DESCRIPTION:
This seminar is designed to teach students how to navigate new intellectual terrain and process unfamiliar information from a variety of disciplinary perspectives with an emphasis on simulations, field study, reflections, and documentation. Each student will plan, implement, and document an individual short journey. This voyage of discovery on the campus or in the surrounding community will be chronicled with a documentary journal and presented to the class in a multi-media format that conveys the individual¿s perspective, journey, and discoveries. Additionally, the class will collaboratively plan, implement, and document a common full day journey. This required field study will be a core aspect of the experiential education connection for the course.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This registration window closes on July 9.

This class is cross-listed with NUTRI 715 / ANTH 175

This course introduces students to a wide range of topics covering food studies taught by faculty across the UNC campus as well as from Duke, NC State and outside of an academic setting. The overall objective of this course is to provide an overview of how individuals, communities, and societies produce, distribute, and eat food. This inter-disciplinary course will examine cultural, political, economic, environmental, and geographic approaches to food within local, national, and global contexts. Topics include food politics, food in the arts, land use, how we eat through time, culture and religious food values as well as a basic understanding of physiological concepts of nutrition. Students will explore:

You can sign up under any department's course number. It will still count towards your major/minor in those departments.

**NOTE: During the 2020-2021 academic year, AMST248 will also fulfill the "Introduction" requirement for the major and minor in American Studies (typically fulfilled by AMST101, AMST102, AMST334 and AMST335).

According to the US Census Bureau, in the year 2020 ¿more than half of the nation's children are expected to be part of a minority race or ethnic group. All Americans under the age of 18 are now at the front of a trend that will see the overall population follow suit some 20 years later¿ (NPR¿s Hansi Lo Wang). In essence, we are in a time of a dynamic racial shift, and yet our country seems to be divided or confused about what ¿race¿ is, how to talk about it, and how it might intersect with other identity formations such as gender, class, or sexuality. The first goal of this super-course is to give students real tools for how to address multiple modes of difference and to understand how intersectionality¿the theory of interlocking identities that reflect multiple

Food and Race in America

This critical food studies course engages the crucial intersection between food and race in America. That such an intersection must be explored in order to achieve food equity is the starting place for this class. Through readings and discussions, students will uncover, historicize, and address the structural inequalities in the world of food production, consumption, and accumulation in America today. In the process, we will consider food as a material that both perpetuates and mediates social inequalities. We will take an ethnographic approach to understanding issues in the world of food that up to this point have been largely rendered invisible¿for example, the relations of power and the class distinctions underscoring representations of cooking and eating in food magazines, newspapers, television shows, and circulated on social media platforms, and also on displayed in restaurants, farmers¿ markets, and fast food joints around the nation. Throughout the course students will chronicle, in writing assignments both in and out of class, local and national experiences of the intersections between food and race.

This course is cross-listed with ASIA 691H
AMST 691H is a research and methods course designed to help senior American Studies and Asian Studies majors research and write an honors thesis. Our objectives are to review some major issues in Asian and American Studies and interdisciplinary area studies in general, investigate how each student¿s research topic fits into these larger debates, review the writing conventions of the appropriate discipline and field, and help students produce innovative, insightful, and articulate research essays. EE.
Students who complete and successfully defend an honors thesis will graduate with honors. American Studies and Asian Studies students will also participate in the senior colloquium in the spring, where each student will give a short presentation summarizing their thesis research. Completed theses will be entered into the Carolina Digital Repository.
Students writing an honors thesis will be enrolled in AMST 691H and ASIA 691H by the department once their thesis applications have been approved.

GR3

This course is devised to provide graduate students interested in theoretical interdisciplinary work with a sense of prevailing questions and critiques important to CES. CES takes on the more difficult questions of intersectional work, as it thinks through sovereignty and emancipation, identity and ontology, place, space and temporality. Each iteration of the course works itself through new perspectives in the field, challenging students to create new methodologies for their own work.

Combined Section ID: 1245(amst/folk375.001) - AMST 375(#11227)

This critical food studies course engages the crucial intersection between food and race in America. That such an intersection must be explored in order to achieve food equity is the starting place for this class. Through readings and discussions, students will uncover, historicize, and address the structural inequalities in the world of food production, consumption, and accumulation in America today. In the process, we will consider food as a material that both perpetuates and mediates social inequalities. We will take an ethnographic approach to understanding issues in the world of food that up to this point have been largely rendered invisible¿for example, the relations of power and the class distinctions underscoring representations of cooking and eating in food magazines, newspapers, television shows, and circulated on social media platforms, and also on displayed in restaurants, farmers¿ markets, and fast food joints around the nation. Throughout the course students will chronicle, in writing assignments both in and out of class, local and national experiences of the intersections between food and race.

ANTH 053H.001 | Darwin¿s Dangerous Idea
TR, 9:30 am - 10: 45 am. Instructor(s): Paul Leslie. Enrollment = 24.
Darwin's theory of evolution by natural selection is central to one of the most profound revolutions in the history of thought, generating stunning insights but also some misunderstanding and tragic abuse. This seminar aims to provide a clear understanding of how natural selection works, and how it doesn't. We will examine objections to the theory; how the environmental and health problems we face today reflect processes of natural selection; and recent attempts to understand why we get sick, how we respond to disease, why we get old, why we choose mates the way we do, and more. Class sessions will feature a mix of lecture and discussion of concepts and issues. Students will also engage in small group projects¿cooperative explorations of problems raised in class or in the readings and/or designing mini research projects.

FIRST YEAR STUDENTS ONLY.

ANTH	62	001	9755	FYS INDIAN COUNTRY TODAY	Lecture (In Person On Campus Learners)	3	A

Bldg: Alumni **Room:** 0205 **Days:** MWF **Time:** 11:15 - 12:05
INST 100 **Instructor:** LAMBERT,VALERIE L

Class Enrl Cap: 24 **Class Enrl Tot:** 0 **Class Wait Cap:** 2 **Class Wait Tot:** 0 **Class Min Enrl:** 0

Attributes: SS- Social and Behavioral Science, US- U.S. Diversity, Ways of Knowing, FY - First Year Seminar
Reserve Capacity: 12-JUL-2021 RC CLAS UGRD FIRST YR STDTS **Reserve Enrl Cap:** 24 **Reserve Enrl Tot:** 0
01-AUG-2021 RC CLAS UGRD FIRST YR STDTS 0 0

DESCRIPTION:
With the United States as our geographic focus, this seminar explores a range of 20th- and early-21st-century American Indian topics and current issues. We look at Indian casinos, tribal colleges, identity, gender, tribal courts, sports, and other topics. An exploration of the history of American Indians before and after the arrival of Europeans, a history with which we begin the seminar, provides essential background for looking at the present and recent past. This seminar will help students better understand the challenges facing American Indian communities both internally and externally and the creative solutions being forged to address these challenges. It will also help students further develop skills in reading, writing, critical analysis, and public speaking.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This

***Starting in fall 2021, we are dropping the pre-requisites to this class. While it is helpful to have prior programming experience, this is not required.

