selected scientific literature. They will also participate in small group projects building physical models of nanoscale objects and phenomena, and perform calculations to gain a quantitative understanding of the physics underlying the nanoworld. No prerequisite is required for this course, but a spirit of adventure is.

DESCRIPTION:
This course introduces students to World¿s Fairs in the US between 1893 and 1965 (1884 World Cotton Centennial, New Orleans; 1893 World¿s Columbian Exposition, Chicago; 1904 Louisiana Purchase Exposition, Saint Louis; 1939 New York World¿s Fair; 1962 Seattle World¿s Fair; 1964/1965 New York World¿s Fair). We will look at how ideas about cities and world¿s fairs changed over time. We will also look at the role World¿s Fairs played in: (1) promoting a city¿s place in the US and the world, (2) addressing social issues, and (3) disseminating ideas about progress. We will learn about world¿s fairs through documentaries (video/audio), texts, as well as examine memorabilia from each of the Fairs. Students will be responsible for participating in weekly discussions on readings and biweekly journal responses. Students will work on a group project on a world¿s fair and present at the end of the semester. This project can use traditional means of presentations¿such as PowerPoint and posters, or it could be a podcast (5 minutes), video, or some other media.

18-NOV-2021 RC CLAS UG FFYS STDTS 0 13

DESCRIPTION:
The course will familiarize students with the major public policies and movements affecting the American labor market. Students will learn how each of the following impacts the labor market: education, the minimum wage, Social Security, pensions, unions, unemployment insurance, welfare (Temporary Assistance for Needy Families, TANF), income taxes (including the Earned Income Tax Credit, EITC), self-employment, immigration, automation, and the gig economy. The course uses news articles, policy summaries, podcasts, and academic journal articles to help students learn the many theoretical and political viewpoints associated with each topic.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to

PLCY 085H.001 | Reforming America's Schools
TR, 3:30 pm - 4:45 pm. Instructor(s): Doug Lauen. Enrollment = 24.
This seminar will examine the role of schools and other institutions play in determining life chances, which educational interventions work well for economically and academically disadvantaged students, and what to do when institutions cease to work well. Students will learn how to analyze complex educational public policy problems while exploring questions of effectiveness, inequality, resource management, and politics.

FIRST YEAR STUDENTS ONLY.

Dr. Lauen¿s work seeks to understand the effects of educational policies, school types, and school contextual factors on student outcomes. He focuses on

areas that policymakers can control and that have high relevance to current educational policy debates, such as classroom poverty composition, educational

PLCY 340H.001 | Justice in Public Policy
TR, 3:30 pm - 4:45 pm . Instructor(s): Benjamin Meier. Enrollment = 24.
To paraphrase the American political philosopher John Rawls, justice is the first virtue of public policy. No matter how efficient or well arranged, laws and institutions must be abolished if they are unjust. Accordingly, some of the most basic questions of public policy are questions of justice: what goals should the government aim to realize? What means may it adopt to realize those goals? In this course, we examine the most prominent theoretical approaches to these questions: utilitarianism, contractualism, and rights-based views. We shall aim to determine whether governments should maximize individual welfare, or whether the proper role of government is to respect and protect the rights of its citizens. We shall also employ these theoretical frameworks to think through pressing contemporary policy problems, which may include economic justice and the design of welfare policy, the ethics of climate change, justice in immigration, the moral limits of markets, the role of religion in politics, and the ethics of whistle-blowing.

This class will meet Remote- Mostly Asynchronously. All lectures are recorded and online. We will meet synchronously 1x a week for discussion.

