ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

Combined Section ID: 0642(nutr175/amst175/anth175.001) - NUTR 175(#1779), ANTH 175(#8985)

This class is cross-listed with NUTRI 715 / ANTH 175

This course introduces students to a wide range of topics covering food studies taught by faculty across the UNC campus as well as from Duke, NC State and outside of an academic setting. The overall objective of this course is to provide an overview of how individuals, communities, and societies produce, distribute, and eat food. This inter-disciplinary course will examine cultural, political, economic, environmental, and geographic approaches to food within local, national, and global contexts. Topics include food politics, food in the arts, land use, how we eat through time, culture and religious food values as well as a basic understanding of physiological concepts of nutrition. Students will explore:

You can sign up under any department's course number. It will still count towards your major/minor in those departments.

****NOTE:** During the 2020-2021 academic year, AMST248 will also fulfill the "Introduction" requirement for the major and minor in American Studies (typically fulfilled by AMST101, AMST102, AMST334 and AMST335).

According to the US Census Bureau, in the year 2020 more than half of the nation's children are expected to be part of a minority race or ethnic group. All Americans under the age of 18 are now at the front of a trend that will see the overall population follow suit some 20 years later; (NPR's Hansi Lo Wang). In essence, we are in a time of a dynamic racial shift, and yet our country seems to be divided or confused about what race is, how to talk about it, and how it might intersect with other identity formations such as gender, class, or sexuality. The first goal of this super-course is to give students real tools for how to address multiple modes of difference and to understand how intersectionality;the theory of interlocking identities that reflect multiple

This course is cross-listed with ASIA 691H AMST 691H is a research and methods course designed to help senior American Studies and Asian Studies majors research and write an honors thesis. Our objectives are to review some major issues in Asian and American Studies and interdisciplinary area studies in general, investigate how each student's research topic fits into these larger debates, review the writing conventions of the appropriate discipline and field, and help students produce innovative, insightful, and articulate research essays. EE. Students who complete and successfully defend an honors thesis will graduate with honors. American Studies and Asian Studies students will also participate in the senior colloquium in the spring, where each student will give a short presentation summarizing their thesis research. Completed theses will be entered into the Carolina Digital Repository. Students writing an honors thesis will be enrolled in AMST 691H and ASIA 691H by the department once their thesis applications have been approved.							
AMST	820	001	11061	CRITICAL ETHNIC STUDIES (CES)	Lecture (In Person On Campus Learners)	3	A
Bldg: Greenlaw		Room: 0302		Days: M	Time: 15:35 - 18:35	INST 100	Instructor: HOLLAND, SHARON PATRICIA
Class Enrl Cap: 15		Class Enrl Tot: 7		Class Wait Cap: 3	Class Wait Tot: 0	Class Min Enrl: 0	
GR3							

This course is devised to provide graduate students interested in theoretical interdisciplinary work with a sense of prevailing questions and critiques important to CES. CES takes on the more difficult questions of intersectional work, as it thinks through sovereignty and emancipation, identity and

ontology, place, space and temporality. Each iteration of the course works itself through new perspectives in the field, challenging students to create new methodologies for their own work.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit

<https://honorscarolina.unc.edu/academics/courses/#register>

ANTH 053H.037 | Darwin's Dangerous Idea

TR, 9:30 am - 10: 45 am. Instructor(s): Paul Leslie. Enrollment = 24.

Darwin's theory of evolution by natural selection is central to one of the most profound revolutions in the history of thought, generating stunning insights but also some misunderstanding and tragic abuse. This seminar aims to provide a clear understanding of how natural selection works, and how it doesn't. We will examine objections to the theory; how the environmental and health problems we face today reflect processes of natural selection; and recent attempts to understand why we get sick, how we respond to disease, why we get old, why we choose mates the way we do, and more. Class sessions will feature a mix of lecture and discussion of concepts and issues. Students will also engage in small group projects; cooperative explorations of problems raised in class or in the readings and/or designing mini research projects.

FIRST YEAR STUDENTS ONLY.

***Starting in fall 2021, we are dropping the pre-requisites to this class. While it is helpful to have prior programming experience, this is not required.

Engineers help to design and build solutions to the world's problems. This course will explore some of the fundamental skills and tools in engineering. You will get experience using engineering tools, and you will also develop a mindset so that you can "learn how to learn" because technology changes rapidly and the tools that you use today may be obsolete in 20 years. There will be an emphasis on developing strong professional skills, including work in a group setting and effectively communicating your efforts.

In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture. For example, while it may be easy to develop an engineering solution to a problem, what are the economic and ethical considerations of various solutions? These concepts are important to help engineers build a better world.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with

fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

***The classroom location is Dey Hall 405.

What kind of material is Sponge Bob made of? What about the slime of his pet snail, Gary? We are taught that there are three states of matter: solid, gas, and liquid. However, in our daily lives we encounter materials that challenge this simple description such as foams, pastes, gels, soap, and rubber, as well as our skin, hair, nails, and cells. These are Soft Materials and in this course we will learn about their special properties and how to describe them mathematically. This class is an active one, everyone participates and everyone learns from and helps one another. We will use various in-class activities to make the class more engaging. We will discuss, take quizzes, and do presentations. We will also evaluate each other's homework. Be prepared to come to class and participate in these activities! The technical material that you will learn will provide you with a valuable skillset. In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture; draw connections between the material in this class and what you have learned in other classes; recognize opportunities; and learn from mistakes to create value for yourself and others.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

ARTH 285H.001 | Art Since 1960

MWF, 10:10 am - 11:00 am. Instructor(s): Cary Levine. Enrollment = 24.

This course will explore some of the major trends in American and European art since 1960. It will spotlight select artists whose work offers particularly intriguing, challenging, or problematic examples of contemporary art practice. We will focus on close readings of artworks and texts and consider how the questions and debates raised by them relate to various historical, social, cultural and political contexts. This course will present contemporary art and discourse as diverse, contradictory, contested, and unresolved.

Cary Levine specializes in contemporary art. He received his Ph.D. from the Graduate Center, City University of New York, and was a recipient of a J. Paul

Title: Seen, Unseen and Suggested: Representation and Hollywood Film Censorship

This course will look at the history of film censorship in the United States from the perspective of how such things as the Production Code (Hays Code), wartime restrictions, Anti-communist blacklisting, regional and local censorship boards, late 1960s movements for social change, and culturally and socially-determined moral and ethical standards restricted what could and could not be seen on movie screens in American theaters. We will watch and then analyze approximately 30 films from a cross-section of the 120-year history of cinema in the US, paying special attention to issues of gender, sexuality, race, class, and political persuasion as they affect on-screen representation. The goal of the course will be to cover the myriad ways in which censorship determined/determines what audiences saw/see on film and how that created a seemingly culturally-unified image of ¿America¿ that was/is, for many Americans, restrictive and exclusionary of their life experiences, if not outright hostile to their participation in American cultural life.