Engineers help to design and build solutions to the world's problems. This course will explore some of the fundamental skills and tools in engineering. You will get experience using engineering tools, and you will also develop a mindset so that you can "learn how to learn" because technology changes rapidly and the tools that you use today may be obsolete in 20 years. There will be an emphasis on developing strong professional skills, including work in a group setting and effectively communicating your efforts.

In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture. For example, while it may be easy to develop an engineering solution to a problem, what are the economic and ethical considerations of various solutions? These concepts are important to help engineers build a better world.

***The classroom location is Dey Hall 405.

What kind of material is Sponge Bob made of? What about the slime of his pet snail, Gary? We are taught that there are three states of matter: solid, gas, and liquid. However, in our daily lives we encounter materials that challenge this simple description such as foams, pastes, gels, soap, and rubber, as well as our skin, hair, nails, and cells. These are Soft Materials and in this course we will learn about their special properties and how to describe them mathematically. This class is an active one, everyone participates and everyone learns from and helps one another. We will use various in-class activities to make the class more engaging. We will discuss, take quizzes, and do presentations. We will also evaluate each other's homework. Be prepared to come to class and participate in these activities! The technical material that you will learn will provide you with a valuable skillset. In addition, a goal of this class is to help you develop an entrepreneurial mindset so that you will understand the bigger picture; draw connections between the material in this class and what you have learned in other classes; recognize opportunities; and learn from mistakes to create value for yourself and others.

01-AUG-2021 RC CLAS UGRD FIRST YR STDTS 0 0

DESCRIPTION:
Focusing on the Carolinas, this seminar explores the many ways African Americans have used art to define themselves and their communities. We will ask how art has been used to maintain cultural traditions, shape American culture and build political solidarity from the era of colonialism and slavery to the present. We will study the cultivation of artistic practices from Africa; African American painters, sculptors and craftsmen who earned national reputations for the quality of their work; artists who re-imagined and redefined African American identity through art; and artists throughout the 20th century who represented the daily lives and hardships of rural and working-class blacks. Students will visit campus museums and archives and conduct original research using regional sources. Persistent questions throughout the semester will include, How does the art of African Americans in the Carolinas provoke us to question our own identities and roles within the region, and what is the contemporary role of art in shaping public discourse?

ARTH 285H.001 | Art Since 1960
MWF, 10:10 am - 11:00 am. Instructor(s): Cary Levine. Enrollment = 24.
This course will explore some of the major trends in American and European art since 1960. It will spotlight select artists whose work offers particularly intriguing, challenging, or problematic examples of contemporary art practice. We will focus on close readings of artworks and texts and consider how the questions and debates raised by them relate to various historical, social, cultural and political contexts. This course will present contemporary art and discourse as diverse, contradictory, contested, and unresolved.

Cary Levine specializes in contemporary art. He received his Ph.D. from the Graduate Center, City University of New York, and was a recipient of a J. Paul

Title: Seen, Unseen and Suggested: Representation and Hollywood Film Censorship

This course will look at the history of film censorship in the United States from the perspective of how such things as the Production Code (Hays Code), wartime restrictions, Anti-communist blacklisting, regional and local censorship boards, late 1960s movements for social change, and culturally and socially-determined moral and ethical standards restricted what could and could not be seen on movie screens in American theaters. We will watch and then analyze approximately 30 films from a cross-section of the 120-year history of cinema in the US, paying special attention to issues of gender, sexuality, race, class, and political persuasion as they affect on-screen representation. The goal of the course will be to cover the myriad ways in which censorship determined/determines what audiences saw/see on film and how that created a seemingly culturally-unified image of ¿America¿ that was/is, for many Americans, restrictive and exclusionary of their life experiences, if not outright hostile to their participation in American cultural life.

ARTH 490: Inventing the Modern Artist

Toiling in solitude, their attention entirely transfixed, living in destitution; a bohemian, a vagabond, erudite yet tempestuous. A genius. The image of the modern artist is itself a construction, and a relatively recent one at that. Solidifying across the eighteenth and nineteenth centuries, it was the product of centuries of debate and careful maneuvering in order to elevate the visual artist to the same level of public respect and regard as the poet and the philosopher. With an emphasis on European and North American visual artists and art worlds, this class will examine the invention of the modern artist from the Middle Ages to today. We will progress chronologically, exploring and revisiting key topics such as the evolving distinction between art and craft; the socioeconomic status of the artist and the emergence of the starving artist trope; representations of visual artists in imagery, theater, and writing; artists from marginalized and under-represented groups; different historical models for conceptualizing ¿genius;¿ and the relationship between the artist, labor, and the art market. By examining the history of the modern artist¿s invention, we can position ourselves to invent new visions for what it means to

Title: ARTH 557: Art and Money
This course explores the intersection of art and economics from the seventeenth century to the present. We will explore both the aesthetics of the monetary and monetary in art. What does the design of cash have to do with its value? What is an NFT and how does it change the art market? Why did economists from Marx to Keynes turn to aesthetics to understand finance? We will also study artists whose work is about or made of money, from William Harnett to Andy Warhol, and the economics of art production, from the famous trial of James McNeill Whistler to the politics of the readymade. Sessions will address themes of both artistic and economic concern such as value, labor, market, counterfeiting, consumption, reproduction, and circulation.

ARTH 952 Seminar in Museum Studies
Dr. Daniel Sherman

This research seminar introduces students to the theoretical and methodological framework of critical museum studies and asks them to engage with it in their own research. Our readings will focus on three areas: influential texts from the late twentieth century that helped establish a critical approach to the history of museums; recent efforts by museums to recount their own histories, such as ¿Making the Met,¿ a 2020 show marking the 150th anniversary of the Metropolitan Museum; and scholarship integrating art history, anthropology, and post-colonial studies around the problem of restitution of artifacts from Western museums to source countries. Students will write a substantial research paper on a museum, exhibition, or collection, historical or contemporary, of interest to them.

ARTH 982: Art and Environment

This course focuses on artistic engagements with the environment from the eighteenth century to the present, primarily in North America. While we will study a range of artists, practices, and movements from furniture making to Land Art, our main objective is methodological. Together we will define ecocritical art history and try to understand, expand, and challenge its parameters and goals. Along with art historical scholarship, we will read texts in environmental history, history of science, and new materialism. The course is organized thematically by ecosystem, with topics such as forest, ocean, ice, desert, wasteland, and garden. Students will write a seminar paper based on independent research. Paper topics must relate to the themes of the course but can expand beyond the time period and geographic regions covered.