DESCRIPTION:
This seminar focuses on explaining and understanding social movements and the collective political behaviors that they promote (e.g. demonstrations, protests, violence, and eco-terrorism). Our theoretical focus will be interdisciplinary, drawing on research in political behavior, social psychology, sociology, political theory, and the law. We will discuss when and why collective action occurs, who participates, what forms it takes, and how governments respond. Substantively, we will study a variety of movements including: The Tea Party movement, Black Lives Matter, #MeToo movement, the Environmental movement, the Animal Rights movement, and the White Nationalist movement. We will use a variety of approaches and resources: class discussions, films, wiki writing, online discussions, novels, and texts. Grades will be based on class participation, a writing project, and several group wiki papers.

DESCRIPTION:
Are you interested in being a lawyer or public official? Do you know what it means to ¿think like a lawyer?¿ Have you considered why people mostly honor the law? Where do you find ¿the law?¿ How do judges decide difficult cases? This seminar will explore the notion of a rule of law, formal and customary law, legal analysis, judicial interpretation and the realities of the adversarial system and law practice. We will consider what makes law seem legitimate and how to assess whether it promotes liberty and justice. This seminar will challenge students to be reflective and critical about their own perspectives and to explore personal responsibility for promoting a rule of law. Students will be engaged in analytical thinking and expression through required participation in teacher-led dialogues based on assigned readings and with research and writing assignments. Reading materials include selections from court cases and other sources that provide an introduction to the notion of a rule of law, the sources of law that govern us and protect our individual rights, the nature of legal analysis, the different methods of judicial interpretation, and the realities of law practice and the adversarial system.

18-NOV-2021	RC CLAS UG FFYS	STDTS		0	19

DESCRIPTION:
This course examines the presidency of Barack Obama, the first African American to serve in the nation¿s highest office. The course is broken down into four parts. The first part studies Shirley Chisholm and Jesse Jackson, two black people who ran for President prior to Obama. The second part examines Obama prior to running for office, reading a book that he authored. The third part of the class examines Obama¿s presidency, both how he reached office and a look back at what he achieved while in office. The last part of the class considers American politics post-Obama, with a particular focus on race/ethnicity.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These students may enroll in one FYS during this priority enrollment window. Beginning November 19 (Open Enrollment), the remaining seats are made available to all first-year students. A first-year student may enroll in up to two FYS during Open Enrollment.

POLI 100H.001 | Introduction to Government in the United States
TR, 2:00 pm - 3:15 pm. Instructor(s): Timothy Ryan. Enrollment = 26.
This course is an introduction to American political institutions, political behavior, and the policy process. In this course we will discuss the origins of the current governmental system in America, the structure of the U.S. government, and how theories of American government apply to current events and problems the government and citizens face today.

Timothy Ryan is an Associate Professor in the Department of Political Science at UNC, Chapel Hill. He has a number of research interests related to public opinion and political psychology.

Please contact instructor for permission to enroll.

This course surveys scholarly literature on political psychology, electoral institutions, racial politics, and access to the ballot in the United States. In 30 hours of community service with partner organizations, students forge deeper connections between the university and the broader community. Through consistent reflections on the importance and potential downfalls of service learning, students gain a multi-faceted view of the practice and learn how to become better service learners. Assessments such as open-response tests and essay assignments will be used to measure students¿ comprehension of class materials.

POLI 255H.001 | International Migration & Citizenship
W, 2:30 pm - 5:00 pm. Instructor(s): Niklaus Steiner. Enrollment = 24.
While the global movement of products, services, ideas, and information is increasingly free, the movement of people across borders remains tightly controlled by governments. This control over international migration is a highly contested issue, and it is complicated by the fact that never before have so many people had the ability to move from one country to another while at the same time governments have never had so much power to control this movement. This class explores the moral, economic, political, and cultural dimensions of this movement across international borders. The class is based on discussions (as opposed to lectures) and tackles thorny questions like: do we have an obligation to let poor people into our rich country? what constitutes persecution? how do foreigners affect national identity? how should citizenship be allocated? We will pay particular attention to the distinction between migrants who move voluntarily (immigrants) and those who are forced to flee (refugees) - is this an important distinction to make, and does one group deserve admission more than the other? No prior knowledge or experience is needed; instead, students need to be ready to dig deep into all sides of migration issues through

POLI 276 Everyday Political Theory: Seeing Like a Citizen
In this course you will learn about how people solve problems and seek justice together...all in the places where you actually spend much of your life. If you want a better understanding of your shared life with others, your civic responsibilities to each other, take this class. All majors welcome (e.g. Poli Sci, Phil, Bus, Soci, etc).

