TITLE: Triple-I: Humans and the Cosmos
INSTRUCTIONAL MODE: In-Person
ELIGIBLE STUDENTS: Seats are limited to first-year, in-person students
GEN EDS: Students must enroll in this Triple-I (IDST 190-012) and the 1 credit Data Literacy Lab (IDST 190L-001); this combination fulfills the North Atlantic World (NA) and Quantitative Intensive (QI) requirements.

DESCRIPTION:
This course is an interdisciplinary introduction to some of the most essential and exciting debates about humanity's relationship to the universe. We explore such topics as the beginning of existence, the nature of time, contact with the supernatural world, and predictions about the end of all things from the perspective of philosophy, physics, history, and related disciplines.

Honors Carolina students register online when their registration appointment begins. Non-honors students register beginning June 14. If you are unable to enroll online, submit a wait list request at honorscarolina.unc.edu/waitlist between June 14 and August 11.
MATH 062H.001 | Combinatorics
TR, 12:30 pm - 1:45 pm. Instructor(s): Ivan Cherednik. Enrollment = 20.
A leading expert in Modern Combinatorics wants to share his vision of the subject with the students. The seminar is a perfect background for future specialists in mathematics, physics, computer science, biology, economics, for those who are curious what statistical physics is about, what is cryptography, and how stock market works, and for everyone who likes mathematics.

The course will be organized around the following topics:
1) Puzzles: dimer covering, magic squares, 36 officers
2) Combinations: from coin tossing to dice and poker
3) Fibonacci numbers: rabbits, population growth, etc.

MATH 231H.001 | Calculus of Functions of One Variable I
TR, 2:00 pm - 3:15 pm. Instructor(s): Olivia Dumitrescu. Enrollment = 35.
Math 231 is designed to provide a detailed introduction to the fundamental ideas of calculus. It does not assume any prior calculus knowledge, but the student is expected to be proficient working with functions and their graphs as well as manipulating variable expressions and solving equations using algebra.
This is the Honors section of Math 231. It offers a more demanding and deeper treatment than the regular sections as well as more involved applications. There will be more emphasis on understanding theory than in other sections, and students will be expected to understand and reproduce proofs of theorems and formulas. In addition, this section will cover extra topics, including the epsilon-delta definition of limit. Applications will be more involved and will sometimes involve real data. Homework will be more challenging, with more emphasis on creative problem solving and less emphasis on drill. Students will be expected to complete a final project.

MATH 233H.001 | Calculus of Functions of Several Variables
TR, 2:00 pm - 3:15 pm. Instructor(s): Mark Williams. Enrollment = 35.
Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

To register for this course, you should let Professor Sawon know your name and PID at the first class session. Note that registering for MATH294 is entirely optional: you don't have to register for MATH294 to participate in these sessions and/or the competitions. In particular, if you don't anticipate attending every week, it would be better not to register. Please let me know by email (sawon@email.unc.edu) if you want to participate and are unable to attend the first session.

Math 294 will be held in Phillips 330, the Math Lounge, Fall 2022.

MATH 381H.001 | Discrete Math
TR, 12:30 pm - 1:45 pm. Instructor(s): Mark McCombs. Enrollment = 35.
Logic and proofs, Sets and Functions, Number theory, Induction, Counting, Discrete probability, and Relations (Chapters 1,2,4,5,6,7 and 9 from Rosen's Discrete Mathematics text).
This is the honors section of math 381. The usual course topics will be treated in a deeper and more demanding manner than in the regular sections. In particular, we will go through strategies for proofs very carefully (Sections 1.7 and 1.8, plus other material from the instructor).
PREREQUISITE: MATH 232 OR 283.

Mark McCombs is a Teaching Professor of Mathematics. He earned his B.S., M.S., and M.A.T. degrees from the University of North Carolina at Chapel Hill. He

MATH 383H.001 | First Course Differential Equations
MWF, 9:05 am - 9:55 am. Instructor(s): Jian Wang. Enrollment = 35.
The scientific method is arguably the single most important achievement of the modern era. Together with its technological implications, in the last four centuries it has shaped the world both physically and culturally, and continues to do so, like no other element in the history of mankind. The overall aim of the course is to learn the basic elements of the method through a combination of rigorous mathematical training, simple physical experiments, and elementary mathematical modeling. The focus will be on ordinary differential equations, which can arguably be considered the ``birthplace" of the method. In class laboratory experiments will be presented about once per week. Students will be expected to collect data from the experiments, and apply differential equation models to attempt to predict the observed phenomena. Results will be reported in the Final Lab Report. Course material (including videos from experiments will either be posted at our {\bf sakai site, MATH383H.001.SP20}, or on a dropbox site if the files are too large for the sakai site.