DESCRIPTION:
Alice Walker wrote ¿Time moves slowly, but passes quickly¿. Tennessee Williams wrote, ¿Time is the longest distance between two places¿. Throughout history, time has captivated and inspired artists, writers and musicians. From subtle movements to clearly defined sequences of change, artists will manipulate the element of time to enhance their ideas. ¿Time, A Doorway to Visual Expression¿, considers the concept of time from a variety of perspectives and provides a path to investigate your own notions of time. As a group, we examine this mystifying topic through readings and discussions of Alan Lightman¿s Einstein¿s Dreams and Leonard Shlain¿s Art and Physics. We also watch films, analyze videos and listen to music as we express our personal views through the art making process. As a first-year seminar, the course presumes no previous art experience and students may carry out their projects through a medium of their chossing (e.g., drawing, photography, painting, video, sound, performance and/or sculpture). We will immerse ourselves in the subject of time and create works of art inspired by our personal experiences and increased understanding of Time.

ARTS 105H.001 | Basic Photography
MW, 11:15 am - 2:00 pm. Instructor(s): Joy Drury Cox. Enrollment = 10.
In ARTS 105H Basic Photography you will be introduced to the basic techniques of digital photography. Both technical and conceptual applications of

image-making will be explored. This course seeks to develop an understanding of the mechanics, visual language, and history of the photographic medium. Specifically, we will work with digital photographic practices, learning the fundamentals of DSLR cameras, Adobe editing software such as Photoshop and Bridge, inkjet printing, and basic digital workflow and file management. In conjunction with your studio practice, you will also learn about the medium¿s rich history.

Assignments will be supplemented with readings, films, library, and museum visits. Over the course of the semester, you will be exposed to a variety of examples of historical and contemporary photography. In the classroom you will be exposed to technical demonstrations, lectures, discussions, critiques,

Print I is a media-based studio art foundation course. It is designed to introduce core concepts of 2-D image-making through concepts and techniques of printmaking. In other words, the course focuses on developing visual literacy with specific attention to image-making strategies afforded by print media such as layering, reversal, multiple (editions, variant and modular) that make this approach to art-making unique. Questions arising from this inquiry include:

- What does working with a matrix or set of matrices allow? What sorts of images and ideas does this make possible?
- Why make art in serial or multiple forms?
- How is thinking for print different than/same as other media?
- How can the tools and methods of printmaking shape the development of an idea, both visually and conceptually?

NOTE: Honors Carolina students register online when their registration appointment begins. Online registration ends April 20. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist.

Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between April 20 and August 12. Enrollment in this course is temporarily restricted to Honors students. Email Professors Grabowski and Goldstein for permission to enroll: beth.grabowski@unc.edu; bobg@email.unc.edu

ARTS 409H.001 | Honors Art & Science: Merging Printmaking and Biology
Instructor(s): Bob Goldstein / Beth Grabowski

ARTS409H and BIOL409L together form a single course that brings together art majors and science majors to learn theory and practical skills in both art and science. The title of the class, Art and Science, implies an intersection of the two disciplines. Intrinsic to both is an investment in close observation, experimentation and visual analysis. While organized around meaningful connections between art and science, the course will actively consider disciplinary differences, especially with regard to what constitutes creative and scientific research.

01-AUG-2021 RC CLAS UGRD FIRST YR STDTS 0 0

DESCRIPTION:
In this course, students will experience films by some of the most acclaimed directors working in various languages and regions of India, as well as the Indian diaspora. The cinematic journey in this course will introduce students to important themes in South Asian culture and history over the past 200 years. It will also introduce students to some of the formal elements of filmmaking to help them better ¿read¿ the text of film, and appreciate the craft and aesthetics of filmmaking. There will be weekly film screenings and related readings on Indian cinema, culture, and film theory. For the Communication-Intensive component of this course, students will receive feedback on a piece of their writing and be asked to revise and resubmit it. They will also be given opportunities to speak on assigned topics in class.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This

BIOL	201	006	3363	ECOLOGY AND EVOLUTION	Lecture (In Person On Campus Learners)	4	A

If you are not able to register on your own (for whatever reason = no pre-reqs, etc), plan to attend the first lecture in the fall. Add your name to the class signup sheet for students not registered that will be available in class the first day. We enroll as many students as possible that day, giving priority to transfer students and students that are approaching graduation.

BIOL 202H.001 | Molecular Biology and Genetics
MW, 3:00 - 4:45 pm. Instructor(s): Steven Matson. Enrollment = 24.
The content of this course will be essentially the same as that of a regular section of BIOL202. We will discuss the structure and function of nucleic acids as well as the principles of inheritance, gene expression, genome organization, biotechnology and genetic engineering. There will be two class meetings per week with special emphasis on class discussion and an interactive classroom. You are expected to be actively engaged in this course through discussions, class activities and pre- as well as post-class assignments and readings. In addition to two mid-term exams and the final exam, there will be one significant writing/media assignment and at least one small group project during the semester. The required text for this course will be Essentials of Genetics (10th edition) by Klug et al. There is likely to be additional assigned reading from various sources Students who have taken or are currently taking organic chemistry will be particularly well prepared for this course.

BIOL 252H.001 | Fundamentals of Human Anatomy and Physiology
TR, 9:30 am - 10: 45 am. Instructor(s): Corey Johnson. Enrollment = 24.
BIOL 252H. Fundamentals of Human Anatomy and Physiology
One biology course over 200 recommended. An introductory but comprehensive course emphasizing the relationship between form and function of the body's organ systems.

Requisites: Prerequisites, BIOL 101; corequisite, BIOL 252L.

Corey Johnson is a Teaching Professor and currently serves as Associate Chair of Biology, and is the academic advisor for a number of pre-health student
NOT open to first-year students

BIOL 395 001 3375 UNDERGRADUATE BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

Permission required for enrollment.
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	395	026	3552	UNDERGRADUATE BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

Permission required for enrollment.
BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

Incoming first year students are not eligible. You can start doing research for credit after completing 201 or 202.
Questions? Please contact Dr Shemer: bishemer@email.unc.edu
BIOL 395H - Honors Research in Biology
The purpose of BIOL 395H is to provide honors students with independent research experience, while working in a research lab on a question of current biological interest. Under the supervision of a faculty member, and with contribution of research postdoctoral fellows, students will learn more than just basic research techniques. They will learn how to start to think as scientists, raising hypotheses and finding ways to test them in an empirical manner. In addition to the research performed in the lab, honors students will meet with each other on a weekly basis, discuss their research and develop their scientific thinking through reading and discussing primary scientific literature.