Race and Politics is a 3 credit course; please make sure you enroll for 3 credits.

Race is at the center of American politics. Everything from voting rights to education policy to the quality of drinking water is shaped by race. This graduate seminar will focus on race in US politics, and while readings will cover multiple racial groups, Black politics will receive more attention than that of other non-White groups. The bulk of the course will look at race and politics in three research realms.

1. Race and political behavior: Political behavior encompasses everything from political attitudes to partisan attachment to voter turnout.
2. Race and representation: How do groups reach office and what difference does it make when they serve in office?
3. Race and public policy: There will be a particular emphasis on policing.

Non-Honors students will be eligible to enroll beginning November 19 during open enrollment.
NSCI 225H.001 | Sensation and Perception
TR, 9:30 am - 10:45 am. Instructor(s): Peter Gordon. Enrollment = 25.
Topics in vision, audition, and the lower senses. Receptor mechanisms, psychophysical methods, and selected perceptual phenomena will be discussed.

PREREQUISITE: PSYC 101.

I am a cognitive scientist who takes an interdisciplinary approach to studying how people take in and use information from the world. A major focus of my work is the interface between perception and language comprehension, a topic that I have pursued by examining the role of higher-level auditory processing in the recognition of spoken language and the manner in which visual and oculomotor factors shape reading comprehension.

PSYC 089H.001 | Critical Thinking in Psychology and Beyond: How to use Your Brain
TR, 2:00 pm - 3:15 pm. Instructor(s): Jonathan Abramowitz. Enrollment = 25.
Critical thinking is the ability (and willingness) to assess claims and make objective judgments on the basis of well-supported reasons. It is the ability to look for flaws in arguments and resist claims that have weak supporting evidence (or none at all). Critical thinking is not simply negative thinking; it fosters the ability to be creative and constructive, generate solutions, think of implications, and apply knowledge to a broad range of social and personal problems. Critical thinking skills are essential to success as a student, in your career, as a consumer of goods and services, and in many other areas of your life.

This course focuses on the development of critical thinking skills, especially as they relate to psychological science. The field of mental health is loaded with theories and interventions¿some of them scientifically and logically valid, and others not. Critical thinking is a must if one is to successfully learn

PSYC 532H.001 | Quantitative Psychology
TR, 9:30 am - 10:45 am. Instructor(s): Patrick Curran. Enrollment = 25.
PSYC 532H will offer an in-depth exploration of the science of quantitative psychology. Although the field of statistics is most commonly associated with quantitative psychology (e.g., statistical methods used to analyze psychological data), this represents only one part of a much broader area of scientific inquiry. Additional components of quantitative psychology include psychometrics (e.g., the measurement of psychological constructs such as depression or motivation), assessment (e.g., personality, intelligence), testing (e.g., academic, military), personnel selection (e.g., industrial/organizational psychology), evaluation (e.g., treatment outcome, program evaluation), and research design (e.g., experimental and quasi-experimental design). The primary objective of this course is to systematically study the core components that make up the science of quantitative psychology through the design and execution of hands-on empirical research. Given the variety of research conducted in quantitative psychology, the research-component of the course will be equally varied. Empirical research will be conducted using computer simulations, the analysis of existing data, and the design and collection of new empirical data.