Special functions, natural generalizations of the elementary functions, have been studied for centuries. The greatest mathematicians, among them Euler, Gauss, Legendre, Riemann, and Ramanujan, have laid the foundations for this beautiful and useful area of mathematics. For instance, Euler found the gamma function, which extends the factorial. The Bessel functions and Legendre polynomials play the role in three dimensions similar to the role of sine and cosine in two dimensions.

This course presents an overview of special functions, focusing primarily on hypergeometric functions, including Bessel functions and classical orthogonal polynomials. We will discuss how special functions arise from several areas of mathematics and mathematical physics
We will begin with a treatment of the gamma and beta functions, which are essential for understanding hypergeometric functions. Later we will discuss Bessel functions, orthogonal polynomials, the Selberg integral and its applications, spherical harmonics, q-series.

This course covers the physical fundamentals of material science with an in-depth discussion of structure formation in soft and hard materials and how structure determines material mechanical, electrical, thermal, and optical properties. Topics include amorphous and crystal structures, defects, dislocation theory, thermodynamics and phase diagrams, diffusion, interfaces and microstructures, solidification, and theory of phase transformation.

MUSC	291	001	2812	MUSIC AND POLITICS	Lecture (In Person On Campus Learners)	3	A

Bldg: Kenan Music Building **Room:** 3029 **Days:** TuTh **Time:** 12:30 - 13:45
INST 100 **Instructor:** Staff

Class Enrl Cap: 35 **Class Enrl Tot:** 0 **Class Wait Cap:** 10 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR1

Attributes: VP- Visual or Performing Arts, Aesthetic and Interpretive Analysis

In this course we consider the relationship between two concepts¿music and politics¿ broadly, in search of ways in which they elucidate each other as well as resist pairing. The class provides an overview of the major theoretical issues the pairing raises as well as diverse case studies that underscore the range of historical and geographical contexts in which professional musicians, activists, politicians, and civilians have engaged these concerns.

DESCRIPTION:
This seminar is for students who are interested in how music is made, how sound is produced in instruments, and how those sounds have been used in music making from ancient times to the present day. Students will study the basics of physics and music: wave motion, resonance, the perception of sound, scales, harmony, and music theory. Students who have never studied physics or music theory are welcome to enroll; there are no prerequisites. We will conduct four laboratory exercises (called etudes) in which students will work in small groups to investigate the acoustics of string, woodwind and brass instruments. Keyboards and percussion will also be considered, and students can pursue their areas of special interest in a research paper. The final project for each student will be a public performance of an original musical composition for an ensemble of instruments that the students have constructed themselves out of found objects. This class is taught in person and does not accommodate remote learners.

Students may also register for this course under MUSC 51.001.

GR1

Combined Section ID: 1390(phys/comp447.001) - COMP 447(#10463)

An introduction to quantum computing. Basic math and quantum mechanics necessary to understand the operation of quantum bits. Quantum gates, circuits, and algorithms, including Shor's algorithm for factoring and Grover's search algorithm. Entanglement and error correction. Quantum encryption, annealing and simulation. Brief discussion of technologies. Some knowledge of basic linear algebra recommended but not required.

PLCY 061H.001 | Policy Entrepreneurship and Public/Private/Non-Profit Partnerships
TR, 12:30 pm - 1:45 pm. Instructor(s): Daniel Gitterman. Enrollment = 24.
This seminar will define a policy entrepreneur and examine strategies used by policy entrepreneurs to achieve policy change or innovation in the policy making process. This course also aims to explore ways that public, private, and non-profit sectors collaborate to address problems that cannot be solved by one sector alone. There is growing recognition that sustainable solutions to some of the most complex challenges confronting our communities can benefit from these collaborative or ¿intersector¿ approaches.

FIRST YEAR STUDENTS ONLY.