ARTH 490: Inventing the Modern Artist

Toiling in solitude, their attention entirely transfixed, living in destitution; a bohemian, a vagabond, erudite yet tempestuous. A genius. The image of the modern artist is itself a construction, and a relatively recent one at that. Solidifying across the eighteenth and nineteenth centuries, it was the product of centuries of debate and careful maneuvering in order to elevate the visual artist to the same level of public respect and regard as the poet and the philosopher. With an emphasis on European and North American visual artists and art worlds, this class will examine the invention of the modern artist from the Middle Ages to today. We will progress chronologically, exploring and revisiting key topics such as the evolving distinction between art and craft; the socioeconomic status of the artist and the emergence of the starving artist trope; representations of visual artists in imagery, theater, and writing; artists from marginalized and under-represented groups; different historical models for conceptualizing {genius;} and the relationship between the artist, labor, and the art market. By examining the history of the modern artist's invention, we can position ourselves to invent new visions for what it means to

Title: ARTH 557: Art and Money

This course explores the intersection of art and economics from the seventeenth century to the present. We will explore both the aesthetics of the monetary and monetary in art. What does the design of cash have to do with its value? What is an NFT and how does it change the art market? Why did economists from Marx to Keynes turn to aesthetics to understand finance? We will also study artists whose work is about or made of money, from William Harnett to Andy Warhol, and the economics of art production, from the famous trial of James McNeill Whistler to the politics of the readymade. Sessions will address themes of both artistic and economic concern such as value, labor, market, counterfeiting, consumption, reproduction, and circulation.

ARTH 952 Seminar in Museum Studies
Dr. Daniel Sherman

This research seminar introduces students to the theoretical and methodological framework of critical museum studies and asks them to engage with it in their own research. Our readings will focus on three areas: influential texts from the late twentieth century that helped establish a critical approach to the history of museums; recent efforts by museums to recount their own histories, such as ¿Making the Met,¿ a 2020 show marking the 150th anniversary of the Metropolitan Museum; and scholarship integrating art history, anthropology, and post-colonial studies around the problem of restitution of artifacts from Western museums to source countries. Students will write a substantial research paper on a museum, exhibition, or collection, historical or contemporary, of interest to them.

The Art of Drawing in Early Modern Europe
Dr. Tania String
Wednesdays, 2:30-5:10

Drawing was an essential skill for the early modern artist. It was the foundation of paintings, prints, works of sculpture, and a wide variety of decorative objects. But drawings were increasingly also produced as finished works of art. This seminar explores developments in this graphic art and takes as its focal point the collection of drawings donated to the Ackland Art Museum by Dr. Sheldon Peck and Dr. Leena Peck. It is primarily designed to coordinate with a major exhibition of these drawings, entitled Drawn to Life: Master Drawings from the Age of Rembrandt in the Peck Collection at the Ackland Art Museum, which opens in September 2022. Each student in this seminar will conduct extensive research into seventeenth-century Dutch drawings, with opportunities for close study that will form the basis of a sustained research project.

ARTH 982: Art and Environment							
This course focuses on artistic engagements with the environment from the eighteenth century to the present, primarily in North America. While we will study a range of artists, practices, and movements from furniture making to Land Art, our main objective is methodological. Together we will define ecocritical art history and try to understand, expand, and challenge its parameters and goals. Along with art historical scholarship, we will read texts in environmental history, history of science, and new materialism. The course is organized thematically by ecosystem, with topics such as forest, ocean, ice desert, wasteland, and garden. Students will write a seminar paper based on independent research. Paper topics must relate to the themes of the course but can expand beyond the time period and geographic regions covered.

GR1

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

ARTS 105H.001 | Basic Photography

MW, 2:30 pm - 5:15 pm. Instructor(s): Joy Drury Cox. Enrollment = 15.

In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium's rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

					GR1		

Print I is a media-based studio art foundation course. It is designed to introduce core concepts of 2-D image-making through concepts and techniques of printmaking. In other words, the course focuses on developing visual literacy with specific attention to image-making strategies afforded by print media such as layering, reversal, multiple (editions, variant and modular) that make this approach to art-making unique. Questions arising from this inquiry include:

- What does working with a matrix or set of matrices allow? What sorts of images and ideas does this make possible?
- Why make art in serial or multiple forms?
- How is thinking for print different than/same as other media?
- How can the tools and methods of printmaking shape the development of an idea, both visually and conceptually?

Studio Art course enrollment is temporarily restricted to declared Studio Art majors and/or minors. For a full enrollment calendar, please visit: <https://art.unc.edu/courses-and-degrees/studio-art-courses/>

NOTE: Honors Carolina students register online when their registration appointment begins. Online registration ends April 20. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist.

Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between April 20 and August 12. Enrollment in this course is temporarily restricted to Honors students. Email Professors Grabowski and Goldstein for permission to enroll: beth.grabowski@unc.edu; bobg@email.unc.edu

ARTS 409H.001 | Honors Art & Science: Merging Printmaking and Biology
Instructor(s): Bob Goldstein / Beth Grabowski

ARTS409H and BIOL409L together form a single course that brings together art majors and science majors to learn theory and practical skills in both art and science. The title of the class, Art and Science, implies an intersection of the two disciplines. Intrinsic to both is an investment in close observation, experimentation and visual analysis. While organized around meaningful connections between art and science, the course will actively consider disciplinary differences, especially with regard to what constitutes creative and scientific research.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

Most seats in this course are reserved for FR, SO, transfer students, and DAMES majors. Anyone may waitlist; unused reserved seats will be released and go first to the people on the waitlist, if any.

First-year seats will be added to the course gradually for each wave of FY registration, so even if the course looks full, there should be more FY seats to come if not all FY have registered. The final class size is 122.

Most seats in this course are reserved for FR, SO, and DAMES majors. Anyone may waitlist; unused reserved seats will be released and go first to the people on the waitlist, if any.
 First-year seats will be added to the course gradually for each wave of FY registration, so even if the course looks full, there should be more FY seats to come if not all FY have registered. The final class size is 35.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

BIOL	201	006	3363	ECOLOGY AND EVOLUTION	Lecture	4	A
(In Person On Campus Learners)							

If you are not able to register on your own (for whatever reason = no pre-regs, etc), plan to attend the first lecture in the fall. Add your name to the class signup sheet for students not registered that will be available in class the first day. We enroll as many students as possible that day, giving priority to transfer students and students that are approaching graduation.
Dr Evans and Dr Burch

<p>BIOL 202H.001 Molecular Biology and Genetics MW, 3:00 pm - 4:45 pm. Instructor(s): Steven Matson. Enrollment = 24. The content of this course will be similar to that of a regular section of BIOL202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, genome organization, biotechnology and genetic engineering. There will be two class meetings per week with special emphasis on class discussion and an interactive classroom. You are expected to be actively engaged in this course through discussions, class activities and pre- as well as post-class assignments and readings. In addition to three mid-term exams and the final exam, there will be one significant</p>							

writing/media assignment and at least one small group project during the semester. The required text for this course will be Essentials of Genetics (10th edition) by Klug et al. There will be additional assigned reading from various sources. Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course.

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Permission required for enrollment.

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

					(In Person On Campus Learners)		

Permission required for enrollment.

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Incoming first year students are not eligible. You can start doing research for credit after completing 201 or 202.

Questions? Please contact Dr Shemer: bishemer@email.unc.edu

BIOL 395H - Honors Research in Biology

The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward Students who take 395H meet for an hour and a half each week (in addition to the research that they do in their own labs) and work on research-related skills. We run workshops on literature search, you will discuss and analyze primary scientific literature, you will practice in scientific writing, and the icing on the cake- you will learn how to present your own research.