DESCRIPTION:
In this course, we will explore the various ways that wars and conflicts, particularly Iran-Iraq, U.S.-Iraq, and U.S.-Afghanistan wars, have been portrayed in literature, film, and photography. We will attempt to deepen and enrich our understanding of war experienced by both veterans and civilians of each country. We will examine the impact of war on the human psyche in regards to violence. We will read books by American war veterans and Middle East authors contemplating the wars and their consequences. We will look at each writer¿s perspective on war and their interpretation of it comparatively. All readings will be in English. The class will be conducted in the form of a combination of lectures, discussion, and experimentations.

This course is designed for Equity in Teaching. During this course we will be implementing an innovative and interactive learning method¿Collaborative Online International Learning, or COIL. During this course we will engage in class discussions and lectures and a final presentation assignment with Dr. Amir Hossein Vafa and students from the Shiraz University in Iran for approximately five class session (asynchronous and synchronous options available).

COURSE TITLE: Confronting Antisemitism

CAROLINA AWAY PROGRAM
JWST 390-001 is connected with the Carolina Away program.

COURSE DESCRIPTION
This course takes a broad look at antisemitism in history, our contemporary world, and at UNC. Class sessions will feature guest speakers and discussions on different aspects of this persistent form of hatred. The class offers a unique opportunity to explore the humanities and social sciences, meeting with faculty from English, History, Religious Studies, Psychology, German Studies and other fields. Students will hear firsthand testimony about individual experiences with antisemitism in Europe and the American South. Learning about the interconnections among Antisemitism and other forms of intolerance,

JWST 420H.001 | Post-Holocaust Ethics and Theology
TR, 12:30 pm - 1:45 pm. Instructor(s): Andrea Dara Cooper. Enrollment = 5.
This course examines the challenges posed to ethics and theology by the Holocaust. We will consider the collapse of traditional ethical approaches from a global and comparative context following the extermination of Jews in Europe during World War II. Philosophical and theological issues to be addressed include the problem of evil, divine omnipotence, theodicy, human animality, representation, and an ethics of memory.

CROSSLISTED WITH RELI 420H

Dr. Andrea Dara Cooper is an Associate Professor in the Department of Religious Studies and the Leonard and Tobee Kaplan Scholar in Modern Jewish Thought and Culture at UNC. Dr. Cooper works at the intersection of Jewish thought, contemporary philosophy, cultural theory, and gender studies. At UNC she teaches

DESCRIPTION:
This seminar will examine how historians have reconstructed the life, teachings and death of the historical Jesus. We will look at the Gospels of the New Testament, as well as references to Jesus in other writings (Roman and Jewish sources, as well as Gospels that did not make it into the New Testament). In addition, we will explore how Jesus has been portrayed in modern film, including such Biblical ¿epics¿ as The Greatest Story Ever Told, such ¿period pieces¿ as Jesus Christ Superstar, such brilliant retellings as Jesus of Montreal and such controversial films as The Last Temptation of Christ and The Passion of the Christ. The ultimate goals of the seminar are to see what we can say about the historical man Jesus himself and how Jesus came to be portrayed in both ancient sources and modern imagination.

REGISTRATION PROCEDURES:
Spring Enrollment: All non-honors FYS seats are reserved during Waves 1 and 2 for first-year students who did not take an FYS in summer or fall 2021. These

DESCRIPTION:
Few technological innovations have more profoundly shaped the course of human civilization than the invention of writing. This course explores the role of writing in the development of ancient religious traditions, covering the wide chronological period from the beginnings of writing in Mesopotamia and Egypt (approximately 3200 BCE) to the advent of Islam. We will begin by considering the nature of writing both as a technology and as a symbolic system, giving attention to insights coming out of modern linguistic research. Then we will examine a series of case studies of the relationship between religion and writing drawn from the ancient world (especially the ancient Near East), in order to illustrate the diversity and complexity of these interactions between technology and society. Specific topics to be addressed include: religion and the early alphabet, magical and mystical uses of writing, religion and literacy, scribal culture, and the development of ¿scriptural¿ texts such as the Bible and the Qur¿an.