FOR BIOLOGY MAJORS ONLY. PREVIOUS ENROLLMENT IN BIOL 201 OR 202 REQUIRED. DEPARTMENT OF BIOLOGY PERMISSION REQUIRED

BIOL 395H may be taken for no more than six graded academic credits. Three to five credit hours of research may be counted as one lecture course toward Students who take 395H meet for an hour and a half each week (in addition to the research that they do in their own labs) and work on research-related skills. We run workshops on literature search, you will discuss and analyze primary scientific literature, you will practice in scientific writing, and the icing on the cake- you will learn how to present your own research.

You do not have to be an honors student to enroll in 395H (you do have to have a GPA of 3.00 or higher).

Bldg: Genome Sciences Bui **Room:** 1378 **Days:** M **Time:** 14:30 - 16:00

BIOL 409L 401 3643 PRINTMAKING AND BIOLOGY Lab 1 A
(In Person On Campus Learners)

BIOL 409L & ARTS 409H | Merging Printmaking and Biology - must take class & lab together!
M, 11:00 am - 2:00 pm. Instructor(s): Bob Goldstein / Beth Grabowski. Enrollment = 14.
ARTS409H and BIOL409L together will bring together art majors and science majors to learn theory and practical skills in both art and science, and to make use of this learning to make artworks using a variety of printmaking techniques. Units in this course are organized according to topics in biology. As students learn specific biological concepts and practical lab skills, they will gather and generate visual information and pose questions that arise from scientific looking. This will become the source material (images, processes and ideas) for printmaking projects.

In the print studio, the course will introduce specific technical approaches within three categories of printmaking: intaglio (photogravure), relief (large-scale wood cut and/or letterpress) and stencil printing (screen-printing). Students will learn how to make printing matrices (plate, block or screen), how to print these matrices and explore the affordances of these technical skills (print strategies) as unique approaches to art-making.
Email professors Dr Goldstein (bobg@unc.edu) and Dr Grabowski (beth.grabowski@unc.edu) with your PID number, major and why you want to take this exciting class/lab combo.

BIOL 495 001 3501 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL 495 013 3576 UNDERGRAD BIOLOGY RESEARCH Lecture 1 - 3 A
(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

(In Person On Campus Learners)

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

BIOL	495	101	3603	UNDERGRAD BIOLOGY RESEARCH	Lecture (In Person On Campus Learners)	1 - 3	A

BIOL 395/395H/495 will only be accepting an online-application form for undergraduate research. You will apply online, get a copy after submission, and share the copy with your research mentor and biology sponsor (when applicable).

Here is the online form:
https://forms.gle/qvdBoW26cbyfcQhGA

Please note- before you apply you need to make sure that you found a lab and a faculty that will mentor you (principal instructor or PI). If that faculty member is outside the biology department you also need to find a biology faculty member that will serve as the biology faculty sponsor, interacting with you and the faculty mentor (the PI) to make sure everything works well during the semester.

As well as reshaping people¿s lives around the world, the COVID-19 pandemic has provided new insights into fundamental principles of disease ecology and evolution. This class will find, read, and discuss published papers on the ecology and evolution of COVID-19 and the virus SARS-CoV-2, ranging from the virus¿ emergence via spillover from an animal host, to the repeated cycles or waves of infection in the human population, to the unexpectedly rapid evolution of the virus, to possible scenarios for the future of COVID-19.

BIOL 669 002 13414 ECOLOGY SEMINAR Lecture 1 - 3 A

Grad students; are you studying for your upcoming exams? Or planning to in the future? Then this course was designed specifically for you. Each week we go over a basic ecological theory and some of the key papers that test it. The course is challenging but fun and interactive. We do a lot of exam prep with mock exams in a friendly and supportive environment. By the end, you will feel much more confident in describing and discussing theory with your peers.

TITLE: Bread from Air: The Chemistry of Fertilizers

GEN EDS: PL, QI

DESCRIPTION:
Fear of a global famine inspired chemist Fritz Haber¿s research into the production of ammonia from nitrogen in the air. Following a breakthrough laboratory discovery, engineer Carl Bosch led the development of a large-scale industrial process to produce ammonia¿ and together they changed the world. This First Year Seminar will introduce concepts of scientific inquiry and interdisciplinary collaboration in the context of the humankind¿s utilization of fertilizers. Weaving together elements of plant biology, chemical synthesis and catalysis, environmental science, and technoeconomic analysis, the course will critically examine the past, present, and future of fertilizers.

CHEM	101	001	4738	GEN DESCRIP CHEM I	Lecture (In Person On Campus Learners)	3	A

Three midterm exams will be given in class on the following Wednesdays at 6:30pm (Eastern Time): September 15, October 13 and November 10. Course expectations are that you will take all midterms.

EXAM MAKE-UP REQUESTS & ALTERNATIVE EXAM POLICY:

Course expectations are that you will be in attendance for every exam, and that you work your schedule around these exam times. However, in the case of serious illness, family emergency, religious holiday, class conflict, or varsity athletic travel there is an alternative exam time provided at 6:30 am (Eastern Time) on the Thursday morning following the scheduled exam.

You cannot show up to the alternative exam time unless you have received approval from your instructor prior to the official make-up exam date. The following provides guidelines for requesting the alternative exam time.

CHEM	101L	401	5036	QUANT CHEM LAB I	Lab (In Person On Campus Learners)	1	A

Use Waitlists on Connect Carolina until the registration period is complete.

- Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
- Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
- Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

(In Person On Campus Learners)

Use Waitlists on Connect Carolina until the registration period is complete.

- Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
- Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
- Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

CHEM 102H.001 | Advanced General Descriptive Chemistry
TR, 2:00 pm - 3:15 pm. Instructor(s): Carribeth Bliem. Enrollment = 35.
CHEM 102H is recommended by the Chemistry Department for incoming first year students who have taken Advanced Placement Chemistry or the equivalent and plan to major in chemistry and/or plan a career as a research scientist. CHEM 102H focuses on a more in-depth treatment of topics traditionally covered in two semesters of freshman courses. The topics covered have been identified by the Department of Chemistry faculty as essential for success in and a good foundation for more advanced study in chemistry and other areas of the basic and applied sciences. The textbook, lectures and course work require a willingness to accept rigorous academic challenges and a solid high school background in algebra, coordinate geometry, and trigonometry. Differential and integral calculus will be used only where necessary in derivations and with explanation.

STUDENTS ELIGIBLE FOR ENROLLMENT IN CHEM 102H ARE INCOMING FIRST YEAR STUDENTS WHO HAVE RECEIVED AN ADVANCED PLACEMENT SCORE OF 5 AND HAVE BEEN GRANTED

GR1

Use Waitlists on Connect Carolina until the registration period is complete.

- Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
- Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
- Be persistent, seats do open up.

If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

Use Waitlists on Connect Carolina until the registration period is complete.
· Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
· Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
· Be persistent, seats do open up.
If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

CHEM 245L.401 | Honors Laboratory in Separations and Analytical Characterization of Organic and Biological Compounds
M, 1:25 pm - 4:15 pm. Instructor(s): Leslie Hicks. Enrollment = 16.
In the honors analytical methods lab students will use chromatographic, spectroscopic, and electrochemical methods to carry out a real world analysis. Students will work with real world samples throughout the semester and the lab course will emphasize group work. A portion of the lab will involve a group research project. Groups will be given a problem to solve and the time to design their own experiments, run their experiments, collect data, and give a poster presentation on their group research project. What is great about the group research is that each group decides on their own direction, what techniques they wish to use, and need to use, to solve a particular analysis problem.

PREREQUISITE: CHEM 101/101L AND 102/102L.
PRE/COREQUISITE: CHEM 241H.

CHEM 261H.001 | Honors Organic Chemistry I
TR, 9:30 am - 10:45 am. Instructor(s): Marcey Waters. Enrollment = 25.
Molecular structure and its determination by modern physical methods, correlation between structure and reactivity and the theoretical basis for these relationships; classification of "reaction types" exhibited by organic molecules using as examples molecules of biological importance. This course will be similar to CHEM 261 with a greater emphasis on class discussion and some use of computer modeling techniques.

PREREQUISITES: CHEM 102 OR CHEM 102H. GPA OF 3.600 OR HIGHER.
DEPARTMENT OF CHEMISTRY CONSENT REQUIRED. EMAIL chemus@unc.edu.

Professor Waters¿ research interests are at the interface of organic chemistry and biochemistry. The overarching goal of her research is to design

Use Waitlists on Connect Carolina until the registration period is complete.
· Only waitlist one section! (If you add to the waitlist for multiple sections, the registration system will see a conflict (enrolling in the same course twice) and you will not be enrolled if a seat becomes available. The person behind you on the waitlist will claim the seat.
· Check to see if other sections at the same day and time have a waitlist. Some sections have no waitlist, while others are 4 deep. If there is another section at the day and time you need, it is better to be first on the waitlist.
· Be persistent, seats do open up.
If you are not enrolled in a lab section by the first week of classes: The chemistry undergraduate lab courses use an electronic waitlist to fill any empty seats that open during the week of check-in

CHEM 430H.001 | Introduction to Biological Chemistry

TR, 9:30 pm - 10:45 pm. Instructor(s): Matthew Redinbo Enrollment = 30.
Dynamic examination of the principles of biochemistry, from macromolecules through enzyme function and catalysis, and into the primary metabolic pathways that generate cellular energy. This course will be an interactive combination of lecture, group based guided inquiry along with presentations from students and deeper dives into topics of mutual interest to course participants. The goal of the course is to provide a detailed foundation in biochemistry and to teach critical thinking skills focused on understanding and challenging primary biochemical data. Students who enroll in this course are typically heading to graduate or professional school in this area of study, or will use the principles employed to enhance their problem-solving abilities.
Chemistry 430H is designed for chemistry majors and is not cross-listed with biol 430. Hence, Chemistry majors in the honors program will have priority.
Seats will open as follows: Chemistry majors in honors with senior status,
Chemistry majors in honors with junior status, Chemistry majors BS-Biochem, Chemistry majors BA. Any additional seats (and there usually are very limited

01-AUG-2021	RC CLAS UGRD FIRST YR STDTS	0		0

DESCRIPTION:
Students in this seminar will attend and study the production process of multimedia, music, dance and theater performances on campus and on-line. The Process Series of the Performance Studies program in the Department of Communication Studies, Playmakers, Carolina Performing Arts, and others across campus and additional on-line performance. We will discuss how performance as it was experienced (pre-Covid) and as it currently experienced. We will examine performance through multiple lenses, from Aristotle¿s Poetics, Peter Brooks¿s Empty Space, up to current writing from Performance Studies scholars. We will explore the ways that performances engage us, communicating powerful ideas and emotions through their various media of expression. Students will research performance pieces, interview the performers, attend rehearsals and performances, and write essays that combine their own experiences of the performances with class readings. Students will also create their own performance pieces as they observe the relationship of preparation and practice to the spontaneity and surprise of performance.

In order to actualize a more fair, just, and equitable society, it is essential that we hone an awareness of the political dimensions of technological systems and work toward the design of better ones. The goal of this course is to foster such a critical technological literacy. It will cover gig economy platforms and labor relations, surveillance and policing algorithms, and the environmental impact of technological infrastructures.

Course Topic: Evolution of Storytelling in American Electronic News Media
Course taught by special guest lecturer and alumnus, James Lampley.

The course is designed as an interactive examination and discussion of the techniques, processes and phenomena by which electronic news delivery in the United States began with early radio transmissions and developed into our current infinitely broad landscape of personal and professional storytelling. Students will share in the process of reading books and articles, viewing and hearing tape artifacts, cataloguing and interpreting the dynamics of this evolution, all under the guiding stimulus of an instructor with forty five years of experience in high profile roles in network television sports, news and entertainment.

There will be reading assignments which translate into oral presentations, and two examinations in short essay form, a mid term and a final. But most

A workshop to study and create non-fiction films about the environment. The course examines aesthetic, narrative, and representational strategies with an eye to how students' films can contribute to critical conversations about our species' impact on the natural world. Course work includes readings, written analysis, and the production of short video essays and documentaries. Screenings will feature international and US environmental films.

Course descriptions:
This course will provide an introduction to the history and development of "Theory" as the foundation for much of the most interesting thinking and research in the humanities and social sciences. In the contemporary intellectual universe, "theory" provides a common language of concepts and methods that enable intellectuals and scholars investigating human social and everyday life to speak to one another-- across disciplines and geographies, comparable to the way statistics and experimentation function in the more traditional models of science (including some social science work).

"Theory" includes many of the major schools of modern and contemporary philosophy (that stand in opposition to what is often referred to as "analytic philosophy, " which often dominates Anglo-American philosophy departments); but it also includes other-- less traditionally "philosophical"--positions. At the same time, "theory" differs from "philosophy" in so far as it is interested in providing the foundation for more empirically oriented understandings of concrete instances of human relations, practices, etc. What philosophy and theory have in common is that they provide a set of tools--concepts, filters,

GR3

The overarching objective of COMM 702 is to introduce graduate teaching assistants to the practice and theory of teaching undergraduate students at UNC. The course will provide practical advice and tips about teaching. The beginning and middle of the course will focus on practical elements of teaching, such as people management (ie. navigating classroom relationships, classroom climate, and disruptive students), classroom management (ie. fostering class discussion, classroom activities, and lectures), and document management (ie. preparing syllabus, choosing reading assignments and grading). The final few weeks of the course encourages contemplation about the theory of teaching and the role of the professoriate in academe. Course content and class discussions are designed to encourage intellectually rigorous and personally meaningful conversations about our teaching and how our personal perspectives of teaching and learning influence our practices as teachers. We will read about and discuss different approaches to teaching, the enactment of communication instruction, and growing as a teacher. You will leave this course with materials designed to help you as a new teacher, such as a course syllabus, a lesson plan, and a draft of your statement of teaching philosophy.