Daniel Gitterman is Duncan MacRae ¿09 and Rebecca Kyle MacRae Professor and Chair of Public Policy at UNC-Chapel Hill. He also serves as Director of the

DESCRIPTION:
It has been over 150 years since the emancipation of black Americans and nearly 60 years since the passage of civil rights legislation, yet they still lag far behind white Americans in virtually every socioeconomic indicator. This course critically examines the causes, consequences of economic inequality and social policies to address these disparities, with a focus on racial disparities. We will examine the merits and limitation of various assumptions aimed at explaining these persistent disparities, explore how economic inequality is affected by race, systemic racism, and socioeconomic factors (education, labor market) and identify evidence-based policy options and proposal for reducing inequality. We will critically examine questions such as why do we need race-based policies in addition to economic based policies to address inequality within our society? Can policies promote wealth-building and also contribute to greater wealth equity? The course content will focus on the U.S. and be heavily weighted towards analyzing contemporary social and economic activity (2000-present).

PLCY 101H.001 | Making American Public Policy
MWF, 2:30 pm - 3:20 pm. Instructor(s): William Goldsmith. Enrollment = 22.
This course provides a general overview of the role of history in public policy, the policymaking process, and the substance of major domestic and global public policy challenges. It exposes students to the conceptual and analytical perspectives necessary for understanding and playing a direct role in policy making. This course will illuminate policy and political challenges in areas such as tax policy, social policy, education policy, health policy, foreign policy, and homeland security. We will explore the inherent tensions that emerge between good ¿politics¿ and good ¿policy¿ in a number of these substantive policy areas. Honors students will pay particular attention to the role of politicians (elected officials) and experts (policy researchers) in the making of public policy. Students will work to develop their skills in effective oral and written communication, including making oral arguments, presenting research findings, and writing for policy audiences.

PLCY 210H.001 | Policy Innovation and Analysis
TR, 9:30 am - 10:45 am. Instructor(s): Fenaba Addo. Enrollment = 24.
This course will introduce students to public policy as a discipline and the policy analysis process. We will review the core steps, theories, and tools of the policy process, provide practice applying these tools, and encourage the evaluation of effectiveness of different policy alternatives. The process involves defining a public problem and understanding stakeholders and their perspectives; describing public problems with quantitative data; understanding market failures and other rationales for government involvement; selecting criteria relevant for decision-making; constructing policy alternatives; evaluating the different alternatives against the stated policy criteria; and making and communicating a recommendation. This is a research-based and

communication-intensive course, which requires the completion of a policy brief in several, iterative steps. The course incorporates current events and relevant case studies to motivate and explain the policy analysis process.

FULL TITLE: Immigrants and Refugees in World Politics

The movement of people across international borders is one of the most politically controversial issues in the world today. This class focuses on two different types of global migrants, immigrants and refugees, and explores why these two groups move out of their countries and how they are treated by receiving countries. Immigrants and refugees have traditionally been thought of as politically, legally and ethically different from each other and this class explores these differences, but it also explores the many ways that they are similar. Finally, the class explores a third type of global migrant that politicians and policy makers frequently promote, guest workers, and considers to what extent guest worker policies can effectively address the challenges and opportunities posed by the two other migrant groups. This class encourages students from a wide range of backgrounds, experiences and perspectives to enroll because it benefits significantly from including such diversity.

Students must also enroll in a recitation section for POLI 130.001. Some seats are reserved for incoming first year students.

A number of seats in this class are being reserved for each new student orientation registration period. A class that looks closed may have a number of seats released during each registration period. All seats remaining after August 1, 2021 will be available for open registration which begins on August 2, 2021.

POLI 238H.001 | Contemporary Latin American Politics
TR, 2:00 pm - 3:15 pm. Instructor(s): Evelyne Huber. Enrollment = 24.
This course provides an overview of major topics in the study of Latin American politics. It is aimed at students with a desire to understand how Latin American societies and governments are organized, what the major problems are that these societies are facing, and what accounts for different outcomes from

the point of view of the welfare of citizens. We shall examine both common traits in the region¿s history, culture, and economic, political, and social structures, and important differences between countries in these dimensions. We shall gain an understanding of the diversity of national experiences and a somewhat deeper knowledge of a few select cases: Argentina, Brazil, Chile, Uruguay, and Costa Rica.