RELI 248H.001 | Introduction to American Islam
TR, 12:30 pm - 1:45 pm. Instructor(s): Juliane Hammer. Enrollment = 24.
This course provides an introduction to the presence of Muslims in the United States through both historical and thematic inquiry. We start with a historical survey spanning enslaved African Muslims brought to the Americas in the antebellum period to the ongoing marginalization of US Muslims in the first two decades of the 21st century. We then explore in thematic units topics such as American Muslim communal and demographic diversity, political and civic organizations, political participation, religious practices as well as family, education, knowledge production and cultural diversity. Special attention will be paid to questions of gender, race, and citizenship, as well as to issues of religious authority and authenticity. The course engages diverse materials within the contexts of both American religious history and Islam as a global religious tradition.

RELI 420H.001 | Post-Holocaust Ethics and Theology
TR, 12:30 pm - 1:45 pm. Instructor(s): Andrea Dara Cooper. Enrollment = 19.
This course examines the challenges posed to ethics and theology by the Holocaust. We will consider the collapse of traditional ethical approaches from a global and comparative context following the extermination of Jews in Europe during World War II. Philosophical and theological issues to be addressed include the problem of evil, divine omnipotence, theodicy, human animality, representation, and an ethics of memory.

CROSSLISTED WITH JWST 420H

Dr. Andrea Dara Cooper is an Associate Professor in the Department of Religious Studies and the Leonard and Tobee Kaplan Scholar in Modern Jewish Thought and Culture at UNC. Dr. Cooper works at the intersection of Jewish thought, contemporary philosophy, cultural theory, and gender studies. At UNC she teaches

DESCRIPTION:
What does Asia represent to Iberian Christian writers of Jewish descent in the sixteenth and seventeenth centuries? How do Iberian conversos represent their identities through their writings on Asia? How do the depictions of different Asian people come into play in these authors¿ notion of personal identities and nationhood? This course examines how early modern Iberian authors of Jewish heritage imagined and represented Asia in their writings, how their representation of the non-European world dialogues with contemporary events in the Iberian Peninsular, and the significance of their notions of Asians. Upon the successful completion of the course, students will full fill Gen Ed requirements (WB and LA) and gain a better understanding of Iberian converso culture in a transoceanic and multicultural frame, in addition to acquiring a good knowledge of early modern European notions of Asia.

Students may also register for this course under ASIA 71.001.

TITLE: Déjà vu: Medicine and Narration across Time and Space

GEN EDS: LA

DESCRIPTION:
Hallucinations, depression, hysteria, paranoia, anxiety, neurosis, body dysmorphic disorder, obsession, and pain are only some of the symptoms that will be reflected in the narratives of this course. The authors featured in this seminar are familiar with the medical knowledge of their time and are often patients themselves suffering from the medical conditions they describe. Throughout the semester, we will examine the practices of authors ¿ such as Maupassant, Montaigne, Selzer, Sembène, or Meruane ¿ who not only borrow heavily from medicine in composing their works but also conceive of writing itself as something medical, that is, as having a therapeutic function for both writer and reader. Accordingly, we will study a group of writers and artists across

Description:

This course provides an accelerated introduction to Romanian by teaching basic skills of speaking, reading, and writing it applied to a variety of real-life contexts. It covers levels one and two of the basic Romanian language sequence in one semester and is designed for motivated undergraduate language learners, especially those familiar with other Romance languages. It is the equivalent of SPAN 414 and counts toward the requirements of the Hispanic Linguistics major.