You do not have to be an honors student to enroll in 395H (you do have to have a GPA of 3.00 or higher).

BIOL	409L	401	3643	PRINTMAKING AND BIOLOGY	Lab	1	A
						(In Person On Campus Learners)	

BIOL 409L & ARTS 409H | Merging Printmaking and Biology - must take class & lab together!

M, 11:00 am - 2:00 pm. Instructor(s): Bob Goldstein / Beth Grabowski. Enrollment = 14.

ARTS409H and BIOL409L together will bring together art majors and science majors to learn theory and practical skills in both art and science, and to make use of this learning to make artworks using a variety of printmaking techniques. Units in this course are organized according to topics in biology. As students learn specific biological concepts and practical lab skills, they will gather and generate visual information and pose questions that arise from scientific looking. This will become the source material (images, processes and ideas) for printmaking projects.

In the print studio, the course will introduce specific technical approaches within three categories of printmaking: intaglio (photogravure), relief (large-scale wood cut and/or letterpress) and stencil printing (screen-printing). Students will learn how to make printing matrices (plate, block or screen), how to print these matrices and explore the affordances of these technical skills (print strategies) as unique approaches to art-making. Email professors Dr Goldstein (bobg@unc.edu) and Dr Grabowski (beth.grabowski@unc.edu) with your PID number, major and why you want to take this exciting class/lab combo.

(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:

<https://forms.gle/qvdBoW26cbyfcQhGA>

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

TITLE: Bread from Air: The Chemistry of Fertilizers

DESCRIPTION:

Fear of a global famine inspired chemist Fritz Haber's research into the production of ammonia from nitrogen in the air. Following a breakthrough laboratory discovery, engineer Carl Bosch led the development of a large-scale industrial process to produce ammonia; and together they changed the world. This First Year Seminar will introduce concepts of scientific inquiry and interdisciplinary collaboration in the context of the humankind's utilization of fertilizers. Weaving together elements of plant biology, chemical synthesis and catalysis, environmental science, and technoeconomic analysis, the course will critically examine the past, present, and future of fertilizers.

ELIGIBLE STUDENTS

CHEM	101	001	4738	GEN DESCRIP CHEM I	Lecture	3	A
					(In Person On Campus Learners)		
Three midterm exams will be given in class on the following Wednesdays at 6:30pm (Eastern Time): September 14, October 12 and November 9. Course expectations are that you will take all midterms.							
EXAM MAKE-UP REQUESTS & ALTERNATIVE EXAM POLICY:							
Course expectations are that you will be in attendance for every exam, and that you work your schedule around these exam times. However, the case of serious illness, family emergency, religious holiday, class conflict, or varsity athletic travel there is an alternative exam time provided 6:30 am (Eastern Time) on the Thursday morning following the scheduled exam.							
You cannot show up to the alternative exam time unless you have received approval from your instructor prior to the official make-up exam date. The following provides guidelines for requesting the alternative exam time.							
Bldg: Genome Sciences Bui				Room: G100	Days: MWF	Time: 08:00 - 08:50

IDEAS IN ACTION GEN EDS: FY-LAUNCH, FC-NATSCI

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

CHEM	101L	401	5036	QUANT CHEM LAB I	Lab (In Person On Campus Learners)	1	A

Use Waitlists on Connect Carolina until the registration period is complete.

· Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.

· Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.

· Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

GR1

Class Equivalents: CHEM 102/102H

TITLE: FY Launch: General Descriptive Chemistry II

IDEAS IN ACTION GEN EDS: FY-LAUNCH, FC-NATSC

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year

CHEM 102H.001 | Advanced General Descriptive Chemistry

TR, 2:00 pm - 3:15 pm. Instructor(s): Todd Austell. Enrollment = 35.

CHEM 102H is recommended by the Chemistry Department for incoming first year students who have taken Advanced Placement Chemistry or the equivalent and plan to major in chemistry and/or plan a career as a research scientist. CHEM 102H focuses on a more in-depth treatment of topics traditionally covered in two semesters of freshman courses. The topics covered have been identified by the Department of Chemistry faculty as essential for success in and a good foundation for more advanced study in chemistry and other areas of the basic and applied sciences. The textbook, lectures and course work require a willingness to accept rigorous academic challenges and a solid high school background in algebra, coordinate geometry, and trigonometry. Differential and integral calculus will be used only where necessary in derivations and with explanation.

STUDENTS ELIGIBLE FOR ENROLLMENT IN CHEM 102H ARE INCOMING FIRST YEAR STUDENTS WHO HAVE RECEIVED AN ADVANCED PLACEMENT SCORE OF 5 AND HAVE BEEN GRANTED

CHEM	102L	401	5075	QUANT CHEM LAB II	Lab	1	A

Use Waitlists on Connect Carolina until the registration period is complete.

- Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
- Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
- Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

GR1

Use Waitlists on Connect Carolina until the registration period is complete.

• Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.

• Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.

• Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty

seats that open during the week of check-in

CHEM 261H.001 | Honors Organic Chemistry I

TR, 9:30 am - 10:45 am. Instructor(s): Marcey Waters. Enrollment = 25.

Molecular structure and its determination by modern physical methods, correlation between structure and reactivity and the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion and some use of computer modeling techniques.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.

DEPARTMENT OF CHEMISTRY CONSENT REQUIRED. EMAIL chemus@unc.edu.

Professor Waters's research interests are at the interface of organic chemistry and biochemistry. The overarching goal of her research is to design

CLAS 051H.001 | Greek Drama on Page & Stage

MWF, 12:20 pm - 1:10 pm. Instructor(s): Alexander Duncan. Enrollment = 24.

Taking a participatory approach to ancient Greek drama, this course pairs readings from three Athenian playwrights (Aeschylus, Euripides, and Aristophanes) with performance-oriented activities and scholarship.

At its most traditional, this course surveys the historical and cultural context of the so-called ¿classical¿ Athens of the fifth-century BCE, emphasizing the political, religious, and aesthetic forces that gave rise to humankind¿s first recorded theater. More innovatively, this course probes the dual nature of theater, its distinct but intertwined existences as codified script and socially-embedded performance, through sustained investigations of some of its most influential texts and their modern reception in a global context with case studies focused on post-Apartheid South African and 21st-century Chicana

CLAS 057H.001 | Dead and Deadly Women on the Western Stage

TR, 12:30 pm - 1:45 pm. Instructor(s): Sharon James. Enrollment = 24.

In this course, we will study the great tragic heroines of ancient Greek drama, focusing on Clytemnestra, Medea, Alcestis, Phaedra, the Trojan Women, Antigone. We will also read a contemporary novel, by Fay Weldon, that engages many of these mythic women. We will study the Greek tragedies intensively, along with their reception in later art, from paintings to poems, stage productions to sculptures, operas to ballets. Our questions will include: why does Greek tragedy focus so intensely on women? Are the playwrights misogynists or do they express some sympathy for women? What about these female characters grabbed the imaginations not only of ancient Greek playwrights but of later writers, painters, composers, not to mention readers? How are their stories relevant to the 21st century? Did the ancient Athenians know something we don¿t?

FIRST YEAR STUDENTS ONLY.