Evelyne Huber, Morehead Alumni Distinguished Professor in Political Science, works on problems of development, democratization, and welfare states in Latin America and Europe. Her most recent books, co-authored with John D. Stephens and published by the University of Chicago Press, are entitled Development and

"**NOTE: During the 2020-2021 academic year, AMST248 will also fulfill the ""Introduction"" requirement for the major and minor in American Studies (typically fulfilled by AMST101, AMST102, AMST334 and AMST335).

According to the US Census Bureau, in the year 2020 ¿more than half of the nation's children are expected to be part of a minority race or ethnic group. All Americans under the age of 18 are now at the front of a trend that will see the overall population follow suit some 20 years later¿ (NPR¿s Hansi Lo Wang). In essence, we are in a time of a dynamic racial shift, and yet our country seems to be divided or confused about what ¿race¿ is, how to talk about it, and how it might intersect with other identity formations such as gender, class, or sexuality. The first goal of this super-course is to give students real tools for how to address multiple modes of difference and to understand how intersectionality¿the theory of interlocking identities that reflect multiple modes of oppression and privilege¿is key to the work of social justice.

POLI 490 Advanced Research: Racial Disparities in Criminal Justice

From traffic stops to the death penalty, racial and gender-based disparities abound in US criminal justice outcomes. In this class, we will explore the literature relating to racial disparities in various criminal justice settings and current efforts to address these. Readings will cover such issues as the war on drugs, mass incarceration, racial profiling in traffic stops, and the politics and public opinion of crime, as well as current research projects underway here on campus. The class will involve students working on original research projects addressing a particular issue of racial disparity in criminal justice in North Carolina or elsewhere.

Seats in 400 level POLI courses are reserved for majors only during Wave I of the registration period. Remaining seats will open to the general student body during Wave II. For questions, please contact the department at millie.tan@unc.edu

TITLE: September 11: Origins, Consequences, and Where Do We Go from Here

GEN EDS: HS, CI

DESCRIPTION:
This first-year seminar will reflect upon the September 11 terrorist attacks in the United States, exploring how the terrorist attacks occurred and why the U.S. intelligence community and policymakers failed to anticipate and prevent them as well as the subsequent effects on the United States, the Middle East, and the world. The instructor, a former intelligence analyst, will lead students in discussions and in-class exercises to encourage critical analysis of the implications of terrorism, particularly on United States national security. A variety of assignments will require students to assess the causes and results of American national security decisions and alternative decisions that might have been made, supported with research and evidence.

PWAD 101H.001 | Making American Public Policy
MWF, 2:30 pm - 3:20 pm. Instructor(s): William Goldsmith. Enrollment = 2.
This course provides a general overview of the role of history in public policy, the policymaking process, and the substance of major domestic and global

public policy challenges. It exposes students to the conceptual and analytical perspectives necessary for understanding and playing a direct role in policy making. This course will illuminate policy and political challenges in areas such as tax policy, social policy, education policy, health policy, foreign policy, and homeland security. We will explore the inherent tensions that emerge between good ¿politics¿ and good ¿policy¿ in a number of these substantive policy areas. Honors students will pay particular attention to the role of politicians (elected officials) and experts (policy researchers) in the making of public policy. Students will work to develop their skills in effective oral and written communication, including making oral arguments, presenting research findings, and writing for policy audiences.

PWAD 150H.001 | International Relations and World Politics
TR, 2:00 pm - 3:15 pm. Instructor(s): Mark Crescenzi. Enrollment = 2.
This course introduces you to world politics from an analytical, social scientific perspective. The goal is to understand why and how political actors in the international arena make decisions that affect us all. Why do nations fight? Why do they cooperate, both economically and politically? Why do we have such a hard time solving the puzzle of global warming, or poverty? How can we understand the mechanisms that encourage cooperation over conflict in world politics? This course goes beyond learning how others have studied problems in world politics. Our goal is to demonstrate how theories of world politics can be constructed and applied, and, in turn, to have you engage in this process of application using cases drawn from recent and current events.

12-JUL-2021	RC CLAS UGRD FIRST YR STDTS	24	0
01-AUG-2021	RC CLAS UGRD FIRST YR STDTS	0	0

DESCRIPTION:
An introduction to the Islamic religious tradition, focusing on major themes of Islamic religious thought, bringing out both traditional spirituality and the critical issues confronting Muslims today.