SPAN 301H.001 | Introduction to Literary and Cultural Analysis
MWF , 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 11.
This course is designed for students in the Honors Program, who have been recommended by their SPAN 261 instructor, or who have received the approval of the SPAN 301 course coordinator. The course prepares students to analyze texts in at least three different genres (theater, poetry, essay, narrative, or film), within a cultural context. In this process, students will improve their language proficiency in Spanish as they are exposed to different world views through the study of literature and culture. SPAN 301H differs from SPAN 301 in several ways; writing assignments are more challenging in terms of length and research expectations, and students use a Spanish conversation digital platform to further practice their Spanish skills speaking with native speakers. In addition, students also work on a creative, non-traditional, final project (a musical composition, an original short story, a graphic text, or any other cultural project based on their academic interests and inspired by our readings and discussions). The course also integrates cultural events outside of the classroom such as movies, guest lectures, art exhibits, or performances as part of class participation.

SPAN 301H.002 | Introduction to Literary and Cultural Analysis
MWF, 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 9.
Dr. Cristina Carrasco is a native of Valencia, Spain, and has an M.A in Comparative Literature from the University of Iowa and a PhD. in Hispanic Literature from the University of Texas at Austin. Her research focuses on contemporary Spanish and Transatlantic studies. Building on her doctoral work on the autobiographical metafictions of Miguel de Unamuno, Rosa Montero, Enrique Vila-Matas, and Juan José Millás, she examines the ways in which contemporary hybrid genres continue to reconfigure Spanish and Latin American literature in an age of globalization and new cultural mestizajes. She is also interested in Transatlantic cinema and literature, particularly in texts that address recent immigration to Spain, exotic representations of marginalized groups, and transnational identities in the Iberian Peninsula. Her current research project explores Spanish and neocolonial representations of Latin America in contemporary Spanish women¿s narratives.

MNGT 120H.001 | Introduction to Interpersonal and Organizational Communication
TR, 2:00 pm - 3:15 pm. Instructor(s): Katie Striley. Enrollment = 7.
Interpersonal communication is about our connections with other human beings. Communication shapes our understandings of ourselves, others, organizations, and social systems. Our communication creates and recreates the social worlds in which we reside. We often take interpersonal communication for granted, assuming that we already know much of it because we engage it on a daily basis. Yet, through engaged study, we will come to realize that interpersonal communication is complicated, consequential, and crucial. This course provides a space to openly analyze and discuss the role interpersonal and organizational communication plays in our understanding of self, other, and everyday life as constituted through the relationships that we create, sustain, and sometimes end.

SOCI 057H.001 | Rationalization and the Changing Nature of Social Life in 21st-Century America
TR, 3:30 pm - 4:45 pm. Instructor(s): Howard Aldrich. Enrollment = 24.
Today, fast food restaurants have become a model for everyday life. Some scholars have even talked about the "McDonaldization" of the nation and the world. By that, scholars mean a drive toward greater efficiency, predictability, calculability, and control by non-human technologies in modern organizations. This drive has shaped many features of American life, including health care, law, and education. Such forces have even affected personal relationships. Sociologists have a term for this process: "rationalization." We will explore ¿rationalization¿ through a process called "active learning" in which you will have opportunities to explore online resources, engage in peer-to-peer discussions, and work with me to develop a research project in which you explore the impact of rationalization on an occupation that might be a destination for you. We will spend one class period, every other week, working on the term paper in class. We will have four or five guests, sharing their expertise on how rationalization has affected their work. You will be assessed based on your contributions to blog posts, class discussion, short answer written assignments, and a research project culminating in a term paper (15-20 pages). You will

DESCRIPTION:
Contemporary international migration is transforming politics, economics, social relations, and ethnic identities in societies throughout the world. This seminar is designed to introduce students to the fascinating and ever-changing study of immigration in contemporary America. We will cover the great waves of European migration at the turn of the 20th century, review the emergence of Latino and Asian migration flows to the United States after 1965, and the contemporary movement of migrant agricultural workers to North Carolina, a state that until recently had experienced little or no migration. We will look at why people migrate, how citizens respond to that migration, how the federal government regulates migration, how local communities manage the settlement of its newcomers. Through a variety of methodological approaches, ranging from fieldwork to content analysis to interviewing to research, students will be actively engaged in each of the topics examined throughout the course.