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

CLAS 131H.001 | Classical Mythology

MWF, 12:20 pm - 1:10 pm; Recitation: W, 3:35 pm - 4:25 pm. Instructor(s): James Rives. Enrollment = 24.

The purpose of this course is to introduce students to the myths of the ancient Greeks and Romans, the stories about gods, goddesses, and heroes that were told and retold over a period of centuries. The emphasis will be not simply on learning these stories, but on studying them in their historical context. How were they transmitted? What roles did they play in Greek and Roman culture? What can we learn from them about the way that the ancient Greeks and Romans understood the world around them? In our explorations we will concentrate on literary texts, especially epic and tragedy, but will also consider visual sources, especially vase painting and sculpture. As another way of exploring the significance of myth in ancient Greek and Roman society, we will also examine analogous phenomena in our own society.

I received my BA from Washington University in St. Louis in 1984 and my PhD from Stanford University in 1990. After teaching at Columbia University in New

CLAS 362H.001 | Greek Tragedy

MWF, 12:20 pm - 1:10 pm. Instructor(s): Emily Baragwanath. Enrollment = 24.

Classical Greek tragedy ended well over two thousand years ago but still captivates audiences today. This course will explore why that is. What are the central questions of the genre? We will read Greek tragedies, some familiar (Agamemnon, Antigone), others less so (Euripides' Electra) and Aristophanes' Frogs, a no-holds-barred comedy in which a battle of wits & words is waged in the underworld between the ghosts of Aeschylus and Euripides. As well as paying close attention to the original performance context, we will examine the ways in which these tragedies tackle difficult and compelling questions about agency, responsibility, the relations between individuals and their families and societies, politics, gender, the divine, the nature of human fate, and responses to war.

In order to actualize a more fair, just, and equitable society, it is essential that we hone an awareness of the political dimensions of technological systems and work toward the design of better ones. The goal of this course is to foster such a critical technological literacy. It will cover gig economy platforms and labor relations, surveillance and policing algorithms, and the environmental impact of technological infrastructures.

Course Topic: Evolution of Storytelling in American Electronic News Media
Course taught by special guest lecturer and alumnus, James Lampley.

The course is designed as an interactive examination and discussion of the techniques, processes and phenomena by which electronic news delivery in the United States began with early radio transmissions and developed into our current infinitely broad landscape of personal and professional storytelling. Students will share in the process of reading books and articles, viewing and hearing tape artifacts, cataloguing and interpreting the dynamics of this evolution, all under the guiding stimulus of an instructor with forty five years of experience in high profile roles in network television sports, news and entertainment.

There will be reading assignments which translate into oral presentations, and two examinations in short essay form, a mid term and a final. But most

We live in surveillance societies. Just about every element of our lives is affected by surveillance: workplaces and schools, social media sites and mobile

phone use, police encounters and security screening. Surveillance practices shape how institutions operate and how people see themselves and others. The goal of this course is to develop a critical awareness of surveillance and its implications for society.

Course descriptions:

This course will provide an introduction to the history and development of "Theory" as the foundation for much of the most interesting thinking and research in the humanities and social sciences. In the contemporary intellectual universe, "theory" provides a common language of concepts and methods that enable intellectuals and scholars investigating human social and everyday life to speak to one another-- across disciplines and geographies, comparable to the way

statistics and experimentation function in the more traditional models of science (including some social science work).

"Theory" includes many of the major schools of modern and contemporary philosophy (that stand in opposition to what is often referred to as "analytic philosophy, " which often dominates Anglo-American philosophy departments); but it also includes other-- less traditionally "philosophical"--positions. At the same time, "theory" differs from "philosophy" in so far as it is interested in providing the foundation for more empirically oriented understandings of concrete instances of human relations, practices, etc. What philosophy and theory have in common is that they provide a set of tools--concepts, filters,

GR3

The overarching objective of COMM 702 is to introduce graduate teaching assistants to the practice and theory of teaching undergraduate students at UNC. The course will provide practical advice and tips about teaching. The beginning and middle of the course will focus on practical elements of teaching, such as people management (ie. navigating classroom relationships, classroom climate, and disruptive students), classroom management (ie. fostering class discussion, classroom activities, and lectures), and document management (ie. preparing syllabus, choosing reading assignments and grading). The final few weeks of the course encourages contemplation about the theory of teaching and the role of the professoriate in academe. Course content and class discussions are designed to encourage intellectually rigorous and personally meaningful conversations about our teaching and how our personal perspectives of teaching and learning influence our practices as teachers. We will read about and discuss different approaches to teaching, the enactment of communication instruction, and growing as a teacher. You will leave this course with materials designed to help you as a new teacher, such as a course syllabus, a lesson plan, and a draft of your statement of teaching philosophy.

THE TOPIC OF THE COURSE WILL BE ONE OF THE FOLLOWING AND WILL BE TAUGHT BY DR. AVI SANTO, INCOMING CHAIR OF THE DEPARTMENT OF COMMUNICATION

1)Consumer culture - a seminar exploring the emergence of consumer culture in the 19th Century through its current iteration within neoliberalism and brand culture, with a particular focus on its intersections with media, advertising, and entertainment licensing

2) Children's culture - a seminar exploring how the "child" has been reimagined over the course of the 19th-20th-21st centuries and how such reimagining intersects with sifting media and play policies, practices, and tools.

3)Media audiences - a seminar exploring how the fields of communication and media studies have approached studying media audiences, including effects research, active audience research, industry constructions of ways audiences "count," and fan studies (if this one is too broad, I'd also consider a seminar

This seminar will examine politics, cultures, and ethics of care. We will not begin with the presumption that care is a self-evident good. We will think through care as both a mechanism of discipline, control, and coercion, as well as the foundation of many praxes of resistance to forms of oppression and dispossession. Rather, we will treat care as a problematic concerning the distribution of moral responsibility across social, cultural, political and economic boundaries. We will use the concept as a springboard into the exploration of political and ethical life and of different governing regimes of life itself. Our inquiry will consider accounts of humanitarian aid and sanctuary, carceral social reproduction, feminist praxes, care work, biopolitics, repair work, extinction and interspecies kinships, social reproduction, disability justice, decolonial aesthetics, and other topics, exploring distributions of care, its effects, and what moral/ethical logics, structuring regimes of personhood, and modes of politicization it entails. Along the way we will also consider care in relation to other core concepts such as harm, giving, value, exchange, coercion, vulnerability, hospitality, sovereignty, responsibility, dependency and interdependency. Ultimately, we will cultivate vocabularies and sensibilities around the question: how is care's morality established in practice and how is moral responsibility assigned and distributed in different care regimes? We think throughout the class about why care has surfaced

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

Underlying the many applications of computers in our daily life are discrete structures like Boolean logics, relations, finite state machines, graphs, and networks that have mathematical specifications. You can tell your parents that the primary purpose of this class is to introduce these discrete structures and the formal proof techniques that support the production, verification, and maintenance of correct software. In fact, many of these are familiar from puzzles and games: already in 1990 Super Mario World expects kids to immediately understand a finite state machine diagram. This is a language class: you will learn vocabulary and idioms of a language that is more precise and less ambiguous than the languages that we usually speak or write. With any new language, you may at first struggle to make yourself understood, but by frequent immersion and fearless practice you can become comfortable thinking and expressing yourself creatively in the language. Students pick up languages at different rates, so work to teach each other. All can gain fluency with effort and a willingness to make mistakes. And fluency will help all your computer science endeavors: precise and unambiguous

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

DRAM 081H.001 | Staging America: The American Drama

TR, 2:00 pm - 3:15 pm. Instructor(s): Greg Kable. Enrollment = 24.