REGISTRATION PROCEDURES:
In mid-June, FY students entering their second term in residence in fall 2021 will be able to enroll in FYS when their registration session opens. This registration window closes on July 9.

In mid-late July, incoming FY students will have the opportunity to enroll in FYS during their assigned registration sessions.

RELI 073H.001 | From Dragons to Pokemon: Animals in Japanese Myth, Folklore and Religion
TR, 2:00 pm - 3:15 pm. Instructor(s): Barbara Ambros. Enrollment = 24`.
This seminar examines the cultural construction of animals in Japanese myth, folklore, and religion. We will discuss various kinds of animals: those that occur in the natural world, those that are found in myths and folklore, and those that have appeared in popular media such as animation. We will explore how images of various animals were culturally constructed as tricksters, gods, monsters, or anthropomorphic companions; how animals were ritualized as divine, demonic, or sentient beings in Buddhism, Shinto, and folk religion; and how animals could serve as metaphors that embodied collective ideals or anxieties. Most of our readings will focus on primary and secondary texts from the Japanese tradition (in English), but we will also read theoretical texts on human-animal relationships and historical studies on animals in the larger Asian context. We will also view and analyze several Japanese films, both anime and documentaries, that deal with animals and environmental issues.

SPAN 261H.001 | Advanced Spanish in Context
MWF, 11:15 am - 12:05 pm. Instructor(s): Helene M de Fays. Enrollment = 11.
Spanish 261H is a fifth semester course that uses a variety of texts (literature, movies, newspaper articles, speeches and essays) as a basis for reviewing grammatical concepts, developing writing competency, refining analytical skills, and improving overall communication abilities in Spanish. Through work on authentic and original texts, this course continues to focus on refining the four language skills of reading, writing, speaking, and listening, as well as

further developing critical analytical capacities. With the readings and films, students will explore their socio-historical context and analyze the application of different linguistic structures as tools employed to create meaning and convey a message. Students will be expected to do a significant amount of reading and writing in Spanish 261H.

Note: This course is the prerequisite for all the Spanish minors and majors at UNC. Students may not receive credit for both SPAN 261 and SPAN 267, 300, or

DESCRIPTION:
The 1954 Brown v. Board of Education of Topeka case centered on one of the most significant and controversial issues in American public education: equality of educational opportunity. Now more than 60 years after this historic Supreme Court decision, this seminar will use a sociological lens to examine in depth the social conditions that precipitated the case, other relevant court decisions, the changing definitions of race and the educational landscape over the past 6 decades. Topics include de jure and de facto segregation, busing, between-school segregation, tracking and ability grouping, the black-white achievement gap and residential segregation. Students will read historical and contemporary accounts and research reports on the move and progress toward equality of educational opportunity, view films related to the topic, conduct original research exploring young adults¿ educational experiences, perspectives on equality of educational opportunity, and hopes for their future children. Students will prepare an oral presentation and a research paper.

This course provides essential tools that anybody interested in business should know. We will analyze theory and practice of the major financial decisions made by corporations. The goal of the class is to teach you 1) how to value firms and project opportunities using methods drawn from the theory of corporate finance 2) to develop an appreciation of how financing decisions impact project and firm value and 3) how to develop effective ways to visualize and communicate spreadsheet analyses. By definition, the course is designed to be ¿hands-on¿.

This is a year-long course that begins in the Fall semester. The emphasis of this course will be on the decisions that must be made by, and/or for, the ultimate investor, and the analytic tools and empirical evidence that can help inform such decisions. The objective of this course is two-fold: first, to provide financial analysts with the analytical skills needed to aid such investors; and second, to help individual investors utilize and evaluate the services offered by analysts. Students will apply the principles and techniques of Investment Management by operating as financial planners (analysts) for the Kenan-Flagler Financial Planners. This course will engage students in managing a real portfolio student managed fund.

ENROLLMENT REQUIRES APPLICATION AND PERMISSION OF KFBS.
PREREQUISITE: BUSI 580H w grade of C or better
CO-REQUISITE: BUSI 588 OR 589.

Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met¿ error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in early August. If you are not waitlisted, you will not be allowed to enroll.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