This seminar will examine politics, cultures, and ethics of care. We will not begin with the presumption that care is a self-evident good. We will think through care as both a mechanism of discipline, control, and coercion, as well as the foundation of many praxes of resistance to forms of oppression and dispossession. Rather, we will treat care as a problematic concerning the distribution of moral responsibility across social, cultural, political and economic boundaries. We will use the concept as a springboard into the exploration of political and ethical life and of different governing regimes of life itself. Our inquiry will consider accounts of humanitarian aid and sanctuary, carceral social reproduction, feminist praxes, care work, biopolitics, repair work, extinction and interspecies kinships, social reproduction, disability justice, decolonial aesthetics, and other topics, exploring distributions of care, its effects, and what moral/ethical logics, structuring regimes of personhood, and modes of politicization it entails. Along the way we will also consider care in relation to other core concepts such as harm, giving, value, exchange, coercion, vulnerability, hospitality, sovereignty, responsibility, dependency and interdependency. Ultimately, we will cultivate vocabularies and sensibilities around the question: how is care¿s morality established in practice and how is moral responsibility assigned and distributed in different care regimes? We think throughout the class about why care has surfaced

TITLE: Lux Libertas: On the Knowledge, Manipulation and Display of Light

GEN EDS: PH, NA

DESCRIPTION:
Light has figured centrally in human explanations and manipulations of the natural world: from creation narratives, to the Copernican Revolution, to the theory of relativity, to harvesting energy from sunlight, to shaping light inside phones and screens for the capture and display of images. The goal of this course is to bring students into an intellectual encounter with light, one that will provide a history of human understandings of light, experimental encounters with light in the laboratory, and orientations to theoretical paradigms that have resulted from the human manipulation of light. At its most broad, the course aims to introduce first year students to knowledge and matter-energy as things that we study, handle, and transform.

COMP	110	001	9876	INTRO PROGRAMMING	Lecture (In Person On Campus Learners)	3	A

DESCRIPTION:
The goal of this seminar is to get you doing theatre, to spark your creativity and to connect you with the deeper lessons of this dynamic art form. You will act. You will write. You will work with others. It will not always be easy, but if you are willing to stretch yourself, you should have a great time. Each lesson is organized around a principle or virtue inherent in the practice of the art. Participants study a quotation or two that relate to that principle and then engage in drama exercises that spring from that principle. By the end of the course, you will have gained skills to make you comfortable to write, stage and perform your own 10 minute plays. Not just for those interested in pursuing theatre, this seminar will give you a more holistic understanding of essential principles in the practice of your life.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This

DRAM 081H.001 | Staging America: The American Drama
TR, 2:00 pm - 3:15 pm. Instructor(s): Greg Kable. Enrollment = 24.
This seminar examines our national drama from its colonial origins to the present. Participants read plays and criticism, screen videos, engage in critical writing, and consider performance as related means of exploring the visions and revisions constituting American dramatic history. We will approach American drama as both a literary and commercial art form, and look to its history to provide a context for current American theater practice. Readings are chosen for their intrinsic merit and historical importance, but also for their treatment of key issues and events in American life. Our focus throughout will be on the forces that shaped the American drama as well as, in turn, that drama¿s ability to shed light on the national experience.

FIRST YEAR STUDENTS ONLY.

DRAM 83 001 8959 SPECTACLE IN THE THEATRE Lecture 3 A

01-AUG-2021 RC CLAS UGRD FIRST YR STDTS 0 0

DESCRIPTION:
This seminar will explore the artists, art and technology involved in creating the world of the play. It is intended as an overview for students who want to learn about theatrical design. Students will create their own designs in the areas of scenery, costumes, and lighting for three plays throughout the semester. The plays will be placed outside of their traditional setting while still maintaining the story and themes. Students have placed Shakespeare¿s A Midsummer Night¿s Dream in a trailer park and a daycare center for example. Careful historical research, close reading and analysis, text and source material, and collaboration will be the focus of the student projects.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This registration window closes on July 9.

DESCRIPTION:
William Blake, the visionary poet, artist and printmaker of the British Romantic period, has had enormous influence on modern art and popular culture. His illuminated poetry integrated word and image anticipating graphic novels and influencing many modern musicians, poets, writers (including Pullman, His Dark Materials Trilogy, Bono, Patti Smith and Jim Morrison). Using the Blake Archive, a hypertext of Blake¿s poetry and art, we will study key Blake works as well as the digital medium that enables us to study these works in new ways. We will also explore the Web for performances and adaptations of the works we study and for works by musicians, painters, poets, writers, actors, playwrights, performers, dancers and film and video makers who were or are inspired or influenced by Blake. Students will share their discoveries with the class and produce critical or creative responses to a work by Blake or by an influenced artist.

ENGL 089H.001 | Close Encounters: The Science Fiction of the Shared Universe
MWF, 11:15 am - 12:05 pm. Instructor(s): David Ross. Enrollment = 24.
Darwin¿s theories shattered humanity¿s sense of solitary enthronement, of removal from a creation different in kind. Humanity had suddenly to think of itself in relation to a world¿possibly even a universe ¿teeming with fellow accidents of evolution. The universe ceased to be something possessed and became something shared. But shared with whom? Shared on what basis? According to what hierarchy? Shared with creatures essentially like or unlike ourselves? Science fiction is preeminently the literature of the Darwinian universe. It emerged co-extensively, struggling to imagine the taxonomies of a universe that had been startlingly redefined as evolutionary and infinite in four dimensions. ¿O brave new world that has such people in it!¿ exclaimed Shakespeare. Science fiction uttered these same words, but with trepidation, wondering about the human place and future. Our course will consider the meanings, ramifications, and anxieties of a ¿shared universe,¿ drawing on a selection of science-fiction classics from H.G. Wells onward.