REGISTRATION PROCEDURES:

Optimization for Machine Learning. This course focuses on optimization aspects of common problems and topics in machine learning, statistical learning, and neural networks. It covers several topics such as optimization of linear regression, nonlinear regression, matrix factorization, stochastic gradient descent, regularization techniques, neural networks, and deep learning techniques.

Prerequisites:
--- Linear algebra and multivariable calculus, or equivalent
--- Programming language: Basic Python
--- Students who do not have such backgrounds, contact the instructor for permission.

WGST 111H.001 | Introduction to Sexuality Studies
TR, 2:00 pm - 3:15 pm. Instructor(s): Karen Booth. Enrollment = 15.
This course introduces students to concepts, research, and implications for policy and activism emerging from the interdisciplinary field of sexuality studies. We will discuss the history of the field and become acquainted with a variety of perspectives particularly from feminist and queer studies, anthropology, sociology, and history. Focusing on the United States, we will consider what it means to analyze sexuality and gender as social constructs; the overlaps and distinctions among ¿gender,¿ ¿sex,¿ and ¿sexuality;¿ how systems of inequality, such as white supremacy, capitalism, patriarchy, heterosexism, and able-ism intersect to construct ¿sexuality;¿ the emergence of ¿lesbian,¿ ¿bi,¿ ¿transgender,¿ ¿gay,¿ ¿queer,¿ and other identities and social movements; reproductive politics; marriage; and debates over and experiences of sex education.
The course takes an explicitly feminist perspective. I do not pretend to be ¿unbiased¿ nor do I pretend to present ¿all¿ sides of an issue. I do, however, try to create an atmosphere in which you can express multiple and perhaps conflicting views while engaging with the concepts and empirical findings of U.S.

WGST 241H.001 | Women in Ancient Rome

TR, 12:30 pm - 1:45 pm; Recitation: , . Instructor(s): Sharon James. Enrollment = 12.
In this class, we will learn about the life of women in ancient Rome, beginning with this question: what do we mean when we say women in ancient Rome? We will focus on the treatment, both legal and social, of Roman women, by examining the visual depictions of women and women's lives as well as the literary evidence. We will cover about 800 years of history in this course.
Prerequisites & Course Attributes:
*Crosslisted with CLAS 241H.
Registration Procedures:
*To register/wait list for this course, please call (919.966.5110) or visit the Honors Carolina office in 225 Graham Memorial.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

DESCRIPTION:
A smart city is one where the needs of a populace meet the needs of environmental sustainability. The balance between the social and environmental issues is governed by Information and Communication Technologies (ICT) that power a smart city infrastructure. In this course, we learn about the influence of urban networks, smart city urban planning, energy as a catalyst of sustainable development, smart city infrastructure, sustainable transportation, flow of information and communications, smart grids, digital infrastructure and the role of data and information technology. We will discuss criteria for measuring the smartness of a city, including quality of life, citizen governance, and discuss issues that go towards the making of a future smart city. Several case studies will be presented with guest lecturers invited to present on critical thinking and practices in smart city development. Students will be involved in group projects to assess smartness of cities.

REGISTRATION PROCEDURES:

INLS	151	001	7601	RETRIEV/ANALYZ INFO	Lecture (In Person On Campus Learners)	3	A

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

Program: Burch Field Research Seminar on Transatlantic Security in Brussels & London
Title: Media & Society
Dates: January 11 - April 30, 2022

An introduction to media in the UK including the history of the press, media law, and the political and social context in which the British media operate. Using examples from recent news stories, the course will also cover ethics and the key journalistic prin-ciples of objectivity, impartiality and balance. Students will explore how stories make it into the news and how they are then treated by papers and broadcast media. There will be a chance to compare the UK and US media and examine how the West treats news from the developing world. The impact of social media and ¿citizen journalism¿ on the flow of information to (and from) the public will also be examined.
