NOTE: Honors Carolina students register online when their registration appointment begins. Online registration ends April 20. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist.

Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between April 20 and August 12.
BIOS 500H.001 | Introduction to Biostatistics
TR, 11:00 am - 12:15 pm. Instructor(s): Jane Monaco. Enrollment = 24.
This is an introductory course in probability and statistical inference designed for the background and needs of BSPH Biostatistics students.
Topics include survey sampling, descriptive statistics, design of experiments, correlation, probability, confidence intervals, tests of hypotheses, 2-way tables, chi-square distribution, power, ANOVA, non-parametric tests, and linear regression. A small class size will allow opportunity for more in-depth treatment of biostatistics topics.
In addition to traditional introductory statistical concepts, students explore current controversies, ethical questions, and common errors in the medical literature through a variety of readings and a project.
Upon completion, students will have an understanding of many of the most important introductory areas in inferential statistics. Students will be able to produce straight-forward statistical graphs and conduct commonly used analyses using SAS software. Emphasis will be placed on understanding the underlying

TR, 12:30 pm - 1:45 pm. Instructor(s): Jane Monaco. Enrollment = 24.

This is an introductory course in probability and statistical inference designed for the background and needs of BSPH Biostatistics students.
Topics include survey sampling, descriptive statistics, design of experiments, correlation, probability, confidence intervals, tests of hypotheses, 2-way tables, chi-square distribution, power, ANOVA, non-parametric tests, and linear regression. A small class size will allow opportunity for more in-depth treatment of biostatistics topics.
In addition to traditional introductory statistical concepts, students explore current controversies, ethical questions, and common errors in the medical literature through a variety of readings and a project.
Upon completion, students will have an understanding of many of the most important introductory areas in inferential statistics. Students will be able to produce straight-forward statistical graphs and conduct commonly used analyses using SAS software. Emphasis will be placed on understanding the underlying
NOTE: Honors Carolina students register online when their registration appointment begins. Online registration ends April 20. At that time, submit a wait list request at honorscarolina.unc.edu/waitlist.

Non-honors students wishing to enroll should submit a wait list request at honorscarolina.unc.edu/waitlist between April 20 and August 12.

Non-BIOS students are allowed to register for BIOS 511. However, during early registration, classes are restricted to BIOS students. NON-BIOS students will need to add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.

*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.

**We will begin to fill available seats from the waitlist in early August.

TITLE: Environment-ECUIPP Lab: Connecting with Communities through Environmental Research for Public Health

GEN EDS: EE-Mentored Research

DESCRIPTION:
This course is an entry into an undergraduate learning community organized by the Gillings School of Global Public Health, Department of Environmental Science and Engineering. The ECUIPP Lab (Environmentally-Engaged Communities and Undergraduate students Investigating for Public health Protection) is a creative community of students, faculty members and practice partners. Students in ENVR 89-001 will become members of the Environment-ECUIPP Lab. Over the course of the semester they will design and conduct research that addresses a pressing environmental health issue in a local community. Students will work with the local community partner to develop a research question and use the resources of the ECUIPP Lab and the Department of Environmental Sciences and

Permission of instructor needed for non-HBEH majors.
Students will develop understanding of conceptual and mathematical underpinnings of multilevel models with nested designs and with longitudinal data.
Students will also be able to formulate, apply, and interpret multilevel models and become adept at fitting multilevel models using SAS.