.ENGL 132H.001 | Honors: Intro to Fiction Writing
TR, 11:00 am - 12:15 pm . Instructor(s): Karen Tucker. Enrollment = 15.
Writing and reading intensive. Early assignments focus on craft elements of short fiction, including structure, time, characterization, dialogue, setting, and point-of-view. Students will subsequently write two 8-12 page stories to be workshopped in class. Thorough revision of one of these stories takes the place of a final exam. The course is informal but stringent, and vigorous participation is expected. No textbook required; assigned stories and craft essays will be supplied. This course (or ENGL 130) serves as a prerequisite for other courses in the fiction sequence of the creative writing program (ENGL 206, 406, 693H).

FIRST YEAR HONORS CAROLINA STUDENTS ONLY

.ENGL 133H.001 | Honors: Intro to Poetry Writing
MW, 1:25 pm - 2:40 pm. Instructor(s): Gabby Calvocoressi. Enrollment = 15.
In this class we¿ll be thinking about every aspect of the poem. What inspires us to write them, how do we start? And, most importantly, how can a deep understanding of poetic craft help us to make rigorous and muscular poems from the raw material of our lives and vision? We will look at the work of established poets to help us increase the power of our own. We will think about traditional forms as an invitation to our own urgent, necessary and deeply contemporary work. More than anything poetry is a conversation that¿s been happening over millennia. We will endeavor to find where we fit in and where and how we are blazing our own path. This is an Honors class so students will be expected to be actively engaged in their own work and the work of their peers. As such, each student will be paired with another member of the class as a Primary Reader. Primary Readers will write letters to each other throughout the term as means of thinking about how we talk (even at the beginning of our poetic lives) about the arc of another writer's poems and poetic pursuits.

ENGL 223H.001 | Chaucer
TR, 11:00 am - 12:15 pm. Instructor(s): Helen Cushman. Enrollment = 24.
Chaucer's The Canterbury Tales is an extraordinarily wide-ranging poem. It is characterized by variety, surprise, and quick movements from one narrative world to a completely different one. With the turn of a page, the reader finds herself on a medieval pilgrimage, then in the aftermath of an ancient Mediterranean war, then in the court of Genghis Khan, and then in a barnyard squabble between a rooster and a fox. One moment a serial-monogamous seamstress is explaining her theories about marriage, and the next a friar is puzzling over how to divide a fart. We will read each of these tales in the original Middle English--with a little help along the way--and find out how all of these adventures and characters live together in one poem. There are no prerequisites for this course. All are welcome!

ENGL 238H.001 | 19th-Century British Novel¿with a Contemporary Twist
TR, 2:00 pm - 3:15 pm. Instructor(s): Beverly Taylor. Enrollment = 24.
In this course we¿ll be reading some great novels! Jane Austen (Persuasion), Charlotte Brontë (Jane Eyre), Emily Brontë (Wuthering Heights), Charles Dickens (Great Expectations), George Eliot (The Mill on the Floss), Thomas Hardy (Tess of the D¿Urbervilles). While discussing these novels with other good readers, we¿ll also be learning about the historical context of the works and thinking about how fiction¿and art more generally¿expresses and also alters the culture in which it develops. We¿ll be thinking about power relations in the cultural moments depicted, especially noting the organization of power relations predicated on rank and money, social class, gender, and race. Besides all this, we¿ll aim to produce a tangible outcome: a collection of essays on Neo-Victorian fiction and film. The ¿contemporary twist¿ of the course will involve us all in considering why modern writers and film makers ¿write back¿ to Victorian works, either by writing prequels, sequels, or revisions of nineteenth-century texts, or by writing a new story but setting it in the Victorian period (for example, Alias Grace). You¿ll choose a 20th- or 21st-century neo-Victorian novel or film to examine, addressing questions about why

Spend this term in some exciting places. Plunge down the rabbit hole with Alice, get whirled to Oz with Dorothy or fly to Neverland with Peter and Wendy, go shopping on Diagon Alley with Harry and Hagrid.

In English 284 Reading Children¿s Fiction read (or reread) some of the most influential and lasting books written in English. Enjoy works hailed as classics alongside works recovered for their importance and vitality: get lost in the pictures and stories of the children¿s magazine, The Brownies Book, edited by W. E. B. Du Bois and a masterwork of the 1920s.

This course considers how to define children¿s literature (from ¿nursery stories¿ through ¿young adult¿).

What stories do these books tell? How do they tell them?

25-MAR-2021	RC CLAS UGRD FIRST YR STDTS	4	0
01-AUG-2021	RC CLAS TRANSFER STUDENTS	1	0
01-AUG-2021	RC CLAS UGRD FIRST YR STDTS	0	0

Some seats are reserved for incoming First-Years and Transfer students. If you're not able to enroll right now, try adding yourself to the waitlist or wait until August 2 for when seats are released for every student.

We focus on illustrated books for children that have established or transformed that genre. We locate children's books within the history of illustration to explore conventions of visual story telling. How do images reflect, extend, or dispute written meaning? How do they reveal changing ideas of children or childhood?

We compare different depictions of classic forms--fables, nursery rhymes, fairy and folk tales--as well as the roles of pictures in primers and readers. We read books transformed by their pictures--the Alice books, Oz, Treasure Island. The role of photography takes us into twentieth-century illustration. How does medium shape meaning?

This course will be help at 1789 Venture Labs.

The course is designed to help students turn an idea into an enterprise. We will execute a design sprint to reinforce the understanding of the ideation and validation process. Students develop high resolution ideation and marketing skills. We delve into classic strategy principles by applying them given new market and technology trends. Finally, we develop a street smart version of finance through cash flow forecasting and core fund raising techniques. By the end of class, students will be able to discover ideate, validate and accelerate ventures.

Grading will largely be determined by student effort. The class is taught mostly in a flipped classroom, group experiential learning environment. Class participation and being a solid group contributor are essential for grading success. The class will use tutorials, examples and templates extensively. Low stakes quizzes will be used as a recall tool. The primary communication tool is Slack.

Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning June 14. If you are unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist between June 14 and August 11.
ECON 327H.001 | Sports Entrepreneurship
TR, 9:30 am - 10:45 am. Instructor(s): Chris Mumford. Enrollment = 24.
The newly-emerging field presents many opportunities. General sports are dominated by oligarchs -NFL, NBA, MLB, NCAA, NHL, MLS - where the cost of entry is hundreds of millions of dollars.
In this course, we will explore Sports Verticals with high growth and lower barriers to entry. These include eSports, analytics, fantasy/betting, youth sports, fitness and health technology and enhanced fan experience. Students will be organized into teams and deep dive into these areas and present findings and a written report and summary presentation. Afterwards, we will develop a sports startup with a presentation & website.