This seminar examines our national drama from its colonial origins to the present. Participants read plays and criticism, screen videos, engage in critical writing, and consider performance as related means of exploring the visions and revisions constituting American dramatic history. We will approach American drama as both a literary and commercial art form, and look to its history to provide a context for current American theater practice. Readings are chosen for their intrinsic merit and historical importance, but also for their treatment of key issues and events in American life. Our focus throughout will be on the forces that shaped the American drama as well as, in turn, that drama's ability to shed light on the national experience.

FIRST YEAR STUDENTS ONLY.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

ENGL	89H	001	11012	FYS: SPECIAL TOPICS	Lecture	3	A
					(In Person On Campus Learners)		
Bldg: Greenlaw		Room: 0317	Days: TuTh	Time: 12:30 - 13:45	AMERICAN POETRY IN M		
					INST	100	Instructor: RICHARDS,ELIZA C
Class Enrl Cap:0		Class Enrl Tot:0		Class Wait Cap:0		Class Wait Tot:0	
						Class Min Enrl:0	
					GR1		
Class Equivalents: ENGL 89/89H							

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

ENGL 089H.001 | American Poetry in Motion

TR, 12:30 pm - 1:45 pm. Instructor(s): Eliza Richards. Enrollment = 24.

In this course we will read recent poems that communicate intensely personal experiences in ways that allow them to be shared, understood, and appreciated by others. We will focus on the work of those who turn to poetry to create space for marginalized or suppressed perspectives. We will explore how social and cultural conditions both limit and enable poetic expression; how poets engage in social and political movements; and to think about the ways writers express themselves in their work. Readings will be chosen from books awarded the Pulitzer Prize for Poetry in the present century. The course seeks to develop close reading skills that are crucial for interpreting poetry; to strengthen writing and oral communication skills; and to develop research skills.

FIRST YEAR STUDENTS ONLY.

ENGL 089H.002 | The Machine Mistake from Frankenstein to the Smartphone

MWF, 11:15 am - 12:05 pm. Instructor(s): David Ross. Enrollment = 24.

There is the assumption that science fiction propagandizes for the gleaming gadgetry that it depicts. It's true that science fiction often endorses the scientific endeavor and worldview. It's further true that the science fictionists of the 1940s and 1950s tended to pine for the space age that began in 1969. But even at its giddiest and wonkiest, science fiction remembers the lesson of Frankenstein. It remembers that our monsters develop ideas of their own; that they wind up haunting us and even hunting us; that our innovations, however seemingly benign, however fenced and fail-safe, threaten to escape our control and our comprehension. This course traces the genealogy of this machine anxiety. Our guiding questions will be: What are machines? Does the artificially intelligent machine cease to be a machine? Are machines natural or unnatural? Are they heretical? Are their dangers inherent? How do they change us? Our course epigraph might paraphrase Winston Churchill: We shape our machines; thereafter they shape us.

Our core in-class activity will be aggressive discussion of the cultural, philosophical, political, and psychological questions that our course materials

Coding, algorithms, data visualization;these technological words may seem completely unrelated to fields of study such as Literature, Philosophy, History, and Art, but they actually play a key role in shaping culture, society, and even human thought today ; issues at the heart of the Humanities.

As a result, a new interdisciplinary area of study, known as Digital Humanities, has emerged to both explore the impact of technology on society and use new digital methods to analyze traditional materials in the Humanities, such as texts, objects, and archives. In English 105i: Writing in the Digital Humanities, we will explore this new area of study by completing three unit projects, each dedicated to learning a key digital method in the field and the types of composition and writing that result from it. Our central theme will be maps and mapping, with the idea that maps;as a ubiquitous and historical tool and process;resonate with the tools and processes afforded by new computational technologies.

We will learn how to write within this discipline and along the way we will try to answer the question: how do the humanities work with computers?

ENGL 132H.001 | Honors: Intro to Fiction Writing

TR, 11:00 am - 12:15 pm. Instructor(s): Bland Simpson. Enrollment = 15.

This course is a collective, collaborative exploration of the techniques of fiction, through close reading and discussion of classic short stories to the writing of short exercises dealing with the elements of fiction (setting, characterization, dialogue, point of view, etc.) and, later in the term, one short story (2,000-5,000 words). There is a midterm examination. The class is a seminar, a workshop with both written and oral critiques of student works required, and students can expect a lively and encouraging atmosphere as we investigate and practice the imaginative craft of fiction writing.

FIRST YEAR HONORS CAROLINA STUDENTS ONLY.

Open to First-Years and Sophomores.

ENGL 223H.001 | Chaucer

TR, 11:00 am - 12:15 pm. Instructor(s): H. M. Cushman. Enrollment = 24.

Chaucer's The Canterbury Tales is an extraordinarily wide-ranging poem. It is characterized by variety, surprise, and quick movements from one narrative world to a completely different one. With the turn of a page, the reader finds herself on a medieval pilgrimage, then in the aftermath of an ancient Mediterranean war, then in the court of Genghis Khan, and then in a barnyard squabble between a rooster and a fox. One moment a serial-monogamous seamstress is explaining her theories about marriage, and the next a friar is puzzling over how to divide a fart. We will read each of these tales in the original Middle English--with a little help along the way--and find out how all of these adventures and characters live together in one poem. There are no prerequisites for this course. All are welcome!

ENGL 268H.001 | Medicine, Literature, and Culture

MW, 8:00 am - 8:50 am; Recitation: F, 8:00 am - 8:50 am OR F, 9:05 am - 9:55 am. Instructor(s): Jane Thrailkill. Enrollment = 40.

This course provides an introduction to Health Humanities, an interdisciplinary field that combines methods and topics from literary studies, healthcare, and the human sciences. We'll read novels, screen films, learn about illnesses and treatments, and hear expert speakers as we investigate the importance of narrative in the time of high-tech medicine. We'll play close attention to how ideas about sickness have changed over time and across cultures. Topics will include the clinician-patient relationship, medical detection, the rise of psychiatry, racism and social determinants of health, epidemics and the outbreak narrative, and the quest for immortality.

Prerequisites: This course welcomes students from all fields; especially humanities majors and those interested in careers in healthcare and health affairs.

Spend this term in some exciting places. Plunge down the rabbit hole with Alice, get whirled to Oz with Dorothy or fly to Neverland with Peter and Wendy, go shopping on Diagon Alley with Harry and Hagrid.

In English 284 Reading Children's Fiction read (or reread) some of the most influential and lasting books written in English. Enjoy works hailed as classics alongside works recovered for their importance and vitality: get lost in the pictures and stories of the children's magazine, The Brownies Book, edited by W. E. B. Du Bois and a masterwork of the 1920s.

This course considers how to define children's literature (from nursery stories through young adult).

What stories do these books tell? How do they tell them?

We focus on illustrated books for children that have established or transformed that genre. We locate children's books within the history of illustration to explore conventions of visual story telling. How do images reflect, extend, or dispute written meaning? How do they reveal changing ideas of children or childhood?

We compare different depictions of classic forms--fables, nursery rhymes, fairy and folk tales--as well as the roles of pictures in primers and readers. We read books transformed by their pictures--the Alice books, Oz, Treasure Island. The role of photography takes us into twentieth-century illustration. How does medium shape meaning?

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

ECON 101H.01F | Introduction to Economics

MWF, 1:25 pm - 2:15 pm; Recitation: T, 2:00 pm - 2:50 pm. Instructor(s): Rita Balaban. Enrollment = 35.

Introduction to fundamental issues in economics including competition, scarcity, opportunity cost, resource allocation, unemployment, inflation, and the determination of prices.

Rita Balaban is a Teaching Professor in the Department of Economics at UNC-Chapel Hill where she has been a faculty member since 2006. She earned her Ph.D. from the Department of Economics at the University of Pittsburgh in 1999 and prior to her arrival at UNC-CH, she taught at Samford University and the College of Charleston. Rita is an experienced teacher whose teaching interests are in Applied Microeconomics, specifically the Economics of Sports. She has won several university-wide teaching awards including the Chapman Family Award (201) and the Tanner Award (2015) for Excellence in Undergraduate Teaching. Her research interests are in economics pedagogy and she has presented her work at conferences in Wilmington, Philadelphia and San Diego.

ECON 327H.005 | Sports Entrepreneurship

TR, 9:30 am - 10:45 am. Instructor(s): Chris Mumford. Enrollment = 24.

The newly-emerging field presents many opportunities. General sports are dominated by oligarchs -NFL, NBA, MLB, NCAA, NHL, MLS - where the cost of entry is hundreds of millions of dollars.

In this course, we will explore Sports Verticals with high growth and lower barriers to entry. These include eSports, analytics, fantasy/betting, youth sports, fitness and health technology and enhanced fan experience. Students will be organized into teams and deep dive into these areas and present findings and a written report and summary presentation. Afterwards, we will develop a sports startup with a presentation & website.

Prerequisite: ECON 325 or PLCY 327.

ECON 400H.001 | Elementary Statistics

TR, 2:00 pm - 3:15 pm; Recitation: M, 9:05 am - 9:55 am. Instructor(s): Christopher Handy. Enrollment = 24.

Course description: Comprehensive introduction to statistics, including descriptive statistics and statistical graphics, probability theory, distributions, parameter estimation, hypothesis testing, simple and multiple regression, and use of powerful statistical estimation software. This course includes a substantial introduction to basic econometrics.

PREREQUISITE: ECON 101, STOR 155, and one of MATH 152, 231, STOR 112 or 113.

Chris Handy is a Teaching Assistant Professor in the Department of Economics at UNC-Chapel Hill, where he has been a faculty member since 2021. He earned his Ph.D. at Cornell University in 2013, and taught at Washington and Lee University for eight years before arriving at UNC. He is a labor economist with

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

ECON 510H.001 | Advanced Microeconomic Theory

TR, 3:30 pm - 4:45 pm. Instructor(s): Jaden Chen. Enrollment = 24.

The course is divided into two parts. First, game theory is covered. Second, we investigate the role of information in economic settings. A term paper is required.

NO FIRST YEAR STUDENTS.

GR1

The course is designed to advance analytical skills in the field of applied labor economics. The course covers empirical models of labor supply, human capital, earnings, income inequality, informality, and the current COVID-19 crisis. Students will learn how researchers evaluate policies affecting labor markets, including tax and welfare reforms, education programs, minimum wage and labor regulation, and COVID-19-related policies. The course mostly focuses on the U.S. labor market. Students will improve programming skills in Stata and use real-world survey data in writing a research project.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit

<https://honorscarolina.unc.edu/academics/courses/#register>

ENEC 201H.143 | Introduction to Environment and Society

MWF, 10:10 am - 11:00 am; Recitation: M, 3:35 pm - 4:25 pm OR M, 3:35 pm - 4:25 pm. Instructor(s): Greg Gangi. Enrollment = 24.

This course will explore changing human-environmental relations from a variety of social, geographical, and historical settings. While some lectures do include material from the natural sciences this is a social science class. The class cuts across a large number of disciplines in a manner that is integrative rather than segregating lessons from different academic disciplines into separate lectures. The focus of this course is in the first half of the class to give students familiarity with how humans and human organizations deal with issues of sustainability. The second half of the semester will explore some critical issues like population, food security, climate change, urban planning and transitioning to a low carbon economy. This part of the course will not only give student information important background information about the problems but also highlight possible solutions.

In addition, to weekly class lectures, students will attend a one-hour recitation session to enjoy small-group discussion and to explore related topics of

This semester-long course, Carolina Sustainability Consulting, will provide undergraduate students the opportunity to put theory into practice by working with clients on projects with an environmental benefit. Working on strategically significant projects, students will put into practice lessons learned in the foundational courses they have obtained throughout their time at UNC and will acquire leadership skills valued in the marketplace such as change management, team work, identifying and overcoming obstacles, and developing buy-in. With a foundation in the scientific method, this course will demand that students solve a problem posed by a client by proposing hypotheses and by conducting literature reviews, primary research, and examining applicable case studies. Students will collect data and evaluate and report on results, making relevant and implementable recommendations. This project-based learning experience will be supplemented with lectures and guest speakers so that students acquire project- and career-relevant skills.

EURO 239H.001 | Introduction to European Government

W, 2:30 pm - 5:00 pm. Instructor(s): Niklaus Steiner. Enrollment = 4.

This course focuses on key political features that are widely and varyingly used in European democracies, such as multi-party systems, parliaments, and proportional representation. It also focuses on key issues that are causing much debate in Europe today, including migration, nationalism, citizenship and populism. An important element of the class is to explore the interaction between these features and issues, how they developed historically especially since 1945, and what might lie ahead for them and for Europe. This class encourages students from a wide range of backgrounds, experiences and perspectives to enroll because it benefits significantly from such diversity. No prior knowledge or experience is needed; instead, students need to be ready to dig

CROSSLISTED W/ POLI 239H.

Reserve Capacity: 17-MAR-2022 RC PLAN UGRD HONORS				Reserve Enrl Cap: 18		Reserve Enrl Tot: 18		

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

Global demand for primary commodities and energy resources (hydrocarbons, hydropower, minerals, agriculture) drives the expansion of extractive frontiers across Latin America. Meanwhile, more environmental defenders were killed in the region last year than anywhere else in the world, and thousands of forcibly displaced peoples are in search of asylum. How is the current expansion of resource frontiers entangled with rural wellbeing and human rights in Latin America? And how are the inequities generated by capitalist expansion expressed and experienced, physically, emotionally, and epistemologically? This seminar-style, research-intensive course examines these questions, with a focus on environmental justice and wellbeing and their relation to current resource extraction trends. The course offers students the space for developing an indepth look at extractive histories, political ecology and economy, and decolonial thought in Latin America, and builds on select cases to craft students' own inquiry of contemporary environmental injustices in the region.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit

<https://honorscarolina.unc.edu/academics/courses/#register>

GEOL 072H.001 | Field Geology of Eastern California

TR, 2:00 pm - 3:15 pm. Instructor(s): Drew Coleman. Enrollment = 20.