Economic Application of Data Science

ECON 390 is intended to provide a broad-based introduction to numerical and data-science methods commonly used in economics. The course will first introduce students to the R programming language, assuming no prior experience. Subsequent lectures, using R, will provide students an opportunity to apply this knowledge on real-world data to achieve an economic objective. The methods used in these applications will include (but are not limited to): collecting, cleaning, merging, processing, and visualizing data, descriptive analysis, optimization, and supervised/unsupervised statistical learning. In addition, the course has an experiential component that connects students with industry leaders in economic applications of data-science

The course is designed to advance analytical skills in the field of applied labor economics. The course covers empirical models of labor supply, human capital, earnings, income inequality, informality, and the current COVID-19 crisis. Students will learn how researchers evaluate policies affecting labor markets, including tax and welfare reforms, education programs, minimum wage and labor regulation, and COVID-19-related policies. The course mostly focuses on the U.S. labor market. Students will improve programming skills in Stata and use real-world survey data in writing a research project.

ENEC 201H.001 | Introduction to Environment and Society
MWF, 10:10 am - 11:00 am. Instructor(s): Greg Gangi. Enrollment = 24.
This course will explore changing human-environmental relations from a variety of social, geographical, and historical settings. While some lectures do include material from the natural sciences this is a social science class. The class cuts across a large number of disciplines in a manner that is integrative rather than segregating lessons from different academic disciplines into separate lectures. The focus of this course is in the first half of the class to give students familiarity with how humans and human organizations deal with issues of sustainability. The second half of the semester will explore some critical issues like population, food security, climate change, urban planning and transitioning to a low carbon economy. This part of the course will not only give student information important background information about the problems but also highlight possible solutions.

In addition, to weekly class lectures, students will attend a one-hour recitation session to enjoy small-group discussion and to explore related topics of

This semester-long course, Carolina Sustainability Consulting, will provide undergraduate students the opportunity to put theory into practice by working

with clients on projects with an environmental benefit. Working on strategically significant projects, students will put into practice lessons learned in the foundational courses they have obtained throughout their time at UNC and will acquire leadership skills valued in the marketplace such as change management, team work, identifying and overcoming obstacles, and developing buy-in. With a foundation in the scientific method, this course will demand that students solve a problem posed by a client by proposing hypotheses and by conducting literature reviews, primary research, and examining applicable case studies. Students will collect data and evaluate and report on results, making relevant and implementable recommendations. This project-based learning experience will be supplemented with lectures and guest speakers so that students acquire project- and career-relevant skills.

All LFIT classes will meet in Fetzer Gym A for the first day of class. You will hear a brief overview of what to expect in LFIT this semester, and break out into our group.

*You will not be doing any physical activity on the first day of class.
Spaces have been reserved for first year students. The restriction will be removed July 19.
Students may take only one, one-credit Lifetime Fitness (LFIT) course during their career at Carolina.
This course has an additional fee.

DESCRIPTION:
This seminar examines the ways that politics, especially contests over territory, are part of our day-to-day life. We will explore a range of cases, from immigration policy and rhetoric in the US, to popular representations of geopolitics in film, to the politics of family planning in India. How do questions of love, friendship, family and youth identity tie into the international and national political stories that we see on the news? What does national identity have to do with our individual sense of self? We will also explore alternative ways that international politics have been studied, as feminist geopolitics or anti-geopolitics and questions of citizenship. Work for the seminar will involve original research on intersections of international politics and students¿ daily life, as well as exploring representations of geopolitical issues in the media, film and fiction.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This

Some seats are reserved for first year students and transfer students.
This course will approach geoscience concepts through the lens of natural disasters, including earthquakes, volcanic eruptions, hurricanes, tsunami, and related mass extinction events.

Formerly known as Introductory Geology.
PX credit awarded for GEOL 101 & GEOL 101L, PL without the lab.

Some seats in this section are reserved for first year and transfer students.
This is a "first year alternative" gateway course. Formerly known as Introductory Geology.

PX credit awarded for GEOL 101 & GEOL 101L, PL without the lab.

Please do not ask to be enrolled if you are not an incoming first year student in your first 2 semesters at UNC.

This course will examine Earth Science concepts by exploring select national parks of the United States.

HIST 178H.001 | The Global Order from World War II to the Present
TR, 2:00 pm - 3:15 pm. Instructor(s): Klaus Larres. Enrollment = 24.
This course deals with the establishment and development of the rules-based global order since the end of the Second World War. The course will help us to understand the driving forces, fears and ideas that have led to the current post-war global order and the emergence of new states and international organizations. We will discuss this system as well as the forces of nationalism, imperialism, just war ideas, great power theories, and many related themes. The course has three main parts: 1. Establishment and outline of the Bretton Woods System (the 'Washington consensus'); 2. Outline and analysis of the most important international institutions and intergovernmental organizations that have remained relevant in today¿s global order; 3. Analysis of the challenges to the rules-based global order that have emerged in the 21st century. The course will cover the years from 1944 to the present. Geographically this course will focus above all on the U.S., Europe/Russia, and Asia (with a particular focus on China).

History 398-001: Seeing the Past

The value that we attach to seeing something for ourselves, and then being able to describe what we have seen to others, is central to our cultural interaction. Seeing is the privileged form of sensory perception and consequently a common metaphor for understanding itself: ¿I see what you mean,¿ we say, or ¿My view on this has changed.¿ In the criminal legal process, great weight is attached to eyewitness testimony, whereas convictions based only on hearsay are rightly considered unsound. But eyewitnesses can also be fallible or mendacious: there are many notorious cases of legal convictions that were based on seemingly compelling eyewitness evidence but were subsequently proved to be miscarriages of justice. Eyewitness is also a key criterion for how historians evaluate their primary sources and arrange them in hierarchies of importance: in the history books and articles that you have read, you will doubtless have come across numerous comments to the effect that such-and-such a source is reliable because its author was present at the events recorded in it, while another source is of lesser significance because it is second hand.

History 398-002: Nazi Germany

This 398 will deal with Nazi Germany on the basis of primary documents and images, provided by the German Historical Institute in Washington, DC. This approach will give students a chance to get beyond the popular myths about the Third Reich by examining primary information on the Nazi movement, the racial dictatorship, the Holocaust and the Second World War. The participants of the seminar will be able to pick a topic according to their own interests and present their findings orally as well as in written form.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.

History 398-004: My Hometown

Students in ¿My Hometown¿ will select a research topic related to a town or region where they or their family has spent considerable time or identify as a place of origin. Essay themes and chronologies will vary widely, but all student projects will be intimately linked through this concept of ¿My Hometown.¿ This course is designed to teach students how to think, research, and write like Historians. By completing a 20-25 page essay based on original research, students will develop the capacity to pose historical questions, engage historical literature, conduct research, construct arguments, analyze a variety of sources, and compose prose better than they ever have before.

HIST 398 sections are restricted to History majors until two weeks into the enrollment period.
At that time the restrictions will be removed and all students, regardless of major, will be able to enroll if there are seats available.