Have you ever wanted to stand on a volcano, see a glacier, trace out an earthquake fault, or see the Earth's oldest living things? This seminar is designed around a one-week field trip to eastern California, where students will study geologic features including active volcanoes, earthquake-producing faults, and evidence for recent glaciation and extreme climate change. Before the field trip (which will take place the week of Fall Break and be based at a research station near Bishop, California), the class will meet twice a week to learn basic geologic principles and to work on developing field research topics. During the field trip students will work on field exercises (e.g. mapping, measuring, and describing an active fault; observing and recording glacial features) and collect data for the research projects. After the field trip, students will obtain laboratory data from samples collected during the trip and test research hypotheses using field and laboratory data. Grading will be based on presentation of group research projects, and on a variety of small projects during the trip (notebook descriptions, mapping projects, etc.). Students may be required to pay some of the costs of the trip (a maximum of about

Combined Section ID: 1497(gsl1/jwst56.001) - JWST 56(#14329)

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

HIST 174H.001 | Honors Seminar in African, Asian, and Middle Eastern History

M, 2:30 pm - 5:00 pm. Instructor(s): Cemil Aydin. Enrollment = 24.

This course will focus on imperial experience and decolonization of Asia and Africa from the 1870 to the 1970s. Course readings will explore the content of the anti-colonial critique of the international order and visions for a post-imperial new world in Asian and African intellectual history. Students will examine Pan-Africanism, Pan-Asianism and Pan-Islamism, as an important trends in the process of decolonization. What are the legacies of Pan-African, Pan-Asian and Pan-Islamic thought and ideas in contemporary politics of the world? While focusing on Pan-Nationalism, this course will revisit the debate on Orientalism and racial thinking from the perspective of international history. How did ideas and ideologies about difference and hierarchies among races, religious groups and continents shape the evolution of the modern world order? Topics will include the history of international law, multiple internationalisms, as well as debates on cosmopolitanism and universalisms.

HIST 189H.001 | The Global Order from World War II to the Present

TR, 2:00 pm - 3:15 pm. Instructor(s): Klaus Larres. Enrollment = 24.

This course deals with the establishment of the rules-based global order toward the end of the Second World War and analyzes the development of that order throughout the Cold War years and the post-Cold War era up to the present. The course has three main parts:

1. Analysis of the establishment and nature of the Bretton Woods system;
2. outline and analysis of the most important international institutions and intergovernmental organizations which have remained relevant in today's global order;
3. analysis of the challenges to the rules-based global order that have emerged in the 21st century.

HIST 269H.001 | The History of London, World City, 1890-Present

TR, 9:30 am - 10:45 am. Instructor(s): Susan Pennybacker. Enrollment = 24.

We explore the history, culture and politics of London as a world city, tracing her past from the decade before the First World War, through the `Swinging; 1960s, to the present-day. We see London's history reflected in the built environment, cultural institutions, and, in the arts, set against the background of the city's changing racial, ethnic, religious and socio- economic composition. London was the seat of a vast and contested empire, and remains one of the world's most important cosmopolitan centers of culture, politics and commerce, signified by Parliament and the financial district of `the City; but even more so by the world's peoples who are her residents. At present, this multi-racial and international environment is deeply challenged by the events of Brexit, the pandemic, the 2022 war in Europe and its legacies, and by the global Black Lives Matter movement. The course explores the transformation of the metropolis over the long twentieth century that witnessed two global wars and the break-up of Britain's former empire. London's streets, markets, parks and towers; her splendid squares and distinct neighborhoods; her food culture, cinema, museums and her theatre; all offer evidence of historical transition and

History 398-001: Seeing the Past

The value that we attach to seeing something for ourselves, and then being able to describe what we have seen to others, is central to our cultural interaction. Seeing is the privileged form of sensory perception and consequently a common metaphor for understanding itself: ¿I see what you mean,¿ we say, or ¿My view on this has changed.¿ In the criminal legal process, great weight is attached to eyewitness testimony, whereas convictions based only on hearsay are rightly considered unsound. But eyewitnesses can also be fallible or mendacious: there are many notorious cases of legal convictions that were based on seemingly compelling eyewitness evidence but were subsequently proved to be miscarriages of justice. Eyewitness is also a key criterion for how historians evaluate their primary sources and arrange them in hierarchies of importance: in the history books and articles that you have read, you will doubtless have come across numerous comments to the effect that such-and-such a source is reliable because its author was present at the events recorded in it, while another source is of lesser significance because it is second hand.

History 398-002: Nazi Germany

This undergraduate seminar explores Nazi Germany with the help of original documents, compiled by the German Historical Institute in Washington DC. Students will be free to choose their own research topics, ranging from Hitler¿s rise to power all the way until the post-war trials of Nazi perpetrators. Some of the key issues the seminar will deal with are the Nazi dictatorship, the Second World War and the Holocaust. The approach focuses on the selection and interpretation of primary documents which will help debunk some of the many myths surrounding the Third Reich. Assignments involve a document presentation and a research paper.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

History 398-004: Muhammad Ali and Hist Times

In this seminar students will explore the life of Muhammad Ali and the political and cultural contexts in which he lived. Special attention will be paid to Ali as figure of Black Nationalism and his role in the Revolt of the Black Athlete. Students will write a 20-25 page original research paper exploring some aspect of Ali's life or boxing career, or a story involving sport and political protest from his era.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.

At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

HIST 398-005: Leisure-time and Making of Modern America

Today Americans are deeply invested in leisure. It assumes an almost sacred significance in our personal lives and is widely acknowledged as an indicator of the economic health of the nation itself. Yet leisure has not always enjoyed such widespread consensus. In this course we will turn our attention to a moment when rancor about leisure permeated American communities, homes and especially the pages of newspapers and magazines. This is a research seminar that uses leisure to explore American life between 1880 and 1945. It was precisely in this moment that working Americans began to enjoy increasing amounts of spare time. Leisure itself changed, too, in this period. Commercial forces overhauled the kinds of leisure activities that were available. By the early twentieth century new kinds of amusements such as movie theaters and dance halls enjoyed increasing appeal in towns and cities throughout the country. These spaces nurtured a set of outlooks, identities and modes of social interaction we have come to associate with modern life. We will use the array of activities and entertainments Americans pursued beyond the workplace to explore the social, cultural and economic dimensions of

HNRS 390.001 | Indigenous Spirituality in Modern Sinophone Literature

TR, 2:00 pm - 3:15 pm. Instructor(s): Robin Visser. Enrollment = 24.

This course examines spiritual motifs in modern Sinophone literature (in English translation) by Indigenous, ethnic minority writers in China and Taiwan. We will read fiction, essays, and poetry by Indigenous Taiwanese, Tibetan, Mongol, Uyghur, Kazakh, Hui, Yi, and Wa writers. These works express spiritual principles from a wide variety of beliefs and cosmologies, including Tibetan and Mongolian Buddhism, Islam, Shamanism, Animism, and Christianity. Rapidly changing relations between humans and their environments due to climate change and green governance policies mean that communities which once flourished in coastal regions as fisher people, in grasslands as mobile nomads, in mountainous regions as foragers, are often resettled into state-owned pastures, farms, towns, and cities. As forced assimilation threatens native languages and cultural heritage, many Indigenous writers function as ¿priests of culture,¿ providing spiritual inspiration to their readers by lyrically evoking powers beyond the human.

HNRS 390.003 | Narrative and Medicine

M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 20.

This seminar explores the role of narrative in medicine from two sides: the patient's experience of illness, and the experience of caring for the sick. As a writing workshop, this course offers students a supportive environment in which to explore their own experiences and refine their writing skills.

Pandemic conditions permitting, it provides an opportunity for service work in a variety of clinical settings, in which students will have a chance to participate in medical care. Taught by a clinician-writer with years of experience in medical care, professional publication, and workshop instruction, this course offers a rare opportunity to learn from a highly skilled professional engaged in the central concerns of his work.

3.0 CREDIT HOUR COURSE; FULFILLS LITERARY ARTS (LA) & EXPERIENTIAL EDUCATION (EE) REQUIREMENTS.

HNRS 390.005 | Current Challenges in Criminal Justice

M, 2:00 pm - 4:30 pm. Instructor(s): John Rubin. Enrollment = 20.

We will consider current challenges facing, and sometimes created, by the criminal justice system. We will look at criminal justice policies and practices in North Carolina and the U.S. generally and explore their effectiveness and impact, including their impact on people accused of a crime. Each class or sequence of classes will examine a different set of issues. Do poor people have equal access to justice? Is policing nondiscriminatory? How should we treat people who have mental health problems and commit crimes? How well can people resume their lives after their involvement with the criminal justice system? We will explore these topics through a combination of readings, class discussions, guest lectures and, logistics permitting, site visits. The course will culminate in student-led presentations on topics of the students' choosing.

Michael Terry. Enrollment = 24.</p> <p>This course provides an introduction to the field of linguistics, which can be defined as the scientific study of language. Throughout the semester, we will examine a number of subfields which make up the core of contemporary linguistic research. These include syntax (sentence structure), semantics (meaning), pragmatics (interrelationship between syntax, semantics, and conversational interaction), morphology (word formation), phonetics and phonology (speech sounds and sound systems), historical linguistics (language change), sociolinguistics (language variation and the social factors that promote or inhibit such variation), language acquisition (the development of language in children), and language and the mind (the relationship between our linguistic abilities and knowledge and the rest of our cognition).</p>

GR1

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

GR1

ELIGIBLE STUDENTS

Seats are limited to incoming fall 2022 transfer students with fewer than 24 transfer credits and incoming fall 2022 first-year students.

REGISTRATION PROCEDURES

Some incoming first-year students may be pre-registered into this class section per their pre-registration survey responses. Incoming transfer students with fewer than 24 transfer credits may register for these sections as soon as their registration window begins. The seats leftover after first-year pre-registration and transfer student registration are made available during new first-year student registration sessions beginning in July.

VERY IMPORTANT: HONORS STUDENTS WHO INTEND TO REGISTER FOR A FALL 2022 HONORS COURSE, SHOULD DO SO DURING WAVE 1 OR WAVE 2. WHEN OPEN ENROLLMENT BEGINS ON APRIL 25, HONORS COURSE REGISTRATION WILL BE SUSPENDED IN ORDER TO RESERVE ALL REMAINING SEATS FOR INCOMING FIRST-YEAR HONORS STUDENTS. CONTINUING STUDENTS WILL NOT REGAIN REGISTRATION ACCESS FOR HONORS COURSES UNTIL AUGUST 8. For more information, please visit <https://honorscarolina.unc.edu/academics/courses/#register>

MATH 062H.001 | Combinatorics

TR, 12:30 pm - 1:45 pm. Instructor(s): Ivan Cherednik. Enrollment = 20.

A leading expert in Modern Combinatorics wants to share his vision of the subject with the students. The seminar is a perfect background for future specialists in mathematics, physics, computer science, biology, economics, for those who are curious what statistical physics is about, what is cryptography, and how stock market works, and for everyone who likes mathematics.

The course will be organized around the following topics:

- 1) Puzzles: dimer covering, magic squares, 36 officers
- 2) Combinations: from coin tossing to dice and poker
- 3) Fibonacci numbers: rabbits, population growth, etc.

MATH 233H.001 | Calculus of Functions of Several Variables

MWF, 12:20 pm - 1:10 pm; Recitation: R, 3:30 pm - 4:20 pm. Instructor(s): Mark Williams. Enrollment = 35.

Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

To register for this course, you should let Professor Sawon know your name and PID at the first class session. Note that registering for MATH294 is entirely optional: you don't have to register for MATH294 to participate in these sessions and/or the competitions. In particular, if you don't anticipate attending every week, it would be better not to register. Please let me know by email (sawon@email.unc.edu) if you want to participate and are unable to attend the

Math 294 will be held in Phillips 330, the Math Lounge, Fall 2022.

MATH 381H.001 | Discrete Math

MWF, 1:25 pm - 2:15 pm. Instructor(s): Emily Burkhead. Enrollment = 35.

This course serves as a transition from computational to more theoretical mathematics, designed to provide you with the fundamental skills necessary for success in situations that require you to read, write, and reason precisely when working with mathematics. Special emphasis is given to improving your fluency in the use of mathematical vocabulary and notation when writing and critiquing mathematical proofs. Topics are from the foundations of mathematics: logic and proof techniques, set theory, relations and functions, counting methods, and basic number theory. In many ways, this will be the first abstract math course in your academic career. Although we will explore specific, concrete examples whenever possible, this course requires you to hone your ability to analyze and articulate the logical essence of the problems being studied. In other words, you will be expected to learn how to communicate coherently and persuasively using the language and the grammar of mathematics. PREREQUISITE: MATH 232 OR 283.

MATH 383H.001 | First Course Differential Equations

MWF, 1:25 pm - 2:15 pm. Instructor(s): Jian Wang. Enrollment = 35.

The scientific method is arguably the single most important achievement of the modern era. Together with its technological implications, in the last four centuries it has shaped the world both physically and culturally, and continues to do so, like no other element in the history of mankind. The overall aim of the course is to learn the basic elements of the method through a combination of rigorous mathematical training, simple physical experiments, and

elementary mathematical modeling. The focus will be on ordinary differential equations, which can arguably be considered the ``birthplace" of the method. In class laboratory experiments will be presented about once per week. Students will be expected to collect data from the experiments, and apply differential equation models to attempt to predict the observed phenomena. Results will be reported in the Final Lab Report. Course material (including videos from experiments will either be posted at our {\bf sakai site, MATH383H.001.SP20}, or on a dropbox site if the files are too large for the sakai site.

Special functions, natural generalizations of the elementary functions, have been studied for centuries. The greatest mathematicians, among them Euler, Gauss, Legendre, Riemann, and Ramanujan, have laid the foundations for this beautiful and useful area of mathematics. For instance, Euler found the gamma function, which extends the factorial. The Bessel functions and Legendre polynomials play the role in three dimensions similar to the role of sine and

cosine in two dimensions.

This course presents an overview of special functions, focusing primarily on hypergeometric functions, including Bessel functions and classical orthogonal polynomials. We will discuss how special functions arise from several areas of mathematics and mathematical physics. We will begin with a treatment of the gamma and beta functions, which are essential for understanding hypergeometric functions. Later we will discuss Bessel functions, orthogonal polynomials, the Selberg integral and its applications, spherical harmonics, q-series.
